ARRIVAL OF KOSSUTH.

THE arrival of this patriot in this country is likely to be attended with great enthusiasm and joyful greetings on the part of the American people, and why not? his has been a life devoted to his country, to the cause of liberty—to the elevation of his countrymen—therefore he cannot but be dear to the American people, alive to all that tends to elevate, to improve and to better. But the arrival of Kossuth cannot be hailed with greater joy than can the arrival in this City of Singer's Patent, straight needle, perpendicular action Sewing Machine. This machine is by far the best work saving machine ever used, and is one of the greatest inventions of the age. It has been used a sufficient length of time to thoroughly test and prove its great variety of work and is pronounced full approved. It operates in the most plain and simple manner, and the work of the following occupations, viz: Tailoring, Shoe making, Clothing manufactures, harness and saddlery, shirt makers, Corset makers, Carriage trimmers, Tailoresses and Dress makers, Seamstresses, Carpet bag manufacturers, trunk makers and upholsterers. And may also be most profitably used in making sails and awnings, beds and mattresses, woolen, cotton and linen goods, such as pantaloons, vests, coats, dresses, cloaks, clothing, sacking bottoms, and many and many other articles too numerous to mention, and indeed for any other purpose where stitching by hand has been required. This machine, which is about two feet square, and weighs 60 lbs, is compact, ornamental in form, portable in all its parts, and liable to get out of order, and is easily adjusted and operated. It will perform the labor of from four to ten persons, according to the kind of work and skill of the operator. The best kind of Tailor's custom work can be executed with in the best manner, and in making coats, and most other articles to which it is adapted, its work is far superior to that done by hand. The Machine will be constantly on Exhibition at the Machine Warehouse, Commercial Exchange, French street, where all persons are invited to call, and may be assured of receiving abundant evidence and perfect ocular demonstration of the truth of all the above value of this invention. Those wishing to purchase machines are hereby notified that I am selling them at the rate of $130 each, with the privilege of returning them in three months if they do not prove as represented, and receiving back the money paid for them. The machine is sold with the privilege of instruction in the use of it, at my warehouse, for the term of one month, during which time a workman will take the machine, be stitched in full, and learn the operator far superior to that done by hand. Persons in any manner interested in this machine are enabled to make better work, and at the same time cheaper work than those who manufacture according to the ordinary way. To become acquainted with what the most skeptical can be cured of this skepticism, and the relentless doubts cast to the four winds, and all sent on the swift wings of rejoicing that nothing can be manufactured cheaper, so durable and so beautiful, as can be done by Singer's Patent Sewing Machine.

TO THE AFFLICTED, ☞ The appearance in *Three Bottles of Nuttall's Syriacum* is a new *Era* in Medicine, from its novelty and direct application to the *old*

ABSURD AND INCONSISTENT ONE BOTTLE SYSTEM!

While its success, prepared in this manner, (Each Bottle containing a different preparation) *in curing the different stages* which characterize *Consumption*, has established the *Welcome truth* of the Curability of Every Stage of Pulmonary Consumption; ☞ PHYSICIAN APPROVED IT, because it is based upon Scientific Physiological and Pathological principles. *The Public approve of it*, because it is *common sense*, and because they know from facts and experience, that *one preparation will not cure the three stages of Consumption. The suffering, disappointed*, and the *courageous hopeful appreciate it*, because its principles hold out a reasonable *Hope*, and when its *laws Nuttall's Syriacum*, has its effects are realized.

IF HE IS IN THE FIRST STAGE OF CONSUMPTION

and uses the *First Bottle*, his expectoration, difficult and painful, becomes free and easy. *His Cough soon gets well*, the soreness, tickling in his throat, inflammation, pain in his breast, side, head, back, joints, and limbs are removed.

IF HE IS IN THE SECOND STAGE

and uses the second bottle, his fever leaves him, his frightful chambers become sweet and refreshing, his night sweats vanish his expectoration, copious and bloody, assumes a healthy appearance, and as both the appetite & bowels become regular, his cough now ceases, *He recovers and is well*.

IF HE IS IN THE THIRD STAGE,

and uses the third bottle, his Diarrhœa gradually ceases, his weak bowels, become strong, his cough and other symptoms disappear, feeling of health becomes strong and vigorous, his stomach recovers its proper tone, and creates new, rich, and nourishing blood his strength returns, his wasted body *becomes* filled with flesh, *HIS DISEASE GOES AWAY*, and he is

RESTORED TO HEALTH.

Each bottle of *Nuttall's Syriacum* has the symptoms of the stage for which it is intended printed in front of the wrapper, whereby every invalid knowing his own symptoms, can judge for himself. WHICH BOTTLE HE REQUIRES. I consequently no misCalculation can be made in selecting THE PROPER MEDICINE.

Erie, Nov. 1, 1851—25 A. & J. S. WALTERS.

Pennock's Seed and Grain Planter.

Patented, March, 1841—Re-issued Oct '49.

THIS MACHINE operates equally well on all kinds of land, and is not injured by coming in contact with rocks, roots, &c. It will plant in hoed rows and in irregular shaped ones, without planting any out of order. With a saving of from 10 to 12 per cent in labor, it fills with more regularity from 10 to 12 rods per day of white, oats, barley, and other small grain; and with nine men and horses it will readily plant from 15 to 20 acres per day of Indian corn, in hills, &c. It will save from 2 to 3 quarts of seed per acre, and yield from 15 to 20 per cent more than the best hand planting, by distributing the grain uniform, at any desired depth, and leaving a right of earth between the rows. The rows of the young plants are protected during the winter by the action of the frost and rain upon the earth thrown upon them instead of being thrown out and exposed as in hoed crops. One man and horse will do as much work in the field as two men and two hoes will do in the usual way. The plants are not liable to injury by the fly. The planter can be used frequently, prevented by rain from harrowing in his grain after it is sown, which harrowing it use-less in seeding with this machine, as it completes the work at once. The first premiums have been awarded to this valuable machine by the New York and Philadelphia Agricultural Societies. Machines and rights can be had at any time on Gideon Sawyne, Pittsburgh, Pa., who will also supply the machine with grain and seed for planting any acres. I caution the public against infringing upon my patent, under the penalty of the law in such case provided. The subscriber thankful for past favors, respectfully solicits a continuation of public patronage. Letters post paid and addressed to GIDEON SAWYNE, Pittsburgh, Pa., will meet prompt attention.

☞ Agents wanted to canvass.

ALSO

MCCORMICK'S CELEBRATED VIRGINIA REAPING MACHINE.

This machine for which the gold medal was awarded at the World's Fair, is warranted to cut more and cheaper acres of grain or grass with less power than any machine now in use. It will lay the grain or grass even on the ground in a smooth bind and in ordinary mowing, and it will cut one and a half acres of wheat or other small grain per hour, and will save three-fourths of wheat scattered by ordinary reading. For further particulars, address, post paid,
