

WOMAN AND HOME.

LATEST IN JEWELRY.

Live Tortoises Are Now Used in Paris for Ornaments.

The new "living jewelry" is all the rage in Paris. In a show window of a prominent jeweler on the Rue Royale there are a number of tiny living tortoises imbedded in jewels and crawling about on plush cushions.

The tortoises are from one-third to one-half of an inch long without the head. Their shells are covered with an ornament of filigree gold in which is set a number of precious stones. The little animals are in no way incommoded by

NEW LIVING JEWELRY.

their ornaments. To the shell is attached a tiny gold chain that can be pinned on the corsage by a safety pin.

The illustration represents one of these ornaments. It is a tortoise covered with a fine trellis work of rose diamonds and brilliants in Louis Quinze style. Some are ornamented with brilliants and rubies, others with turquoise and emeralds. In some the stones are set in the shape of a monogram.

When not exhibited on their plush background in the shop windows the animals are allowed to crawl around in a little doll garden in the store, which is planted with real shrubs and has a rustic bridge and gravel walks.

A REAL DUTCH DARNING-BAG.

The Way They Make Them in Holland, Where Knitted Stockings Are Worn by Everybody.

Since knitting golf and bicycle stockings came in vogue the darning-bag became a necessity.

Here is a bag that was brought from Holland. Its outside is made of one big circle of cretonne, lined with satin. Crossing it on the inside are broad bands of satin ribbon,

with ribbon for holding scissors, needlebooks, bags, etc. To hold all firmly in place small pasteboard pieces are slipped under the ribbon at bottom and sides.

The top is shirred with double rows of baby ribbon run through rings and tied in many loops and ends.

Room for the Children.

It is desirable that growing children should have a room all to themselves, where they can be free to move around and disarrange things if they feel like it. In England the nursery is made much more of than it is over here, and the children's quarters, as they are called, frequently consist of a study, playroom and individual bedrooms attended by their own corps of servants. This is rather an extravagant idea for the average American home, but it often proves possible to devote one room to the sole use of the young members of the household and their goods and chattels. The mother is happy who knows that her young men and women are where they can indulge in mischief to their heart's content without danger of harm. The liberty which this gives her to devote certain portions of the day to other occupations proves a valuable acquisition to her economics.—Chicago Journal.

"Scrubbing Service."

Incumbents of London churches which stand in need of a cleaning might do worse than follow the example set by the vicar of St. Lawrence's church, Birmingham, who recently announced a "scrubbing service," and invited the congregation to assist in the work. Soap, water and scrubbers were to be provided, but the elbow-grease must be furnished by the devotee. The service is to last from three o'clock until 9:30, by which time he hopes that the last polishing touches will have been given, and the interior of the church present a glossy and shining appearance.—London Telegraph.

A Petty Sin.

Gerald—Do you think that suicide is a sin?
Geraldine—Well, I think it would be forgiven in your case.—N. Y. Truth.

MANAGING INFANTS.

Babies Need a Reasonable Amount of "Letting Alone."

Although the baby is an exceedingly tiny member of the establishment, it requires more steps and more care than any other, and sometimes more than all the rest put together. Especially is this the case if the child is at all illing or irritable, or has been spoiled during the first few months of its existence. The dozing fondness of mothers for their babies, especially the first ones, is responsible for a great deal of hard work and unnecessary trouble as they grow older. There is nothing so beneficial to a baby of any age as a reasonable amount of judicious letting alone. This does not by any means presuppose neglect or even the lack of sufficient attention, but it does include among other things that rest and quiet and freedom from continual nervous strain that wrecks so many babies, and is one of the principal causes of the remarkable number of deaths that our statisticians are forced to chronicle.

Careful feeding, warmth and quiet are three imperative necessities for healthy and happy children. Continual fussing over babies is the cause of a great many bad tempers and a great deal of illness. There is very much more in the infant incubator idea than the general public is willing to admit. It seems a dreadfully cold-hearted and cruel thing to put the dear little creatures into a box place and shut them up there, where one cannot get at them to kiss and cuddle them, but all the same this kissing and cuddling business is just what does the most harm. Of course, all of the mothers all over the country cannot have incubators and brooders for their babies, but they can exercise a little self-denial and let the little ones alone when they need rest and quiet. They can dress them properly, feed them at regular intervals and prevent their being disturbed by enthusiastic friends, who

THE FARMING WORLD.

FIGHTING INSECTS.

Some Valuable Formulas Furnished by Prof. Maynard.

Every fruit and plant has its peculiar insect enemies and fungous diseases. Progressive farmers, gardeners and fruit growers are provided with spraying machinery for overcoming these pests, and spraying is as much routine work as is cultivation or fertilizing. For fungous pests, because of cheapness, effectiveness and lasting qualities, the bordeaux mixture has superseded all other mixtures. To make it, four pounds of copper sulphate or blue vitriol are dissolved in two gallons of hot water; or, suspended in a coarse sack in a cask of cold water it will dissolve in a few hours. Caustic or quicklime, four pounds, is then slaked slowly by adding small quantities of water until thoroughly dissolved. When

DOUBLE CYLINDER SPRAY PUMP.

cooled, the lime wash is poured through a fine mesh sieve into the dissolved copper sulphate. To the mixture is then added 25 to 50 gallons of water. Destruction to fungous is probably caused by the copper, which is held in place by the lime. Should the bordeaux mixture disfigure the fruit, the ammoniacal carbonate of copper should be used and applied often, as it washes easily. Formula: Copper carbonate three ounces, ammonia enough to dissolve the copper, water 40 gallons.

Paris green and kerosene emulsion are the insecticides in most common use. Paris green effectually destroys chewing or leaf-eating insects, and is less liable to injure foliage than London purple. Use in water, one pound to 200 gallons. If lime is added, or the Paris green added to the bordeaux mixture, use one pound to 50 gallons. For sucking insects, the kerosene emulsion is unequalled: Dissolve a half-pound of bar soap in two gallons of hot water, and while hot add two gallons of kerosene oil and stir until a lard-like substance is formed. When used, dilute with water to 15 or 25 gallons. Insects and fungous growths appear together, hence, many combine Paris green with the bordeaux mixture, saving half the cost of application. For applying, the pump selected should throw a heavy stream, with considerable force, and yet work with ease. The illustration herewith shows a powerful pump and suitable sprayer for all ordinary crops. The barrel is readily mounted on any form of wagon.—Prof. S. T. Maynard, Mass. Agr. College, in Farm and Home.

VIRGINIA'S CONVICTS.

To Be Employed in the Construction of State Roads.

The bill to be introduced in the Virginia legislature, for the employment of convicts on the roads of the state, provides that all able-bodied male prisoners, sentenced to jail or penitentiary for more than 90 days, shall be subject to work on the roads. Those sentenced to county jails shall work upon the roads of such counties, unless there is no immediate need of them, in which case they may be hired to other counties, but only for road work.

The convicts not required for services in the penitentiary are to be distributed among the counties, on application, and none are to be hired out for any purpose but road work. Not less than five, nor more than 25, are to be assigned to any one county, every assignment to be made for a year, unless shorter time is requested, and then for not less than 90 days. If the number of convicts is not sufficient to fill the applications, they are to be supplied ratably.

Convicts, in respect to their work, are to be under the control of the county authorities in which they work; but, as prisoners, they are to remain in the custody of the state authorities as if they remained in the penitentiary, and transportation expenses, guarding, feeding, clothing and medical attendance are to be paid by the state, the counties to provide suitable shelter.

Each county is to adopt and put in operation a scheme or plan for working its roads by such prisoners in its jail as are available, together with those which may be secured from the state, and "every county shall annually levy a road tax of not less than 15 cents, nor more than 30 cents, on every \$100 of the value of the property, real and personal, assessed for taxes in the county, the proceeds to be applied to road improvement in said county."—L. A. W. Bulletin.

HORTICULTURAL HINTS.

Give the orchard all the potash that it needs.

Toads, frogs and lizards are useful in the garden.

The gem melon is the best seller in the market.

Prune the quince tree and train it to a single stem.

Missouri sold \$19,500,000 worth of fruit last year.

Extra work in getting a good seed bed pays in garden work.

A neglected orchard incumbers land that might be used profitably for other purposes.

A late crop of cabbage is easily grown, for the seed can be planted in the open ground.

Five acres in cucumbers for pickles will ordinarily pay as much as all the rest of the farm.—Western Plowman.

America's Greatest Medicine

The following is a characteristic Hood's Sarsaparilla testimonial. Facts like these have made Hood's Sarsaparilla America's Greatest Medicine and endeared it to thousands of homes scattered all over this broad land.

"We like to tell what Hood's Sarsaparilla has done for us. Our four children had diphtheria. From the very first our little boy Ralph, then seven years old,

was very sick and for several days it seemed as if he would never be any better. After awhile he began to improve and in a few weeks was able to go out, although weak and miserable. Then,

All Strength in His Limbs gave out. The physicians told us it was paralysis, which sometimes follows an attack of diphtheria. We did everything for him, but he grew worse until he was in a pitiful condition. He suffered terribly at night and complained continually of his head, and in what little sleep he was able to get, moaned unceasingly. He lost all control of the muscles of his body and limbs. He had no appetite and complained of feeling sick at his stomach all the time. After we had tried many different remedies and had about given up all hope we commenced giving him Hood's Sarsaparilla. In a short time he ceased to complain, his appetite improved and at the end of three months he was able to attend school a part of the time. Now he is well and quite a strong and rugged boy.

You are at liberty to use this testimonial if you desire, as we feel we cannot say too much in praise of Hood's Sarsaparilla as a blood purifier and building up medicine." Mrs. R. E. ANDERSON, Cumberland, Maine.

Economy is also a characteristic of Hood's Sarsaparilla. Every bottle contains 100 Doses, and hence there is a solid fact concisely stated in the familiar line, 100 Doses One Dollar.

Hood's Sarsaparilla

Is America's Greatest Medicine because it accomplishes wonderful cures when all other medicines fail. Sold by all druggists. \$1. six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass.

PAINT YOUR WALLS AND CEILINGS.

MURALO WATER COLOR PAINTS

FOR DECORATING WALLS AND CEILINGS Purchase a package of your grocer or paint dealer and do your own MURALO from decorating. This material is a HARD FINISH to be applied with a brush and becomes as hard as Cement. Milled in twenty-four tints and works equally as well with cold or hot water. Send for sample color cards and if you cannot purchase this material from your local dealers let us know and we will put you in the way of obtaining it.
