MONT EDWARDS, Austin, Pa., Sept. 6th, 1898.—28-3t

Lie Nailed. The notorious Philadelphia Press is endeavoring to create the impression that the Republican State Committee are opposing the election of Hon. Chas. W. Stone. State Chairman Elkin said in his speech at Media, last Saturday: "One of the charges which have been industriously circulated in every part of the State is that the regular organization of the party in some mysterious way not apparent, has been able to get a candidate in opposition to the re-election of the Hon. Chas. W. Stone. I take this opportunity to say that this charge is absolutely, unqualifiedly and maliciously false. It has not the shadow of foundation in fact. It is a fabrication worked out of the inventive imagination of designing persons, who do not even believe it themselves. The regular organization of the party is anxious to elect a Republican Congressman in every Congressional district in the State, and will spare no efforts to accomplish this result. The Republican candidate for Governor will soon appear on the same platform with the Hon. C. W. Stone in his district, advocating the election of the whole Republican ticket."

He Led the Charge. A writer in the Philadelphia Press pays the following tribute to Capt. Harry Alvan Hall for his work at the battle of Coamo: "The success of the charge was due to the bravery and ferocity of the men and the skill and daring of Captain Harry Alvan Hall. The latter led the charge from the moment they entered the little ravine until they reached the enemy's position, exposing himself to the hot fire fearlessly and continually, and urging on his men by his word and example. The result, however, might have been different in spite of him had not the volley firing of the charging troops been so deadly. On the first volley the Spanish commander fell dead and with him several of his leading officers. This disconcerted the Spaniards, and though they desperately resisted the attack, their resistance was ineffectual. After a fierce fight they were compelled to yield their position and surrender upwards of five hundred of their number to the victors."

I now take great pleasure in recommending them to any person suffering from this terrible malady. I am gratefully yours, M. A. Hogarty, Lexington, Ky." Sold by L. Taggart, druggist.

Friend "Buzz" had an awful spasm last week in an attempt to say something to "Peggy." In his spasm he evidently gaped at a chicken and showed a Buffalo and has nothing left but a few hairs which he viewed with a microscope and found them to be just like himself. Friend Buzz see do not have to view buffalo hairs to see nothing. All you have to do is to look in the mirror. Your case is critical; you had better consult Dr. Squirrel, the Huston Hill yawl doctor, before its too late. In your letter last week you said your people didn't know when it was Sunday. That's easily accounted for, its ignorance. We did not advertise for the Sterling Run correspondent, Buzz or Hercules either and then got mad because we found him. We have found harder people to deal with than you, as you only lack a few minutes of being crazy over that chicken you had. Better stop the school boys here are making sport of you and say a fool is known by the multitude of speaking.

PEGGY. (Not knowing what differences or unpleasantness there may exist between our esteemed correspondents "Buzz" and "Peggy," we herewith certify that they will confine themselves strictly to items of news, as our experiences in the past have proven very conclusively that the neighborhood disputes result in little or no satisfaction to either party and only tend to lessen the interest of the letter.—EDITOR.)

First Fork. Candidates are plenty in this neck of woods.

A bran new McKinley boy arrived in town this week, at the home of B. Edwards. Cigars are plenty and the air is blue with smoke.

Mrs. R. Robinson's new residence is rapidly nearing completion under the supervision of J. Wygant. She will have a pleasant home when finished.

Hattie Russell opened her school to-day and says it seems like getting her again to assemble with the little folks of a year ago. She has an attendance of thirty.

By the expressions of regret heard last Thursday for poor Jay Goodnough, who was hit by the ball, the girls gave positive assurance that he was not alone in his agony. Guess Jay thought it was more of a battle-field than a base ball diamond.

Geo. Hart, of Austin, made a flying trip here to-day in search of a fellow raised one of his checks from \$1.90 to \$30.99. He captured one of the gang at Austin and has him securely copped. Geo. has had considerable experience in that line and says he will give them some lessons to remember.

Candidates Olmsted and Thomas were around last week, fixing up political fences. They are both good men but both can not get the nomination. There seems to be some points that one lacks and the other gains, but the one that gets the most votes will surely win. All that we have promised either candidate we hope we will do as agreed as in a business transaction.

Disgrace the Chronic Grumblers.

There are those who can find nothing encouraging in business conditions at any time. If they are crowded with orders they complain of small profits and the hard work, and if the profits are big and the work light they will still grumble about something. The worst effect of this chronic tendency to grumble on the part even of a few of the leading business men in any given community is that it is apt to create a false impression about the actual condition, and thus retard business prosperity even where the conditions exist for a business boom of the most gratifying proportions.

Just now, when wholesale merchants are crowded with orders, when factories are being run on full time, when the largest wheat crop ever known has been harvested and the prospects of an abundant corn crop are of the best and railways are taxed to their utmost capacity to handle the freight that is being offered, a class of business men are finding something to grumble about, and this class has its representatives in our own city as well as elsewhere. Their numbers are few and their influence not great, but so far as they can create a false impression and encourage distrust and hesitancy where they should be buoyant with business confidence.

At no time within the last ten years has there been less reason for doubt and hesitancy in business circles or less cause for the lugubrious croaking of the chronic business grumblers. Some of the grumblers are doing the largest business they ever did in their lives, and one would think that common business sagacity would lead them to assume the confident instead of the despondent tone.

As the chronic grumbler will be chronic grumblers to the end of their days, however, it is clearly the policy of other folks to disregard their croaking and be guided by the encouraging business conditions which exist. A pilgrimage among the jobbing houses and to the freight receiving stations of the various transportation companies will convince any observing person that business even in what is usually the dull season of the year is the reverse of dull. Business is good and growing better whether measured by the test of weekly or monthly sales, railway freight receipts, bank clearings or a low ratio of business failures, and these are indications that should outweigh all the lugubrious wailings of all the chronic business grumblers that could secure standing room in a ten-acre lot.—Philadelphia Times.

Popular Primaries.

There is a growing sentiment in the South and West for what is known as popular primaries. Georgia and South Carolina have tested the system and found it satisfactory and Alabama is about to enter on a trial of it. In several Western States the question is being agitated and, perhaps, may be adopted in the near future.

Under this system political conventions are practically done away with. Any man may become a candidate for any office, by paying a small fee and taking out candidate's papers. This permits his name to be printed on the official primary ballots. All persons entitled to vote at a general election are entitled to vote at the primaries and thus the person nominated is to all intents and purposes elected, for the subsequent election is nothing more than a ratification.

In some respects the system is excellent, as it prevents a few men from controlling and directing nominations in convention. On the other hand it would put the control of nominations into the hands of the party in power, thus giving it a greater chance to perpetuate itself.

The plan pursued by leaders in Pennsylvania, and notably Senator Quay, in going directly to the people for endorsement, takes in the best elements of the "popular primaries" without doing away with party distinctions and party principles. If Southern and Western States that propose to adopt the new system embody this modification, the plan is far more likely to prove successful and beneficial.—Philadelphia Inquirer.
