FOR BRYAN TO STUDY.

The Increasing Supply of Gold Makes the Silverite Arguments Fall Flat.

Mr. Bryan will find a hard nut to crack in an article on "The Increasing Supply of Gold" which George E. Roberts, director of the mint, has written for the Forum.

When the horrible "crime of '73" was consummated the gold output of the world amounted to \$96,200,000, and that of silver, reckoning it at the ratio of sixteen to one, was only \$81,000,000.

The significance of the figures is all the greater when we consider the progressive increase in the annual production of gold, which is indicated in the following table:

Table with 2 columns: Year and Gold Production (\$). Rows include 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899.

Such are the improved methods of mining and treatment that it may be said of most gold fields, as Mr. Roberts says of those of the Transvaal, that the figures "suggest the steady growth of a manufacturing industry rather than the record of one usually regarded as extremely uncertain in results."

For 1898 there is a gain of more than \$20,000,000 in South Africa, of about \$10,000,000 in Australasia, of \$7,000,000 in the United States and of \$10,000,000 in the remainder of North America.

These gains, it should be noted, do not merely reinforce a depleted stock, nor are they offset by industrial consumption.

So far from true is it that the money supply of the world has been practically cut in two by the general establishment of a single gold standard that the supply of gold is now more than sufficient to do the work that was once required of both gold and silver.

PROGRAMME OF REPUBLICANS

Prospect of Legislation on the Money Question Is Somewhat Uncertain.

The republican members of the present house of representatives, a majority of whom will serve in the next house, have agreed, with a fair approach to unanimity, on the first step to be taken towards the settlement of the monetary question.

Consequently it has been decided to appoint a committee of 11 members of the present house, who are members-elect of the Forty-sixth congress, to consider monetary legislation and agree on a measure to be submitted to the republican caucus of the next house.

It is to be presumed that the 11 members of the committee will be selected so judiciously that they will represent the views of the republicans of every section of the union—not merely of New York and New England, but of those in the Mississippi valley and Pacific states, and as the committee will not have to submit any measure before December, its members will have ample time in which to discover what the people who sent them to congress do and do not wish to be done.

If the members of the committee will investigate thoroughly they will find that their constituents are in favor of legislation which shall put the maintenance of the gold standard beyond all question, and which shall make it certain that all government and private obligations should be paid in gold or in gold value money.

THE TREATY RATIFIED.

Delay Caused by Obstructionists Precipitates Bloodshed in the Philippines.

The treaty of peace which was ratified by the senate was received by that body from the president January 5, upon the reassembling of congress after the holidays.

As indicated by a letter of the adjutant general, read by the recorder for the information of the court, the scope of the inquiry was limited to the allegations of Gen. Miles before the war commission as to the quality of the army beef "and the matter purporting to have been furnished to the public press by the same official."

Gen. Miles was very slow and careful in his replies to the recorder's questions on this point. He called attention to the fact that in both instances he was credited in the interviews with refusing to answer certain questions and insisted that these refusals should be given due weight in considering the questions to which he did reply.

Gen. Miles in his testimony said his use of the phrase "pretense of experiment" in speaking of army beef was unfortunate. He disclaimed intending any inference of fraud, and said he should have said the refrigerated beef issue was "on the theory of an experiment," and "a very costly one."

Col. Davis—What complaints were made to you as to this beef? Witness—There were no complaints.

Col. Davis—They did use it then? Witness—I didn't say they used it. It was issued and they took it. I saw a great deal of it thrown overboard.

Col. Davis—Have you made any reports on this subject? Witness—Yes, I made three reports.

Col. Davis—But why was it you made no official representation on this subject while you were in the field? Witness—For one reason, that for a long time there was not a sheet of paper in my command.

IT WAS VERY BAD.

Army Officers Give Their Opinion of the Canned Roast Beef Issued to the Soldiers.

Washington, Feb. 21.—The Miles court of inquiry yesterday made a good start in its work. The court was quartered in the old meeting room of the investigating commission, with accommodations for representatives of the press associations and the local papers.

As indicated by a letter of the adjutant general, read by the recorder for the information of the court, the scope of the inquiry was limited to the allegations of Gen. Miles before the war commission as to the quality of the army beef "and the matter purporting to have been furnished to the public press by the same official."

VANITY OF GREATNESS.

One Young Man Who Found Out That He Never Would Be Missed.

"You seemed depressed this evening," said Hamblin, as Flagg, who was generally on pretty good terms with himself, lit his eighth cigarette and then threw it away, after taking two whiffs.

"Yes, I am," was the reply. "There's no use trying to be anybody in this world." "What's gone wrong?" Hamblin urged. "What's gone wrong?" You ought to be ashamed to let yourself be cast down, after the streak of good luck you've had.

"I called on her last evening. I used to call there every week or two, before I started across to the other side. Well, more than three months had elapsed since I had seen her last. Of course, I concluded that my trip was an apology enough for the fact that I had not called lately, so without any ado I began talking about my experiences in Paris. What do you think she said?"

"Oh, I can't guess." "You've been out of the city?" "—Chicago Evening News.

SUCH IS FAME.

A Small Schoolgirl Gets the Hero of Manila Into a Bad Mix Up.

One of the most popular of the young professors in the male high school tells an amusing little story on a small, up-to-date schoolgirl. She went to one of these district schools over which a cousin of the professor presides. It is usual to have visitors at the building now and then, who ask the scholars questions and see that everything is in good shape.

"But," remonstrated the teacher, "you must try, anyhow; you must not sit there idle while the others are doing the best they can. See if you cannot think of something, my dear."

"No use," protested the pupil. "All I know is that Dewey and Corbett fought, and I don't know which whipped, and I don't care either."
