## Life Saved by Swamp-Root. The Great Discovery That Cures Kid-ney and Bladder Troubles.

Statistics prove that more people are brought to the grave by diseases of the kidneys and bladder than by any other

For many years medical science has been trying to discover some remedy that would positively overcome these dangerous troubles.

But not until recently was the discov ery made. Doctor Kilmer, the eminent physician and scientist, after years of study and research, and after test on test that never varied in the grand result, announced the discovery of Swamp-Root, which has proven itself a most wonderful cure for all diseases of the kidneys and bladder.

While Swamp-Root has proven such a remarkable successin curing kidney and bladder diseases, it has also proved equally invaluable in the cure of blood diseases, rheumatism, liver and stomach troubles and in the regulation and cure of all uric acid troubles.

Swamp-Root has been tested in so many ways, in hospital work, in private practice, among the helpless too poor to purchase relief, and has proved so suc-cessful in every case, that a special arrangement has been made by which all readers of this paper, who have not already tried it, may have a sample bottle sent absolutely free by mail. Also a book telling more about Swamp-Root and containing some of the thousands upon thousands of testimonial letters received from men and women who owe their good health, in fact, their very lives, to the wonderful curative properties of Swamp-Root. Besure and mention this paper when sending your address to Dr. Kilmer & Co., Binghamton, N. Y.

This great modern discovery is for sale at most drug-stores in fifty-cent and one-dollar sizes.

## In Ring Parlance.

Miss Fox—Papa, why does a young mar give his fiancee a diamond ring? Mr. Fox—Oh, that's the forfeit he put up to insure a fight.—Jewelers' Weekly.

up to insure a fight.—Jewelers' Weekly.

There is more Catarrh in this section of the country than all other diseases put to gether, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven eatarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in dosea from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. Cheney & Co., Toledo, O. Sold by Druggists, 75c.

## THE WOMEN SAY

f here is No Remedy the Equal of Pe-ru-na in All Their Peculiar Ills.

Miss Susan Wymar.

Miss Susan Wymar, teacher in the Richmond school, Chicago, Ill., writes the following letter to Dr. Hartman re garding Pe-ru-na. She says: "Only those who have suffered with sleepless ness from over-work in the school-room, such as I have, can know what a blessing it is to be able to find relief by spending a couple of dollars for some Pe-ru-na. This has been my experience. A friend in need is a friend indeed. deed, and every bottle of Pe-ru-na I ever bought proved a good friend to me."—Susan Wymar.

Mrs. Margaretha Dauben, 1214 North Superior St., Racine City, Wis., writes: feel so well and good and happy now that pen cannot describe it. Pe-ru-na is everything to me. I feel healthy and well, but if I should be sick I will know what to take. I have taken several bottles of Pe-ru-na for female complaint. I am in the change of life and it

## NESTING ARRANGEMENT.

Made of Pails Can Be Taken Out of Doors, Emptied and Cleaned in a Moment.

At stores where candy is sold, one an buy for a few cents the light, but wooden pails in which broken candy and certain grades of chocolates shipped from the factory. These pails make excellent hens' nests when

NEST FROM AN OLD PAIL

hung from two hooks in the manner shown in the cut.

Such nests can be taken out of doors emptied and cleaned in a moment, and having no corners or open joints, as do boxes, there is no place for vermin to hide about them. This is a special point in favor of the use of such pails as nests, for the ordinary nest is usually a breeding place for these troublesome pests.—Orange Judd Farmer.

## AN ENDLESS WARFARE.

The Farmers' Struggle Against Poultry Pests and Injurious Germs Knows No End.

In all lines of live stock husbandry cleanliness is the one great demand. The war against dirt and hence against bacteria and vermin is a war that will know no end. Let no man suppose that he can cleanse his house and pens and trust them to keep clean. The battle must be fought over and over again and the successful poultryman is the determined fighter. The first campaign must be made against lice and mites.
Whitewashing the pens is supposed to be a great remedy, and without doubt it is a good one, but it is possible for monials. Address F. J. Cheney & Co., Toledo, O. Sold by Druggists, 75c.

of ducks.

Goose eggs require one month for hatching.

Mix the corn meal with milk for the

Boiled peas and beans, fed warm, are xcellent egg foods. Geese and ducks should not be picked

while laying regularly. In selecting the sitters be careful to

secure those that are gentle.

Small eggs are likely to come from

oo much fatness of the hens. The best hatching eggs are those laid n the spring by the mature hens.

One of the easiest ways of keeping a poultry yard clean is to give it a frequent dressing with sand.

It costs about a cont a week up to ten weeks old to feed a chick. Then it should weight two pounds .- St. Louis Republic.

## Back-Furrowing Pays

In plowing clay lands nearly all the advantages of under-draining can be obtained by back-furrowing into narrow beds, and by leaving a strip two or three feet wide between the beds unplowed. It practically does away with the trouble of gullying by heavy rains, as there are two channels instead of one to carry off the water. No per-ceptible difference in growth for yield or crop can be seen in the dead furrows after being put in with modern improved implements, and there is a saving of four furrows in plowing each land or bed—two in the middle of the bed and two at the dead furrow. The great advantage of back-furrowing over level culture when plowing is done in the fall is that very often crops can be sown several weeks earlier, making a fine crop and a good catch of grass, when later sowing would fail.—Prairie Farmer.

## NO LONGER ISOLATED.

Wire-Fence Telephone System Put in Operation by Progressive Western Ranchmen.

The stockmen of Southwestern Kansas and northwestern Texas and Oklahoma are keeping pace with modern improvements and are no longer to be isolated from the rest of the world. A few months ago the ranchmen of Seward county, Kan., met to propose a plan of connecting their ranches by telephone facilities, utilizing the barbwire fences instead of setting poles and stringing wires. It had been demonstrated that a fence wire worked per-fectly for a telephone connection. The scheme was favored by the stockmen, and a local company was formed, with headquarters at Liberal, that being the nearest telegraph point.

Lines have since been constructed and are in operation, extending from Liberal over the whole of Seward, Stevens and Morton counties, Kan., and have reached out into Beaver county, O. T., and Hansford county, Tex. Many of the ranches in this ideal grazing country are situated miles from railroad and telegraph facilities. Some of the owners are compelled to travel 50 miles to reach shipping points. Thus will be quickly seen the great advantage to be derived from this enterprising move. It not only affords them an opportunity to transact business among themselves, but they have ar-ranged to get market quotations daily from the telegraph station. This information is invaluable to the cattle

In addition to the lines now in operation further extensions are to be made. The success of the wire-fence tele-phone first established between Liberal and Brown ranch on Sharp creek, a dis-tance of ten miles, demonstrated the value of the irea, and another line will be started to Beaver, O. T., and one to Hardesty, Tex.

These extensions will require but little outlay of money, nothing but the labor required where fences can be-used. When this cannot be done the surveys follow the streams where the timber is used for poles. This energetic move has awakened a lively interest at the markets. Wichita, which has become a large stock market in recent years by reason of its packing industries, is making an effort to have a branch of the line reach that place. This would put the ranchmen in talking distance with commission firms, to whom they sell stock.

The plan is one of untold advantage to stock owners, and will be pushed until the complete benefits have been

## HOG-SCALDING SWING.

With Its Aid One Man of Ordinary Ability Can Dress a Large Animal Alone.

This hog scalding swing almost explains itself. The two crotched posts, n a, are nine feet long, set firmly in the ground about six feet ayart. The cross piece b must be plenty strong to sup-

HOG SCALDING MADE EASY.

port lever c. A rope d, will be of great assistance. Hook, e, is to slip under gambrel. After hog is scalded on one Hook, e, is to slip under end, swing round to table, f, take hook out of gambrel and stick through low-er jawand scald the other end. Barrel, g, should be kept two-thirds full of water; the one-inch pipe, h, is eight feet long, bent in middle, or two pieces four feet long connected by a six-inch piece with elbows which enter the barrel between the hoops, as shown. Of course the fire boils the water. By my swing I dressed a 300-pound hog alone.-L. L. Glover, in Farm and Home.

During the warmer season, when al-owed to forage for themselves, each fowl gathers several ounces of meat daily. When the supply of grasshop-pers, bugs, flies and worms fails, it may be furnished from the table, the scrap pet or the market. Green food may be furnished in cabbage, vegetables, ap-ples or cut clover. A warm breakfast should be given on cold days and there should be no lack in the supply of drink.

A meat diet with grain and vegetables is essential to the well being of fowls during the cold weather, when worms, bugs and insects are not to be found by the birds, but in summer the fowls can secure such foods for themselves.— American Gardening.

## How to Break a Sitter.

When a hen wishes to sit she is usually fat. If you break her she will lay five or six eggs and become broady again. Let her get rid of her fat. Give her one egg, let her stay on the nest her one egg, let her stay on the nest two weeks, give her plenty of water, feed only once in two days, and then break her up. She will then have lost flesh and when she begins to lay she will keep it up. If you must break her, however, get a coop with a slat floor, siat sides and open everywhere. Let it be raised a foot from the ground. Place be raised a foot from the ground. Place the coop in an exposed location, where she can see everything around her. Being disturbed and not being able to warm her airy nest, she gives up in disgust .-- Farm and Fireside.

## Swallowed his False Teeth,

A man recently swallowed his false teeth and it drove him mad. Stomachs will stand a great deal, but not everything. If yours is weak try Hostetter's Stomach Bitters. It rures indigestion, constipation, kidney and iver troubles, as well as malaria and fever and ague. It is particularly effective in all nervous affections, and is strongly recommended at this season of the year when the system is run-down and most susceptible to disease. All druggists keep it.

It is always easier to recognize a debtor than a creditor.—Ram's Horn.

THE pleasant method and beneficial effects of the well-known remedy, SYRUP OF FIGS. manufactured by the California Fig Syrup Company, illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative,

> CLEANSING THE SYSTEM EFFECTUALLY, DISPELLING COLDS AND HEADACHES, PREVENTING FEVERS, OVERCOMING HABITUAL CONSTIPATION PERMANENTLY.

Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, gently yet promptly, without weakening or irritating them, make it the ideal laxative. In the process of manufacturing figs are used, as they are pleasant to the taste, but

## THE MEDICINAL QUALITIES ARE OBTAINED FROM SENNA AND OTHER AROMATIC PLANTS,

by a method known to the California Fig Syrup Company only. In order to get its beneficial effects, and to avoid imitations, please remember the full name of the Company printed on the front of every package. Consumers of the choicest products of modern commerce purchase at about the same price that others pay for cheap and worthless imitations. To come into universal demand and to be everywhere considered the best of its class, an article must be capable of satisfying the wants and tastes of the best informed purchasers. The California Fig Syrup Company having met with the highest success in the manufacture and sale of its excellent liquid laxative remedy, Syrup or Figs, it has become important to all to have a knowledge of the Company and its product. The California Fig Syrup Company was organized more than fifteen years ago, for the special purpose of manufacturing and selling a laxative remedy which would be more pleasant to the taste and more beneficial in effect than any other known. The great value of the remedy, as a medicinal agent and of the Company's efforts, is attested by the sale of millions of bottles annually, and by the high approval of most eminent physicians. As the true and genuine remedy named Syrup of Figs is manufactured by the California Fig Syrup Company only, the knowledge of that fact

# will assist in avoiding the worthless imitations manufactured by other parties.
