

WOMEN OF THE SOUTH.

Will Honor Winnie Davis by Erecting a Monument to Her Memory at Richmond, Va.

Without solicitation of any kind, and solely through voluntary contributions from those she loved, the memory of Winnie Davis, "the Daughter of the Confederacy," will be honored by the erec-tion of a handsome monument over her grave in Hollywood. It will be the first tribute of the kind ever paid to a southern woman by the women of the south.

This movement was started by the Richmond Chapter of the Daughters of the Confederacy. At first it seemed a difficult undertaking. A great monu-ment to Jefferson Davis was already awaiting the raising of funds for it construction, while a proposed monu-ment to the women of the south had been temporarily abandoned. But the women sent out a circular to confederate organizations, suggesting that came pouring in.

HOME-MADE BROODER.

It Is Easily Managed and Reasonably Sure to Give Satisfaction to All Who Try It.

The brooder here illustrated is cheap, easily made and successful in every way. I have two, and have never lost a chick in them. It is double throughout. chick in them. It is double throughout The lining is ship lap put on cross-ways. The outside is fine flooring put on up and down. The framework is two by by four ripped in two. The floors are four inches apart. The lower one is nailed to the bottom of breader. The upper one can be put brooder. The upper one can be put on slats so as to be easily removed and cleaned.

A is a three glass window, which we purchased, and secured one that would just fit the space.

B is an egress door, hinged and open-lng down, for chicks to pass in or out. C is roof in the form of a door open-

EASILY CONSTRUCTED BROODER.

ing upward, allowing inside to be easily cleaned. D D hinges on roof doors. E E one and one-half feet high; F F Is two feet high; A A is one foot ten inches high. B B is the distance from A A to F F, one foot. This we heated with a common side lamp. Midway be-tween the ends, and against the back wall, cut a circle hole in the upper floor large enough to admit the bowl of the lamp which rests on the bottom floor. Have the tinner make a chimney simihave the timer make a climitely simi-lar to those used on incubator lamps. Now when lamp is in position place a gallon tin can, with top and bottom removed, over it so as to keep the chick from lamp. A piece of stove pipe will do. Do not have it higher than the do. Do not have it higher than the lamp. In top of brooder, close to the roof, hang a piece of tin or sheet iron to throw the heat back to the floor. I used a washboiler cover which just fitted the small space in roof. This gives top heat and prevents leg weakness.

In the back of brooder, at the bottom, bore holes through the two walls, be-tween the two floors, and on each side of the lamp, to give the lamp air, or it will not burn. I left no place in mir-for ventilation. The chicks did not ne it. I have never had more than 100 in at a time, and now that the weather is warmer I leave a space of about one inch under the roof door at night.—Mrs. Mabel Treloar, in Agricultural Epito-mist. HINTS FOR BEEKEEPERS. Tall sections require more honey to fill them. Feeding should begin as soon as warm weather sets in. The average life of a queen bee about two and a half years. Mañy keepers clip the queen's wings In the back of brooder, at the bottom, bore holes through the two walls, be-

Many keepers clip the queen's wings when they hive their swarms.

Old queens may be moderately pro-ductive early in the spring.

Young queens are the most prolific and are less inclined to swarm. Stimulative feeding is the means by

which colonies are made strong. Some queens are better at three years old than others are at two years.

Italian bees are better workers and are more easily controlled than black ones.

Approach a hive of bees from the side or rear, so as not to disturb the bees at work.

WINNIE DAVIS MONUMENT.

bronze statue of Jefferson Davis, to be placed at his grave in Hollywood, and is also designing the Winnie Davis memorial tablet of bronze, to be placed in St. Paul's Episcopal church, in which Mr. Davis received the news of the virtual fall of Richmond. It is the purpose to unveil the monu-

ments and memorial at the annual meeting of the Daughters of the Confederacy next fall. The design for the Winnie Davis monument is a seated angel. It will be carved in Italian marble and mounted on a hammered gran. ite pedestal with a coping in front. The statue measures a little more than seven feet. The granite pedestal is $2\frac{1}{2}$ feet high, $3\frac{1}{2}$ feet wide and $2\frac{1}{2}$ feet deep. The coping is six feet long, two feet wide and fifteen inches high.— Richmond (Va.) Letter.

A Delicious Egg Soun.

The following recipe for egg soup comes well recommended: Put a quart of fresh milk and a teaspoonful of onion juice over the fire in a double boiler. Blend together one tablespoon-ful of butter and a scant tablespoonful of flour: moisten this with a little of the hot milk before stirring it into the whole quantity of boiling milk. Sea-son with salt and pepper. When the mixture has boiled up once, strain into a heated tureen over several well-beaten eggs, stirring constantly as you pour to prevent curdling.

Women on Artists' Juries.

Mme. Demont Breton received 234 cotes at the election of the painters' jury for the Champs Elysee salon, being the first woman honored with a nomination. She was not elected, the persons chosen being MM. Bonnat, Cor-mon, J. P. Laurens, Detaille, Henner, Jules Lefebvre, Benjamin Constant, Bouguereau, Harpignies and Gerome. In 1897 the sculptors not only nominated but elected a woman, Mme. Leon Bertaux.

Tooth Brushes Are Scarce.

One of the western soldiers at Maila writes that he went to a store to ouv a tooth brush, and that the storekeeper took down everything in the shop before he could be made to understand what his customer wanted. After the bresh had been found the soldier learned that its native name was "tapoknos tampulse," and that it was the only one in stock.

swarming is the key to large honey crops.

If moth once gain a footing in the hives the colonies will soon be destroved.

Basswood is said to be the greatest honey producer for the time that it is in bloom.

There is no possible economy in taking from a strong colony to build up a weak one.

Any colony of bees will be capable of turning robbers if proper inducements are offered.

Colonies that are well fed will in crease to more than double the number of those not fed.

Leaving honey about at any time where they can get at it will often start the bees to robbing.

There must be promptness in putting on surplus boxes or sections whenever the hives are crowded.

A large number of extra combs are necessary when extracted honey is the object sought.—St. Louis Republic.

Nest That Is Louse Proof.

The location of the nest has much to do with a good hatch. The best place is a moist cellar. Having selected a suitable place for the nest, dig a hole about one foot deep and one foot across. In the bottom of this hole put some coal ashes and sulphur. Over this foundation make the nest of tobaccu stems, or of the best material you can get. Shape your nest to suit your hen and make a box large enough to cover it, with a hole in the box large enough to admit a good-sized hen, and your the hen will settle on the nest, with no lice to suck her blood.—C. W. Mc Queen, in Farm and Home. If a woman really loves her husband she keeps him holding his tongue out all the discrete to see if there is a coating on it.—

When a farmer waters his stock the lambs get the least of it; when a broker waters his stock it's different.—L. A. W. Bulletin.
