Smith, of Worcester county; for attorney general, Isidor Rayner, of Baltimore; for comptroller, Joshua W. Hering, of Carroll county.

The platform demands the freedom of the press in time of war as well as in peace and the rights of the people to criticize the policy of the administration; declares against a large standing army in time of peace; views with alarm the multiplication of the land of such gigantic, industrial and commercial trusts as stifle competition, threaten popular government, increase the cost of living and curtail the individual rights of the people, and favor vigorous measures by the state and by congress to repress this great and growing evil.

JOHN PAUL JONES.

No One Can Tell Where the Bones of the Famous Naval Hero Are Deposited.

Inquiry was recently made at the state department in regard to the grave of John Paul Jones, the great naval hero of revolutionary days, who died in Paris July 18, 1792.

The secretary of state recently addressed a letter to Henry Vignaud, of the United States embassy in Paris,

JOHN PAUL JONES. (One of the Greatest Naval Heroes of the World.)

asking whether the grave of John Paul Jones in Paris is known and marked. He has received a reply from Mr. Vignaud saying that, although he has made earnest and frequent inquiries of the city authorities in regard to the matter, he has been unable to discover the whereabouts of the grave.

John Paul Jones was one of the greatest of the naval heroes of the world. His name was really not Jones at all, but John Paul, and much as Rudyard Kipling has abused him, he was really not an American, but a born Scotsman.

Jones' operations were conducted from France against England, and two of his most notable adventures were his attempts to abduct the earl of Selkirk and his action with the Serapis and Scarborough fleet of English ships in August, 1779.

After his victory Jones was received in France with the highest honors. The king gave him a cross and a sword, and congress a vote of thanks and the command of the new frigate America.

THE COBRA'S POISON.

To Be Used Extensively as a Cure for Leprosy.

Former Army Surgeon Explains Why the New Remedy is Entitled to Consideration—Strange Cures in India.

If Dr. Thomas J. Biggs, a former surgeon of the United States army, is on the right track, the new century will rejoice to see the dread scourge of leprosy, if not totally removed from among the host of ills to which flesh is heir, at least reduced to a minimum.

"It was Dr. Bardon, of Turin, who first discovered the bacillus of leprosy, a pencil-shaped microbe resembling that of tuberculosis, but having one end thicker than the other, and enclosed in a sheath or cell," said Dr. Biggs, when asked about his plans.

"In India a maimed man is an outcast; and so dreaded is leprosy that, according to Hindoo law and more potent custom among the fanatical hill tribes, a man who has leprosy in the incipient stages has the honorable alternative of suffering himself to be buried alive and ascending to the realms of the gods, where he is purified and

survives in everlasting bliss, or he can suffer himself to be bitten by the deadly groove-fanged Naji tripudians, or cobra of fame. This is done with the hope that on recovery from the venom of the snake the leprosy signs will disappear.

"But what was thought to be a means of suicide among the savage hill tribes of India turned out to be a curious and noteworthy phenomenon. Three out of five lepers recovered from the bite, and, strange to relate, from the dreaded leprosy, too. It is demonstrable on scientific grounds. The cobra venom is a subtle fluid to which all animal life succumbs. It begins immediately to destroy every vital function, and so indestructible is it that it may be boiled, frozen, mixed with corrosives, diluted or taken from the hundredth inoculation, yet it survives all.

"The treatment is far from infallible, but, with proper food, care and exercise of professional judgment, there is no reason why the standard should not show 90 per cent of successes, if the leprosy patients can be discovered and treated in the incipient stages. Those upon whom I have operated with the serum of deadly serpents have been too far advanced in the disease to derive permanent benefit; but several new cases have been reported to me in various parts of the country, and I shall, either personally or through my assistants, proceed immediately with these experiments.
