

HYGIENIC MILKER.

Milk Is Kept Pure and Free from Contamination.

Doctors, scientists and agricultural experts are all very much concerned, at the present time, about the contamination of milk and the serious consequences that are apt to result from it. In the up-to-date dairy every effort is made to keep the milk from being contaminated by stable dirt or foreign matter which may adhere to the cow's teats or flanks, or which may be floating around in the air in the stable. Among the precautions sug-gested are mechanical milkers, but

NEW MILKING MACHINE.

these have not come into extensive use although, in one form or another, there are isolated examples of their use in dairies in different parts of the world. The illustration here presented is a suggestion along this line, and represents the idea of John C. Duigan, of Melbourne, Victoria. It comprises teat cups, with finger loops for the thumb and finger arranged longitudinally on opposite sides, which prevent the milker's hands from coming in contact with the teats, and thus trans-ferring dirt or disease germs from one animal to another. The milk is conducted to the milk pail through rubber tubes, and, as the pail is inclosed, there is no possible contamination there; so that, provided the milk is from a good, healthy cow, the dairy-man is assured of milk as pure and free from contamination as it is possible to get.—Cincinnati Commercial Tribune.

NOT GOOD FOR COWS.

The Feeding of Musty Hay Injure the Milk Flavor and Is the Cause of Poor Butter,

Do not feed musty hay to dairy cows nor in fact any kind of fodder that is musty. Some believe that this mustiness will not pass through into milk, and it may be so, but we are suspicious of the truth of the asser-tion. It is a fact that there is a difference in the flavor of butter made on June grass and the butter made in the winter when the cows are fed on dry hay. If this difference in feed makes any difference in flavor, why may it not make a good deal of dif-ference if the feed be particularly Moldy feed is a bad thing to have around in any case and should be thrown out. Using it as cow bedding is likely to make the matter worse, for the whole stable will be scented with it, and in the morning when the milk is drawn it will certainly be tainted and this taint will grow as the cream ripens. It is not depend on airing the barn enough in the morning to get the smell out. This would be seldom done at all, and where done it would generally be done in a very imperfect manner. The presenc of spoiled feed is very often the cause of poor butter .- Farmers' Review,

Fallacy of Changing Methods.

The farmers are now reaping the results of neglecting the dairy cows. They thought when the low price of butter came on a few years ago that it would always continue and so be-came careless of the breeding and feeding of their dairy cows. Some of the farmers bred their cows to beef bulls and got half-beef calves, which they let run with the cows, arguing they might as well save the cost of a hired milker and get a good beef at the same time. Now that butter is very high they are unable to take advantage of the rise. This is always the fate of those that are continually changing their methods. - Farmers'

Lime in Wood Ashes.

When wood ashes are applied lime is unnecessary, as every 100 pounds of wood ashes contain about 40 pounds of lime. Ashes vary greatly, as they are produced from different sources, easily absorb moisture, and their composition cannot be determined without careful examination. The most valuable ingredient in ashes is potash, the propor-tion being about six pounds to every 100 of wood ashes. Ashes also contain about two per cent. of phosphoric acid and about three per cent. of magnesia. Coal ashes are of but little value. Wood ashes give excellent results on all kinds of crops, especially grass.

Equal in Importance.

"We regard good roads," says the Southern Reporter, "as being equal in importance to good schools."

Strong colonies sometimes become depleted in number with not enough left to maintain sufficient warmth to hatch the eggs. This is because no young bees have been hatched.

ROADS ABOUT MANILA

Are Reported to Be About as Own United States.

When the troops first came to Ma nila the Pasay road was full of mud-holes and it was almost impossible to move the troops from Camp Dewey to

Fort Malate in the rainy season.

When the dry season came and the sun could penetrate between the hedges of bamboo into the narrow lane the road was better, but still the wagons went splashing through the mud. One hole in particular grew deeper and broader and rougher with the wear of the wheels, but no one ever raised a

hand to fill it up.

The Fourth cavalry was brought in from the line during the latter part of August. Capt. Hugh J. McGrath was in command of the three troops stationed at the barracks, and it was he who first conceived the good-roads idea and obtained permission to hire a gang of Chinese coolies to do the work. The work began at old Fort Malate, and the chinos were quartered along the stone walls of the fort and ate their meals there until the road had crept along past the quarters. Then they moved their half roofs to the south and were ready for another lap. Bam-boo poles were carried by the chinos to the places where they were needed, and the bottom of the road was first made on these bamboo poles. Over them was piled stone and clay, and then a surface of sand from the beach was laid on. Afterward a heavy roller was dragged up and down until all was

Shortly after the road was built to the trenches at Pasav the cavalry was ordered south to join Gen. Schwan on his raid of the southern towns, and it was succeeded by the Thirtieth volun-

Under Maj. Hartigan the road build-ing has gone far toward San Pedro Macati. And if the volunteers are left there long enough there is reason to believe that the highway will be finished.

Good roads are badly needed in this island. Probably the worst road in all the territory through which the wagons have to go is from Mololos to Quingua. The distance is about five miles, But it takes the better part of a day to get through. But from Quingua to Baliuag there is a good road that has been in existence for many years. The value of it is known to the quarter-masters and the commissaries who are compelled to take supplies and provisions over it. Up to date the engineering department has not built any roads.—Harry A. Armstrong, in Chicago Daily Record.

FOR EARLY CHICKENS.

How to Fit Up a Room for Them in the Barn, Stable Loft or in an Outbuilding.

In a barn or stable loft one can fit up a warm and sunny room for early chicks, as shown in the cut. Low windows are put in under the eaves, and

CHICKEN ROOM UNDER EAVES.

light studding is set up as suggested. being nailed to the rafters for the roof of the chicken room. Simply lay boards in place for the top, and fill in the space above with hay. Board up in front, leaving openings for doors. Cover the floor with chaff, and put the hens and their chicks in here during February much better here than on the cold, wet ground.—Orange Judd Farmer

THE DAIRY UTENSILS.

In private dairies it would be well to emulate the methods in vogue in milk shipping stations and creameries. Never neglect the care of the churn. Slight negligence in this direction may cost you the price of many a pound of

butter. Nothing will penetrate the crevices of a churn like hot water, and it needs to be at a boiling temperature when applied.

After a churn has been some time out of use it should be thoroughly scoured with salt and repeatedly scalded before being again employed.

If it is important to keep butter tools scrupulously clean, how much more important is it to be rigorous in the treatment of milk utensils.

Rigid drying of dairy utensils by both an absorbent cloth and heat will prove satisfactory. I have known a new \$25 curd mill to be so eroded by rust in one season as to be nearly ruined, while by proper care it could have been made to run ten years without repair.

There is nothing gained in patching up old utensils about a home dairy or manufactory. Like farming tools, the apparatus of a creamery or cheese factory generally deteriorates more quickly in value from neglect than from practical use in its especial sphere.—American Cultivator.

Land for Strawberry Beds.

The land for the new strawberry beds should be prepared as soon as it can be done. Plow deep, harrow, apply the fertilizer broadcast, and then again harrow the soil fine. This will admit warmth and stimulate growth of early weeds, which can be destroyed with the harrow as soon as they are pear, with the result of having the plat fairly free of weeds when the young runners are transplanted.

Nothing hobbles the muscles and unfits for work like

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases of of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Deafness Cannot Be Cure

He Fell Into the Trap.

Wife—Did you mail that letter I gave you his morning? Husband—Of course, I did. "How provoking! I wanted to add a post-

scrip."
(Producing the letter)—"Well, here it is.
Why didn't you tell me that in the first
place?"—Chicago Evening News.

You Can Get Allen's Foot-Ease FREE. Write to-day to Allen S. Olmsted, Leroy, N. Y., for a FREE sample of Allen's Foot-Ease, a powder to shake into your shoes. It cures chilblains, sweating, damp, swollen, aching feet. It makes New or tight shoes easy. A certain cure for Corns and Bunions. All druggists and shoestores sell it. 25c.

At the Front.

He was a newspaper man. "Late war news kept me downtown." he stammered, as he entered the house at 5:30 a.m. "Humph!" replied his wife. "Well, we'll make a little more war news right here for a late edition." And the battle was on.—Philadelphia North American.

To Cure a Cold in One Day Take Laxative Bromo Quinine Tablets. All druggists refund money if it fails to cure. 25c.

"Yes, he brought out his history of the regiment for private circulation." "Indeed. That's strange." "I don't think so. Every private in the regiment bought a copy."—Cleveland Plain Dealer.

Lane's Family Medicine.

Moves the bowels each day. In order to be healthy this is necessary. Acts gently on the liver and kidneys. Cures sick headache. Price 25 and 50c.

Growells (angrily)—"You know that a fool can ask questions that a wise man can't answer, don't you?" Howells—"I've heard so, but I never knew it until now."—Boston

I could not get along without Piso's Cure for Consumption. It always cures.—Mrs. E. C. Moulton, Needham, Mass., Oct. 22, '94.

Unrequited love must be a species of heart silure.—Chicago Daily News.

The best household jewel is a good cook.
Chicago Daily News.

An Ohio widow refused to marry a man because he were a wig, although he was a millionaire. Her excuse was that in case of a family row there would be no fun in snatching him bald-headed.—Chicago Daily News.

Hoax—"Klumsy is very fond of horses, isn't he?" Joax—"If he is, it's something new." Hoax—"Well, I saw him out riding the other day, and he had both arms around the horse's neck."—Philadelphia Record.

Says a physician: "All the cosmetics in the world will not beautify the face if the mind is disturbed." This explains why the dude is a thing of beauty—he has no mind to disturb.—Chicago Daily News.

"The last chapter of my book surprised you, didn't it?" said the young author. "Happier ending than you expected, eh?" "Well," replied the long-suffering friend, "I certainly felt a sense of relief when I read it."—N. O. Times Democrat.

When little Ethel was asked if she were going to Edith's party she said: "I don't know. I asked mamma once, and she said 'No!" But then, I haven't asked her a good many times yet."—Indianapolis Press.

Mr. Hamm (the eminent tragedian)—
"Yes, we opened our new play on the first
of January." Friend—"And did you have
a long run," Hamm—"Well, no, we didn't
have a long run, but after the second performance we had a long walk—all the way
from Chicago to Philadelphia."—Philadelphia Inquirer.

"I never was glad for this impediment in my speech but once," said the man from Dearborn, who was in to see the big parade. "When was that?" "Fe-fe-fellow asked me h-h-how much I would take for a-a horse, and while I-I-I was t-trying to tell him s-six-ty dollars, he offered me a hundred."—Woman's Journal.

LABASTINE is the original and only durable wall coating, entirely different from all kal-somines. Ready for use in white or fourteen beautiful tints by adding cold water.

ADIES naturally prefer ALA-BASTINE for walls and celi-ings, because it is pure, clean, durable. Put up in dry pow-dered form, in five-pound pack-ages, with full directions.

LL kalsomines are cheap, temporary preparations made from whiting, chalks, clays, etc., and stuck on walls with decaying animal glue. ALABASTINE is not a kalsomine.

EWARE of the dealer who says he can sell you the "same thing" as ALABASTINE or "something just as good." He is either not posted or is trying to deceive you.

ND IN OFFERING something he has bought cheap and tries to sell on ALABASTINE'S de-mands, he may not realize the damage you will suffer by a kalsomine on your walls. ENSIBLE dealers will not buy a lawsuit. Dealers risk one by seiling and consumers by using infringement. Alabastine Co. own right to make wall coat-ing to mix with cold water.

HE INTERIOR WALLS of every church and school should be coated only with pure, durable ALABASTINE. It safeguards health. Hundreds of tons used yearly for this work.

N BUYING ALABASTINE, customers should avoid getting cheap kalsomines under different names. Insist on having our goods in packages and properly labeled.

UISANCE of wall paper is ob-viated by ALABASTINE. It can be used on plastered walls, wood ceilings, brick or can-vas. A child can brush it on. It does not rub or scale off. STABLISHED in favor. Shun all imitations. Ask paint dealer or druggist for tint card. Write us for interesting booklet, free, ALABASTINE CO., Grand Rapids, Mich.
