for the people, AUL DENTEED FITO Editor Press: -I read with interest, an article in the last issue of the PRESS headed "In-crease Home Dividends," but the writer neglected to tell us how to begin in

order to obtain. If "the age of miracles has gone by" then he does not mean the acceptation or administering of the Living Water, or repentence unto salvation to be the balm of healing for our wounds, for we understand that it requires a miracle to make a man "a new creature." "Good appetite, steady nerves, social pleasures, domestic joys, congeniality," &c., are tributaries to betterment in ones life and being physically and morally, also a moral person may have these attri-butes and many others, yet his joys may not be full. But we believe the author of that excellent article has something more conclusive to relate to us on the subject, telling us how to acquire this dividend "unmeasured in

value." We are anxious to hear it. Den

The Star Course.

The canvass for the sale of course tickets for the Peoples' Popular Star Course has begun. It is hoped to interest every family in the community in the enterprise. No better investment could be made. For an outlay of \$1 50 you have the pleasure of five firstclass entertainments, such as are usually only enjoyed by people living in the cities. At least three hundred of these tickets should be sold to insure the financial success of the undertaking and to give the ladies a narrow margin of profit for their work.

Subscribe promptly, subscribe for as many tickets as you think you will need, for unless adequate encouragement is given, the effort must end in disappointment and failure. Examine the testimonials the ladies carry with them and you will be convinced of the excellence of all the attractions. This is a rare opportunity. It must not be forfeited. Lend a hand and help to make it a conspicuous success.

Thank You, Mr. Cochran.

With his customery generosity Hon. J. W. Cochran made a prompt response to the appeal of the ladies of the Chamber of Commerce, sending a check for twenty-five dollars towards the purchase of a town clock to be placed in the Court House His letter is characteristic of our genial, large hearted friend, and runs as follows:-

DEAR LADIES:-

DEAR LADIES:-Yours received. Glad to know you are trying to keep up with the times). Yon have caught me a little short on charity just now. I im to give just about so much every year to church and charity. This year, however, I have given the Episcopal Church at Callas, Maine, my boyhood home, \$2,000 00 to repair their church, and that overdraws my charity account. Not-withstanding the fact that this account is over-drawn. I will enclose you a check for \$25.06, it will help a little. Hope you will get agood lock, one that will strike loud enough so that the boys and girls will know when 9 o'clock comes, as that, I believe, is the regulation hour for retiring. Destructive Forest Fires.

A destructive forest fire started on Fishing Creek on Tuesday afternoon, and they are considered the forerunners caused by a spark from Hall & Kaul's railroad engine. Fishing Creek is situated about ten miles from Emporium and is known by some people as Bobby Run. Before assistance could reach the scene of the conflagration the fire got into the lumbering operations of Hall & Kaul, located in this county. and consumed about \$20,000 worth of property, including 5,000 cords of bark. A large force of men, numbering two hundred, fought the fire all day and night and have it under control. Howard & Company of Emporium, have had every available man out fighting to save their property, located on the south and east of the operations of Hall & Kaul. C. B. Howard & Company lost logs valued a \$2,000, covered by insurance. Frank Craven, Frank Lockwood and other jobbers are heavy suffers, their camps being located in heart of the new operations. Wednesday afternoon extensive fires were raging in the direction of Salt Run and Cauley Run, in the pine and hem-

forests operated by F. H. & C. W. School Board.

"On the Beach of Nome." July 10, 1900.

Fenton is going to start for Nome at 12 o'clock to-night and is now taking a snoose, and I am sitting on my BED emergency, as was fully demonstrated with the Homewood Athletic Club, and killing time so I can call him. I just last week when the Flyer met with a a foul tip swerved the ball from its got through baking biscuits, and you can tell Lottie they are simply immense. and it struck the voung man over the I have developed into a first-class heart with full force. Ward was stag- cook. We are living high; have everything desirable to eat and plenty of it. Many people come up this far and get discouraged and sell out cheap.

We bought from one fellow for \$10.00, a layout that would have cost \$50.00 in Nome. We are one-half mile from Cripple creek and about 15 miles from Nome; have been here three week now, and I think we have shoveled enough dirt to make a hole as large as the Court House there We have to go down 5 to 7 feet to get the pay dirt and it's nothing extra at that. This beach has been ripped up for 30 miles. It was done last summer by the Dawson men. There are some spots next to the Tundra like which we are working-too hard work to get at and were left. We found four Dawson men working here, and presume they took a liking to us as they told us to try our luck here before some one else took the ground, as it was pretty good. They have been very kind to us by showing us all sorts of things which a green horn would be simply out of it did he not know. If we had the goldbearing sand a foot or two from the top we could make good money, but the depth necessitates time, and I might say a *little hard work* to get the dirt. Last week we needed out 4 or the home it is not safe to be without it. dirt. Last week we rocked out 4 oz. and the week before about the same. An ounce is figured here at \$16.00 but Seattle \$18.00. We are in hopes of striking something rich in the hole we are now working. Any way we are doing a whole lot better than 15,000 other fellows. Thousands of people travel up and down here every day and the general report is that there are 25,000 people in Nome who have never made a move to see what they could do. One of our Dawson friends struck it rich Thursday-Friday and Saturday he rocked out \$425.00. By digging a little off the top you can hold it, otherwise any one can dig

right up to you and cut you off. The stories about the richness of the beach here were true enough, but the "half had not been told"-of the great throng of people who visited here last and got the cream of it. We will be through here in about three weeks. then we move north. We are both as healthy as bucks, but oh! how sore and stiff.

The weather is simply fine, having rained only three days, the rest of the time, excepting the 4th and two other days which were hot, it has been cool and clear.

I don't imagine, Lloyd, this has interested you much, but now I will tell you something which may. If you were here you would never have to go to bed, and could play all the time as it does not get dark here at this time of year. How would you like that for high? and you could eatch millions of fish every evening. When the tide comes in about 7 o'clock it deposits on

the beach hundreds upon hundrods of
