It has been suggested that designs for the Negro building be invited from architects throughout the United States, it being the intention of the managers and of Mr. Washington that the department shall be entirely the work of the colored man.

In the production of common watch-glasses the glass is blown into a sphere about a meter in diameter sufficient material being taken to give the desired thickness, as the case may be. Discs are then cut out from this sphere with the aid of a pair of compasses, having a diamond at the extremity of one leg. There is a knack in detaching the disc after it has been cut. A good workman will, it is said, cut 6,000 glasses in a

There is a market for spiders. The insects are sold by the hundreds, the prices ranging from 50 cents to 75 cents, and the buyers are small firms of wine merchants. These merchants stock their cellars with new, freshly labeled wine, sprinkle dust upon the bins and admit the spiders, who weave their webs from cork to cork. The cobwebs naturally lead the customers to believe that the wine has been stored for years, and higher prices are obtained.

it any further and I am waiting to see what the next move will be on the checker-board. There was a conference in Chicago recently of all of the head chiefs of the opposition, and the New York people are anxiously awaiting to know what will be the issue when Mr. Bryan comes east. He has been summoned there by his emperor, Dick Croker, and he will be told that he must not talk free silver in New York. I have seen in the newspapers, and I congratulate the so-called democratic party that they will be spared the time and expense of selecting a candidate every time. American Bankers Discern Danger to Securities.

President Hill of the Association Discusses National Laws and the Necessity of a Gold Standard.

veloped at the first day's session of the American Bankers' association, which held its annual meeting at Richmond, Va., Tuesday, October 2 was that there is still a lurking danger of this nation being placed on a silver standard. President Hill in his annual address sounded this warning

"But we need more than this knowledge of these people, their countries, commerce and laws, if we are to dominate their trade and be their bankers. To describings we need a currency of stable

merce and laws, if we are to dominate their trade and be their bankers. To do these things we need a currency of stable value. No one will buy drafts on us or deposit their money with us if these drafts and their credits represent doubtful and changing values while a competitor nation offers a currency which does not shrink and is measured at all times by an unchanging standard.

"It is no answer to say that payment in gold, if that is the standard desired, may be secured by private contract. The very fact that it requires a special contract to secure it is a declaration that the general law does not afford the protection desired. But, furthermore, it is not, as a practical proposition, possible to entirely safeguard onesself against the uncertainties of variable currency through private contracts. The evils at home of such currency are bad enough, but in foreign commerce they are worse.

"It think that all members of this association will agree with me that a variable standard of value is to be deplored and avoided if possible. Furthermore, few dispute the proposition that gold is the most unvarying money standard, though some contend it is not the only or best standard to be had.

"Mr. Bryan says he first desires to preserve 'greenbacks' from legislative destruction, and that he will then consider whether they should ever be paid, and if so, how.

"There still remains unfunded into these two per cent. bonds about \$550,000,000 of the \$\$39,000,000 that may be exchanged for two two per cent. bonds about \$550,000,000 of the \$539,000,000 that may be exchanged for two per cent. gold bonds. Having provided for the possible issue of \$539,000,000 of gold bonds, common prudence demanded that our gold reserve should be strengthened, and this the act has done. But it falls far short of establishing the gold standard in this country, and does not secure against the policy of a president or a secretary of the treasury hostile to gold.

the policy of a president or a secretary of the treasury hostile to gold.

"The passage of this act means, in my judgment, one thing we should realize if we would understand the sentiment of this country on the question of currency legislation, and that is that there is no hope in the near future, if at all, in the lifetime of this generation, of any elaborate currency enactment along the lines of the Baltimore plan or any other which contemplated the issue of money by the banks.

"Before we can hope for any legislation of that kind the people at large, the masses, must be made to understand the necessity of it and the justice and wisdom of its specific provisions, and I care not how the value of this banks money may be secured, or how fair may be the compensation paid by the banks for the privilege, it will be difficult work and take a long time to persuade the people that the bankers are not getting an undue advantage and profit through their right to issue money."
