#### Wine Making in Portugal.

In great emergency when all the men are demanded in the vineyards, women are called to assist in wine treading. Our correspondent saw young women wear-ing their own garments which they skilfully gather up around them until they assume the biggest and most abbreviated of Dutchman's "britchen" costumes, while in the

The Port Wine from Speer's Vineyards beats the world for its valuable medicinal qualities. None put on the market now, until nine years old. Weakly persons, Invalids, Females, and Aged persons, should always have a bottle in the house. If properly used it will restore health and prolong life. #### Notes and News

It requires twenty million pins a day to meet the needs of the American people. The question where they all go to, is often asked, but a pin which falls to the ground probably rusts to nothingness in a few months.

An optician says that spectacles and eye glasses must be washed periodically with soap and water and a brush, thoroughly scoured in fact, for a film accu mulates which can not be wiped off.

More than 20 per cent. of the men discharged from the service of the New York Central Railroad Company twenty years ago were dropped from the rolls for drunkenness. Now, however, with 20,000 in the employ of the company, less than one per cent. of those annually discharged owe the loss of their situations to over-indulgence in liquor.

It is incontestable that the intellect of our country is fast being represented by our daughters. The last report of the Superintendent of Public Instruction of Pennsylvania is significant. It shows the number of high school graduates in this state for the year 1899 to have been 3,476, of which 2,122 were girls-or nearly twice as many girls as boys who pursue the public high school course. The majority of teachers in the state are women.

The Lawrenceville Herald says a Harrison Valley woman died recently under peculiar circumstances. She had gone with her husband to have some teeth drawn and the doctor gave her a small dose of chloroform, at the request of her husband and herself, and she lived but a few minutes. Unknown to the physician she had taken an opiate just before getting into the dentist's chair, and this with the chloroform was undoubtedly the cause of her

A watch without hands is the latest novelty. It is of ordinary size, and devoid of the usual hands and dial. In the center are two small spaces for figures, the upper for hours and the lower for minutes. These change at proper intervals, presenting the correct time as the railroad man gives it-10:42 or 6:30, not "18 minutes of 11" or "halfpast 6," in the slovenly civilian style. A second hand makes fractions for the exact man. This watch is guaranteed for seven years, and costs only \$11 in Paris.

In Spain the infant's face is swept with a pine bough to bring it luck.

Garlic, salt, bread and steak are put into the cradle of a new born baby in Holland.

a small bit of mud, steeped in hot water, prepared by previous charms, is stuck on its forehead.

At the birth of a child in Lower Brittany the neighboring women take it in charge, wash it, crack its joints and rub its head with oil to solder the cranium bones. It is then wrapped in a tight bundle and its lips are anointed with brandy to make it a full Breton.

In the Vosges peasant children born at the new moon are supposed to have tongues better hung than others, while those born at the last quarter are supposed to have less tongue but better reasoning powers. A daughter born during the waning moon is always precocious.
