Close Call for LaBar's Furniture Store. Last Friday about noon, Geo. J. LaBar, while sitting in his office, was attracted by a roaring noise emanating from the work shop in the rear portion of his large two story brick furniture store. Upon investigation he discovered the east side wall of the work room in flames, extending to the second floor and crossing to the west side. By promptly turning on the hose and giving the alarm the fire was soon subdued without injuring or wetting the furniture. Nevertheless it was a close shave, the fire having caught the packing in the ventilation holes in the foundation and passing up between the brick wall and studding, it was hard to get at. The damage was slight.

Letter to C. B. Howard Co. Emporium, Pa. Dear Sirs: What is lumber worth? "Depends on the lumber," you say—"what sort do you want?" "That's how some people talk about paint. They ask: "What'll you paint my house for?"

The Yankee answer is: "How do you want it painted? One coat? two coats? three coats? first-class or cheap?" The proper answer is: "I want the best paint put on as it ought to be."

That's the Devotee; but the usual answer is: "I want a good job; but I want it cheap." Which means: I want you to paint it for nothing. I want to be fooled.

Lead and oil is the costliest paint there is; not the best; it used to be best. Devotee is best, since zinc came in: Devotee lead and zinc.

Zinc toughens the lead and doubles its wear. Zinc costs no more than lead; and we grind by machinery. We have no patent on zinc; but nobody else is treating it right. Devotee is your paint.
