Send one person from the room and then agree upon what he when you call nim back. This should be some simple act, and yet one that he would not be likely to think of, ne would not be likely to think of, say, for example, to look at himself in the mirror; to bow to a certain player; to take a player by the hand and lead her or him to the middle of the room, or to take a sofa pillow and put it behind a certain player's back.

Having settled what he is to do, you summon him back into the room by music arranged for the occasion. The music is to be made by tapping some metal object with a key. The best thing to use is a poker, from which low or loud notes may be brought at will.

As the player is to be guided by the music in the performance of his task, the musician must keep close watch on him and give him warning. When he begins to do anything like Medica which equals Lydia E. Pink-

Let us suppose, for example, that he is to take a sofa pillow and put it behind a certain player's back. As he enters the room the music is making a great clatter, and this tends to keep him from collecting his thoughts, as it is intended to do. Presently he walks toward the sofa where the pillow is lying, and the music becomes soft. This tells him that he is on the right track. He touches a chair and the music becomes loud, which tells him that a chair has no part in his task. He touches the sofa and the music grows soft, and when he touches the pillow it ceases for a moment and then begins again, very soft.

He now knows he is to do something with the pillow, but what? He stands and holds it—wrong! He puts it on the floor and sits on it—very loud music! Then he throws it down before some player, but the music is still loud. Then it occurs to him that
