The Grand Duke Paul of Russia is so tall that no hotel bed is long enough for his comfort, and he has one built in sections, which he carries with his luggage everywhere. The bed is put up by a special mechanic, under the superintendence of the royal valet, wherever the grand duke goes.

General Emilio Pallavicini, who commanded the expedition that wounded and captured Garibaldi at Aspromonte, is dead at the age of 77 years. He served as a lieutenant of Bersaglieri in the Crimea, fought at the battle of San Martino in 1859 and in the later wars for the liberation of Italy.

There are no deformed or crippled Chinamen. If a child is born deform-ed it is at once made away with. You may travel all over China and never see a maimed native. When a serious accident befalls one of them he is likewise put to death. This is part of their religion, to which they adhere closely.

J. A. Howells, a brother of William Dean Howells, still edits the paper, the Ashtabula Sentinel, upon which the novelist worked when a boy. Mr. Howells says: "I was born in the room next to the one in which my father worked on the St. Clairsville, O., Gazette, and I have never been much further from a printing office since.'

The two biggest fire engines in the world are in Liverpool, England. These are the most powerful fire en-gines known, throwing 1,800 gallons of water a minute and a jet 140 feet high. The force with which the water is ejected from them may be estimated from the fact that the jet was "warranted to kill a man at 350 feet."

The three keepers of a light-house in England have been fined \$10 for peaching, by spreading nets to catch the birds attracted by the reflectors of the lantern. It was stated during the hearing of the case that no fewer than 5,914 birds were captured between October 10 and 14, the majority being larks, thrushes and

The direction taken by Polar currents is now being investigated by means of specially constructed casks set adrift in the ice. Two years ago a number of these were placed in the a number of these were placed in the floes to the northward of Bering Strait, and this year some 15 more have been set adrift on the north of the East Siberian coast. It is hoped that in about four years some of these casks will eventually be found on the opposite side of the Arctic basin.

An experiment in marine fog signaling is shortly to be carried out off Egg Rock. A large bell is to be fixed below a buoy, so as to be rung fifty feet under water. It will be worked by electricity from the Egg Rock light station, so that the operator island can sound it when required. The theory of mariners is that a bell ring-ing under water is heard at a much greater distance by sailors out at sea than when it is rung while suspended

A bottle cleaning machine is one of the latest labor-saving devices. Bottles are run backward and forward automatically in a "bath" of chemical solution, which cleanses them of dregs, labels and tinfoil. They are automatically placed on a dryer, and aiterward delivered to a part of the apparatus called the conveyor. They are then ready for a dip into clean water. A correspondent of the Baltimore Sun says that West Virginia is rapidly becoming more and more the mec ca of the Negroes of the South. The climate of that state, as a whole, is congenial to this race, and the great coal and coking industries in operation in almost every county, together with the extensive railroad construc tion being carried on, furnish ready as well as lucrative employment for Negro laborers, of whom 15,000 are employed in the mines.

The Italian government has decided to purchase the Borghesi villa, in Rome, with its castao, museum and statuary and gallery of pictures. The intention is to use it as a public museum for the magnificent art collections belonging to the state. The Ludiviso museum of statuary, lately purchased by the government, and now exhibited but to poor advantage in the small rooms at the Museo Nationale in the baths of Diocletian, will be at once moved to the villa.

Comprehensive Summary of Memo-rial Address Delivered by Invitation of Congress-Martyred President Will Rank with the Greatest

For the third time the congress of the United States is assembled to commemorate the lite and the death of a president sam by the hand of an assassin. The attention of the future historian will be attracted to the features which reappear with starting sameness in all three of these awful crimes: the uselessness, the utter lack of consequence of the act; the obscurity, the insignificance of the criminal; the biamelessness—so far as in our sphere of existence the best of men may be held biameless—of the victim. Not one of our murdered presidents had an enemy in the world; they were all or such preeminent purity of life that no pretext could be given for the attack of passional crime; they were all men of democratic instincts who could never have offended the most jealous advocates of equality; they were of kindiy and generous nature, to whom wrong or injustice was impossible; of moderate fortune, whose slender means no-body could envy. They were men of austere virtue, of tender heart, of eminent abilities, which they had devoted with single minds to the good of the republic. If ever men walked before God and man without biame, it was these three rulers of our people. The only temptation to attack their lives offered was their gentle radions—to eyes hating the light that was offense enough.

His face was cast in a classic mold; you see faces like it in antique marble in the galieries of the Vatican and in the portraits of the great cardinal-statesmen of Italy; his voice was the voice of the perfect orator-ringing, vibrating, persuading by its very sound, by its accent of sincere conviction. So prudent and so guarded were all his utterances, so lofty his courtesy, that he never embarrassed his friends, and never offended his opponents. For several months before the republican national convention met in 1896, it was evident to all who had eyes to see that Mr. McKinley was the only probable candidate of his party. Other names were mentioned, of the highest rank in ability, character and popularity; they were supported by powerful combinations; but the nomination of McKinley as against the field was inevitable.

Patriotism, which had should be addeducted the strength of the court of the sacrifice of the court of the sacrifice was too great; the young men of the country were ready.

McKinley as a Soldier.

At 17 years of age William McKinley heard this summons of his country. He was the sort of youth to whom a military life in ordinary times would possess no attracted the sort of youth to whom a military life in ordinary times would possess no attractions. His nature was far different from that of the ordinary soldier. He had other derams of life, its prizes and pleasures, than that of marches and battles. But, to his mind there was no choice or question.

He enlisted as a private; he learned to obey. His serious, sensible ways, his prompt, alert efficiency soon attracted the attention of his superiors. He was sfaithful in little things they gave him more and more to do. He was untiring in camp in fight. He left the army with field rank when the war ended, brevetted by Prezident Lincoln for gallantry in battle, Speaking of the close of the war, Mr. Hay said: A conclusion had been reached and it is to the everlasting honor of both sides that they each knew when they had compromise, but the paim of common series, and I will say of entitle head of the country of the country of the historic Muse. A Great Diplomat.

In dealing with foreign powers, he will take rank with the greatest of our diplomatists. It was a world of which he naditute special knowledge before coming to the presidency. But his marvelous adaptability was in nothing more remarkable than in the firm grasp he immediately displayed in international relations. In preparing for war and in the restoration of peace he was alike adroit, courteous, and tar-sighted. When a sudden emergency declared itself, as in China, in a state of things of which four history furnished no precedent and international law no safe and certain precept, he hestitated not a morning to take the course marked out for an advantage of the same of the s

tion of the field of vision. In two national conventions, the presidency seemed within his reach. But he had gone there in the interest of others and his honor forbade any dailiance with temptation. So his nay was nay—delivered with a tone and gesture there was no denying. His hour was not yet come.

There was, however, no long delay. He became, from year to year, the most prominent politician and orator in the country. Passionately devoted to the principles of his party, he was always ready to do anything, to go anywhere, to proclaim its ideas and to support its candidates. His face and his voice became familiar to millions of our people; and wherever they were seen and heard, men became his partisans. His face was cast in a classic mold; you see faces like it in antique marble in the galicries of the Vatican and in the portrails of the great exhibition; and the heroic resignation of his final words: "It is God's will be instinctive expression meters in the instinctive expression were all the instinctive expression and in the portrails of the great exhibition; and the had gone there within his reach. The water company has an old submerged main across the river and this was placed in commission, saving the city from a water famine.

The rain fell in torrents all day.

No trains except the Central of Geor-gia from Macon have reached Columbus since noon. A washout near Scale, Ala., holds the Mobile and Gi-rard passenger train due yesterday morning, and the departing train on that road was annulled. There are several washouts on the Seaboard Air Line between here and Albany, Ga., which stops traffic on that line. Several washouts are reported on the Southern between here and Shiloh. There is a large washout on the Southern railway in Columbus city limits. After an intermittent rain of 20

days Birmingham was deluged Thursday morning. The rain flooded the streets and many awnings and street signs were torn away.

The total rainfall in Montgomery,
