What a Woman Can Do.
She can come to a conclusion without the slightest trouble of reasoning on it, and no sane man can do that.

Six of them can talk at once and get along first-rate, and no two men can do that.

She can safely stick fifty pins into her dress while he is getting one under his thumb nail.

She is as cool as a cucumber in half a dozen tight dresses and skirts, while a man will sweat and fume and growl in one loose shirt.

She can talk as sweet as peaches and cream to the woman she hates, while two men would be punching each other's head before they had exchanged ten words.

She can throw a stone with a curve that would be a fortune to a baseball pitcher.

She can say "no" in such a low voice that it means "yes."

She can dance all night in a pair of shoes two sizes too small for her and enjoy every minute of the time.

She can appreciate a kiss from her husband seventy-five years after the marriage ceremony is performed.

She can go to church and afterward tell you what every woman in the congregation had on, and in some rare instances can give you some faint idea of what the text was.

She can walk half the night with a colicky baby in her arms without once expressing the desire of murdering the infant.

She can—but what's the use? A woman can do anything or everything, and do it well.

She can drive a man crazy for twenty four hours, and then bring him to paradise in two seconds by simply tickling him under the chin, and there does not live that mortal son of Adam's misery that can do it.—Exchange.

Mothers' Meeting.

Letter to A. McDonald.
Emporium, Pa.

Dear Sir:—A good many people will see your house in the course of the next ten years. We want it to show what Devoe lead and zinc will do. We should like you to paint it, and then not paint it again for ten years—unless it needs repainting.

We'd like such a sample as that in every town in the country—with a notice about it in the town paper: "Mr. McDonald's house was painted ten years ago Devoe lead and zinc, and has never been repainted. The color is not so bright as it was, but the paint is as perfect a coat as ever, to keep out water."

A good lead and oil job is expected to last three years; it is a good one that lasts three years; it generally does not. Devoe lead and zinc lasts twice as long, if not:—

"If you have any fault to find with this paint, either now in putting it on, or hereafter in the wear, tell your dealer about it."

"We authorize him to do what is right at our expense."

We want your house as a sample, and you as a witness.

Yours truly,
F. W. DEVOE & Co.

Be Patient With Pussy.

If you want to train a cat properly, remember that pussy is not the stupid animal pictured by common superstition. Cats certainly are not so intelligent as dogs. Neither are they so sociable. But once they get to know what is wanted of them they are easily induced to do it to the best of their ability. Kindness and patience go a long way with cats. A little wholesome correction is good for a dog, but use a whip to a cat—or one time only, even if ever so sparingly, and its value as a trick animal is destroyed forever. Cats are simply bundles of nerves oozing over with fur, and even an unkind word or a glance from any one they love will cause them acute suffering.

His Ignorance.

"I am always putting my foot in it," said Mr. Cumrox sadly.

"What's the trouble?"

"I am always displaying the fact that I have no taste or refinement. Mrs. C. asked me which of two gowns I preferred, and I immediately betrayed my ignorance. I admired the one which cost at least seventy-five dollars less than the other."—Washington Star.

Sizerville.

Editor Press:—

We have noticed, with regret, that your regular correspondent from this place of late has fallen into the habit of becoming too personal in his slurs. Of course, there always has been and is still a class of people that attend to their own business occasionally but pay particular attention to their neighbors. No doubt the public appreciates this kindness, but there is an old adage which reads: "Charity should always begin at home," and many are of the opinion that attending to business in that manner would be pleasanter and more profitable to all concerned.

Why is it that our honorable correspondent persists in hurling his venom at those persons who hold opinions differ from his own in regard to certain public matters? At people who have a desire to do what is best for the public good instead of hoarding up a few dollars to be perhaps squandered later on.

We are looking for another soft snap, eh? Well, rather! We had intended selling some ancient garden seeds around here, but our correspondent has informed us that Hon. J. C. Sibley sent a few packets to several of our farmers, so I suppose we will have to abandon this plan.

There are a few postoffices in Penn'a, and by chucking Uncle Sam under the chin he might take pity on us and give us an office out of charity, but as the water at the "Springs" is very strong we might get tipsy and lose it, so I think we had better not apply. So we are still looking for another snap.
