Actors in China are very well paid, but are much despised. No actor or son of an actor, says the Chicago News, can compete at the public examina-tions for the literary degree which is the doorway to public office, and consequently the actor's profession, when once adopted, is vital to those who follow it.

An English doctor was called to attend a young actor whose leg was in a bad condition from careless treatment. The foot had been amputated as a refult of compound fracture caused by a fall on the stage. Filth and neglect had done the rest, and there was very little chance of the man's recovery. Still the doctor felt justified in taking that chance and therefore amputated the man's leg. To the surprise of the doctor, the leg healed by first intention, and in a few weeks the actor was ready to resume work. The doctor fitted him with an artificial leg, and his good fortune began.

He at once undertook a part where his leg was knocked off, to the horror of the audience. After the apparent accident he was carried off the stage and presently reappeared, walking as well as before.

The Chinese are unfamiliar with artificial legs, and each time the dramatic incident occurred they regarded it

Duties of the "Pet" Sheep.

Out at the abattoir the "pets" among the sheep may be distinguished by their superior height and shapeliness and by the intelligence of their expression. The pets are murderers. In the other pens sheep come and go by thousands to the slaughter, but the pets remain. They are trained to lead their fellows to death, and they do this work well, for they have by reason of their strength, intelligence and beauty a great influence. When the butchers of the abattoir wish to slaughter a flock of sheep word is passed to the pets, and they indifferently, calmly, saunter in among the flock, gain their confi-dence and esteem and then take their places at their head and lead them to the slaughter house. — Philadelphia

The Dwarf Palm of Algeria. The dwarf palm, which furnishes considerable quantities of fiber, grows n great profusion in Algeria and is one f the principal obstacles to the clearing of the land, so thickly does it grow and so difficult to pull up. Its roots, in shape resembling carrots, penetrate into the ground to the depth of a yard or more, and when its stem only is cut it sprouts out again almost immediately. As its name indicates, this palm is very small and can only attain a cer-tain height when protected, as in the Arab cemeteries, for example.

Palmistry.

"I see financial troubles ahead of you," said the gypsy as she scrutinized the lines in Softleigh's palm. "What is the cause thereof?" asked

the innocent youth.

"I see a dark woman," continued the dealer in futures, "who is destined to cause you trouble in money matters." "As I expected," groaned the callow outh. "That washerwoman is going to hold my laundry for ransom again. Oh, woe is me!"—Chicago News.

Tommy Won.

Two brothers went to the same school. They were absent about a fortnight, and then one returned alone. "Where is your brother Thomas?"

asked the master. "Please, sir, he's laid up with a sprained arm. We were trying to see which could lean out of the window farthest, and Tommy won."

We suppose we are not revealing any trade secret when we say that many medicines are made up on the principle of the so-called "shot-gun pre-scriptions," which were form-erly somewhat in vogue.

The idea of the shot-gun prescription was to put in a large number of different drugs, each useful for different purposes, in the hope that some of them might hit the case.

Vinol, the medicine we sell over our name and guarantee, is not a scattering "shot-gun prescription," but goes straight to the mark.

It is the best thing we know for a run-down condition, for a histless feeling, nerve troubles, for lung troubles—in fact, it is a safe, pleasant, reliable tonic and reconstructor.

It has cured so many people right here in town we offer money back if it fails to benefit. L. TAGGART,
