#### SAYS BIBLE FORBIDS ORGAN.

### Preacher Who Left Kentucky Church Owing to Question of Music Defends His Action.

Rev. Dr. J. W. McGarvey, president of the Bible college of Kentucky uni-versity and a noted writer, has caused a stir throughout the south by his withdrawal from the Broadway Christian church because the congregation voted to install instrumental music. He has traveled extensively in the old world in search of Biblical curios, of which he has probably the largest collection of any man in the south. He gave out a statement supporting his withdrawal, in which he declared that the use of instrumental music in church was contrary to the teach-ings of the Scriptares. ings of the Scriptures.

Dr. McGarvey was supported by J. W. Zachry, an elder and missionary, who in the last campaign headed the prohibition party as candidate for congress in this district. He was supported also by 20 other members of the congregation. These latter have taken their letters to the Chestnut Street church, which has no organ.

#### WIFE'S DREAM CAME TRUE.

### St. Joseph, Mo., Woman Warns Husband Against Going to Work, But

He Goes and Is Killed. "John, don't go to work. I feel sure that something is going to hap-pen to you." Mrs. Mary Johnson, of St. Joseph, Mo., gave that warning to her husband the other morning as he trated to work in the top top started to work in the terminal yards "O, bother," he replied. "Nothing

is going to happen to me. I'm all right, and in no danger."

Three hours later John was picked up from the Santa Fe track in the terminal yards at Hickory street, af-ter the inbound Santa Fe train had ter the incound santa be train had cut off both legs, crushed his hand, mangled his body, and cut a gash in his head. He died later. His wife dreamed during the night before that he would be killed.

### Need of New Statute.

A New York magistrate has de-cided that it is not an offense punishable by law to smoke cigarettes. His honor intimated that it ought to be, however, says the Chicago Chronicle, and the intimation stamps him a most wise and upright judge.

#### Beyond Figures

Somebody has figured out that the average man utters 11,800,000 words in the course of a year. Of course it would be utter nonsense to figure out the number the wife of the average man would use.—Baltimore Sun.

Miss Menard cured after doctors failed to help her.

"Lydia E. Pinkham's Vege-"Lydia E. Pinkham's Vege-table Compound cured me after doctors had failed, and I want other girls to know about it. Dur-ing menstruation I suffered most intense pain low in the abdomen and in my limbs. At other times I had a heavy, depressed feeling which made my work seem twice as hard, and I grew nale and thin hard, and I grew pale and thin.

### LOCKJAW ANTITOXIN.

#### It Has Not Proved Quite as Effective as the Prompt Injection of Carbolic Acid.

Only partial success has attended the use of an antitoxin for treating lockjaw. When there is reason to anticipate an attack, this serum can be used in the sufficient to remove the current advantageously as a preventive. But not sufficient to remove the current its curative value, after the disease and lessen the gradient, but the tracks must be ballasted to the point of the series of the seems to be without effect. On the whole, while reluctant to abandon it altogether, experts recognize the fact that this particular antitoxin does not work as well as could be desired.

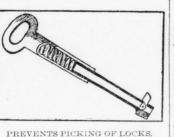

Attention has accordingly been directed by the medical press of late to a system of dealing with tetanus suggested by Prof. Baccelli, of Rome He resorts to injections of carbolic acid, which is one of the most power-ful antiseptic agents known. The idea of introducing germicides into the blood to fight various bacterial diseases—tuberculosis, for instance— is an old one. Carbolic acid has been a favorite resource in such experiments also. However, its application to tetanus is comparatively new. Though the scheme was proposed several years ago, the profession has given the prefence to the serum treatment. Now, how-ever, the Baccelli method is coming to the front again. Italian surgeons are enthusiastic over its effects. Prof. Babes, Bucharest, who may possibly be less prejudiced than Baccelli's fellow countrymen, recommends its use when serum is not obtainable—N. Y. Trib-

## TOUGH ON BURGLARS.

une.

#### English Inventor Claims to Have Per fected a Key That Prevents Picking of Locks.

The majority of locks which are de signed to prevent a burglar from pick ing and unlocking them are of such a complicated nature that their cost is considerably more than that of the ordinary lock, with the consequence that the cheaper locks are used in many cases where the owner has cause to regret it afterward. In our picture is shown an English inventor's idea for cheapening the cost of a lock by

using a pencil form of key. With the common lock there is a slot in the keyhole which corresponds with the position of the tumbler in the mechanism, and it is through this slot that the false key can be inserted which throws the bolt. The essential feature of this invention is a recessed wing, which, being housed within the shank of the key, requires no slot for its passage through the front plate of the lock, but which can be brought into action within the lock to provide an additional wing or projection to an additional wing of projection to operate the tumblers. As there is only a very short slot projecting from one side of the circular opening in the front plate of the lock, it is almost impossible to insert anything through the plate which shall have a wing long enough to move the tumblers after it has once reached the interior of the

### BALLAST FOR RAILWAYS. Latest Scheme to Improve Roadbeds Is to Run Nearly Dry Cemeat

Under the Ties. Millions of dollars are being ex-

pended in improvements on the large railways of the country, tending to-ward the final end of increase in speed and reducing the time occupied in traversing the distance between different sections of the country, Recent experiments with high-speed cars in Germany have shown that the roadbed itself must be greatly improved over the average condition now maintained before trains could

of perfect rigidity before the rails and trucks can stand the high speed. To this end the improved method of ballasting the tracks illustrated in the accompanying drawing has been introduced by William Goldie, of Wilkinsburg, Pa. While the introduction of liquid cement beneath the ties has already been practiced with some degree of success, it has the disadvantage of liability to displacethe rails before the mixture has en-tirely hardened. This new process overcomes this defect by introducing the cement in a practically dry state, and at the same time spraying over it sufficient moisture to insure the setting of the cement, but not suffi-cient to render it plastic or fluid, so that, after having been packed solid-ly under the tie, it cannot become displaced by a passing train, but will remain in that position and set by reason of the moisture imparted to The cement is placed beneath the tie by steam from a locomotive, a small stream of water being introduced at the same instant to moisten the cement .-- Louisville Courier-Journal.

#### How Deafness is Caused.

Deafness cannot be cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deaf-ness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hear-ing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition.

#### Rings a Fever Alarm.

There is a new medical invention in Paris. It is a little apparatus which put under the arm of a fever paient and so constructed that on the temperature reaching a dangerous height it rings a bell, sommoning doctor and nurse.

#### Artificial Graphite.

Artificial graphite suitable for use in lead pencils and for other purposes is now being made by subjecting **a** coke made from petroleum and mixed with iron ore to a high heat in the electric furnace.

the first symptoms of catching cold he should at once begin the use of Peruna according to directions on the bottle, and the cold is sure to pass away without leaving any bad

pass away without leaving any bad effects. Unless this is done the cold is al-most sure to end in the second stage of catarrh, which is making so many lives miserable. If Peruna was taken every time one has a cold or cough, chronic catarrh would be practically an unknown disease.

practically an ultrinown discase. Miss Elizabeth Uber, No. 67 Bassett street, Albany, N.Y., writes: "I have always dreaded unsettled weather because of my extreme liability to catch cold, when a catarrhal trouble would quickly develop through my en-tire system, which it would take weeks to drive away. I am thankful to say that since I have taken PERUNA I do not have any reason to dread this any-more. If I have been at all exposed to the damp, wet or cold weather, I take a dose or two of PERUNA, and it throws out any hint of sickness from my system." -Miss Elizabeth Uber.

Mrs. M. J. Brink, No. 820 Michigan ave-nue, St. Joseph, Mich., writes: "This past winter during the wet and cold weather I caught a sudden and severe cold, which developed a catarrhai condition through my entire system, and so affected my general health that I was completely broken down, and became nervous and hys-terical and unfit to supervise my home. My physician prescribed for me, but somehow his medicine did me no good. Reading of PERUNA I decided to try It. After I had taken but three bottles I found myself in fine health."—Mrs. M. J. Brink. The first stage of catarrh is what is ommonly known as "eatching cold." t may be in the head, nose, throat or ungs. Its beginning is sometimes so evere as to cause a chill and consider-

severe as to cause a chill and consider-able fever, or it may be so slight as to not hinder a person from his usual business. In perhaps a majority of cases little or no attention is paid to the first stage of catarrh, and hence it is that nearly one-half of the people have chronic catarrh in some form. To neglect a cold is to invite chronic catarrh. As soon as any one discovers Sibyl A. Hadley, 25 Main street, Hunting-ton, Ind., writes: "Last winter after get-ting my feet wet I began to cough, which gradually grew worse until my throat was sore and raw. Ordinary remedies ald not help me and cough remedies nauseated me. Reading an advertisement of what PEhelp me and cough remedies nauseated me Reading an advertisement of what PE-RUNA could do, I decided to try a bottle. The Hartman Sanitarium, Columbus, O.
