pains.

THE PLYMOUTH ROCKS.

For Early Broilers, Roasting Fowls or Capons They Are One of the Very Best Breeds.

No breed is so popular or well thought of by farmers as the Plymouth Rock and no breed is so often met with on farms. It is an American breed adapted to American needs and good in any and every place. The greatest consideration among farm-ers is that they are hardy. They need no pampering and are able to shift for themselves when necessary, yet give big returns for good food and The hens are good winter layers of large brown eggs. They are also good sitters and mothers. For also good sitters and mothers. broilers, roasting fowls or capons they are one of the best breeds.

WELL-BRED PLYMOUTH ROCKS The bright yellow legs and skin gives them a very attractive appearance in market.

The Plymouth Kock is good enough for anybody and it has not been neces-sary to bring out a lot of different colored varieties. Yet in addition to the original barred there is the pure white and the buff. In dressing, these two varieties do not show dark pin feathers. The fancier who delights to breed for farm and feather will find ample opportunity with the barred Plymouth Rock. The most prominent breeders follow a system of double mating-matching up one pen to produce cockerels and another for pullets. The demand is for a much lighter color in males than in females. The standard weights are: Cocks, 91/2 pounds; cockerel, 8 pounds; hen, 71/2 pounds; pullet, 61/2 pounds. A typical pair of show birds is here illustrated from a picture taken for the Orange Judd Farmer.

LOOK BEFORE YOU LEAP.

Young Farmers Should Think Seriously Before Abandoning the Country for the Clity.

The question is often asked of the young man on the farm, why he is so anxious to leave home and try his fortunes in the large city. The answer too often is, that he can see no future ahead if he stays where he is, and "It all work and no play anyhow." With the finishing of the summer work, the hustle now being over, the long winter nights upon us, even more time is given to the ambitious or uneasy lad to reflect, until in an ill abused moment he packs up, boards the train and shakes the dust of childhood days from his boots. It is to this class that the cry goes out: "Steady!" Take a moment to think. Think of the number who have gone before you, whose hearts yearn for the cool, fresh, sparkling air of the country morning, who would willingly return if it were not for the supposed criticism they would have to undergo. A large establishment, in a metropolitan city, not long crib to let the corn run into and is ago, advertised for a cferk, to take a responsible position. To this over 300 answers were received; the average salary asked, seven dollars a week A little calculation will show how much of this would be left after the board and incidentals were paid. Figures talk, and these show how over crowded the field in the city has be come in the last few years. Besides this meant a life of confinement, an atmosphere of impurity, with longer hours than the ordinary farmhand. Compare this with the income of the progressive young farmer; not the drone, but the one who gives honest, earnest study to the advancement of of the crib the size of a common crack his profession. Look at his ruddy face $er box (\Lambda)$, then cut the box in half and stalwart figure, the picture of along the dotted line and fit in the betterment of your home; advance the interests of the farm, the noblest work of man, the controlling power in this wasted.—A. Gerber, in Epitomist. the greatest of nations .- Agricultural Epitomist.

Water Supply for Hogs

water they require at times.

WHAT AILS THE PIGS?

Question That Cannot Always Be Answered to the Satisfaction of Anxious Inquirers.

Pigs get out of fix and it is usually through some disarrangement of the stomach. There are some general rules that should be observed at all times for the purpose of protecting the health of the herd. A profitable hog that is ready and eager to eat must, therefore, be a healthy hog. A great deal of the trouble with pigs and hogs is occasioned by constipa-tion. This is the beginning of their troubles that later are not so easily removed, says American Swineherd. It is therefore one of the first things in looking after your hogs' health to prevent constipation. Of course, a hog may be all right in the bowels and yet become afflicted. But it is the exception and not the rule. It takes vigilance at all times to pre-serve the health of the hog. Adopt cleanly methods about the pens and feeding troughs. Have a dry place for them to sleep in. Don't expose them to draughts in their sleeping quarters. Don't overfeed. Don't quarters. Don't overfeed. Don't make sudden changes of feed. Give them charcoal and ashes or charred cobs. Spread lime around their sleep-ing quarters and feed troughs.

When a pig is off his feed there is omething wrong, and you want to get him back there as quick as possible. Don't do it by trying to force him to On the other hand, take away eat. eat. On the other hand, take away his feed and if constipated give him a physic. Look out for worms, prevent lice, provide him with plenty of fresh water, plenty of salt and ashes, plen-ty of range and if he gets sick the percentage of exceptions are small. The sick heat is a super back in the The sick hog is an unprofitable hog. If you doctor him it costs money, it costs time and it causes loss of gain in the hog. It takes a great deal of extra feed to get him started again to the point where his health failed him. Therefore it is far better to spend **a** little time in preventing these ailments by careful watchfulness.

THE CRY FOR BONE.

To Improve Hogs Along This Line Care in Feeding and Judicious Treatment Are Necessary.

We hear a heap about bone in hogs, and it may be worth while to think a little about it. If some of those who write about more bone and how to get it would think a little more their articles would not mislead so much. We are told over and over, says the National Stockman, and many people actually believe, that the modern hog is "deficient in bone," and that we must turn to some big, coarse-boned strain to correct this defect.

There are two kinds of deficiency in bone. One is a lack of quantity and the other is a lack of quality. There are few domestic animals that have too little bone, but there are many that have too weak bone. The way to improve the bone is not to breed to increase its size but to feed to increase. to increase its size but to feed to increase it's strength. In so dong the size will be increased somewhat. Rational care will also do much to improve the quality of bone. The brood sows and the sire should have plenty of exercise, they should be fed well-balanced foods, they should have ac-cess to the earth or to substitutes therefore. With this kind of treat-ment there is little danger of raising a hog without bone enough to support all the meat he ought to carry. And with this kind of treatment the modern American type-the best that has vet been produced from both the producer's and the killer's standpointcan be preserved. A violent cross for bone is not necessary for the man who will study the feeding and care of hogs

WHEN BACKS ARE BAD.

mer of 1896, when, after taking a course of the treatment, they cured me of kidney complaint and back-ache, which was often so acute that 1 was unable to sleep at night and had difficulty in remaining on my feet all day. I am still free from the lumbago or any annoyance from my kidneys, and unhesitatingly de-clare that I am only too pleased to re-endorse my opinions of Doan's Kidney Pills."

A FREE TRIAL of this great kidney medicine which cured Mr. Calmes will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

Settled Him.

Settled Him. Mr. Pitt looked with something like con-temptuous anusement at the collection of oriental curios in his wife's boudoir. "So that's what you call your 'Japanese corner,' is it?" he said. "It looks like rather a childish business for a full-grown woman to waste her time on." "Yes," she replied; "it may be somewhat childish, but it's entirely honest and re-spectable. Can you say as much for the wheat corner you are putting your time and money into building up?"-Chicago Tribune.

The Pe-ru-na Almanac.

The Pe-ru-na Almanac. The druggists have already been sup-plied with Peruna almanacs. There is sure to be a great demand for these al-manacs on account of the articles on astrol-ogy which they contain. The subject of astrology is a very attractive one to most people. The articles on astrology in the Peruna almanac have been furnished by a very competent astrologist, and the men-tal characteristics of each sign is given, constituting almost a complete horoscope. A list of questions and answers on astrol-ogy sent free upon request. There will be a great rush for these books. Ask your druggist for one early before they are all gone.

Practice Makes Perfect.

"Yes, father, when I graduate I am go-ing to follow my literary bent and write for money." "Humph, John; you ought to be suc-cessful. That's all you did the four years you spent in college."-Penn Punch Bowl.

The Scaboard Air Line Railway, of Ports-mouth, Va., is advertising a beautiful, but comparatively little known, region on the West Coast of Florida in three booklets called "The Land of Manatce." They are issued by the Scaboard, but can scarcely be termed a railread advertisement, as the only mention of the road is in a brief and modest note pristed on the inside of one of the cover pages. They are, in fact, a description of Manatce County, Florida, with some account of its history and its many interesting features which will ap-peal equally to the general reader, the in-vestor, the fruit and vegetable grower, and to the tourist and sportsman. The author is Mr. Morton M. Cassaday, a writer of experience. The beauty of the Manatee country is well described, and the marvel-ous fertility of the soil and equally won-derful healthfulness of the climate are told of in a way to leave no doubt in the read-er's mind. Manatee county must be the garden-spot of all Florida, and the won-der is that it has not sooner been settled and the latent riches of its soil turned into good American dollars. A most charming feature of these booklets is their typo-graphical appearance. They are printed on hand-made paper, and are delightfully illustrated with photographic half-tone plates and ornamented with decorative de-signs in flat monetones that make them really valuable brochures. Persons in-terested in Florida, and especially in the possibilities of orange growing and truck gardening below the frost line, will find these booklets not only interesting, but full of valuable and practical information. They may be had from representatives of the Scaboard Air Line Railway, or upon ipplication to the General Passenger Agent, Portsmouth, Va.

The Cost of It.—"I wonder if advertising like this," said the unsophisticated youth, after looking over the department store an-nonneement, "is really expensive?" "Wait till you get a wife who reads those ads. and you'll find out," replied Phamliman.—Phil-adelphia Press.

Virtue, being its own reward, doesn't al-ways attract the shrewdest talent to its pursuit.—Puck.

Rev. H. Stubenvoll, of Elkhorn, Wis., is pastor of the Evangelical Lutherna. St. John's Church of that place. Rev. Stubenvoll is the possessor of two bibles presented to him by Emperor William of Germany. Upon the fly leaf of one of the bibles the Emperor has written in his own handwriting a text. This honored pastor, in a recent letter to The Peruna Medicine Co., of Columbus, Ohio, says concerning their famous catarrh remedy, Peruna:

The Peruna Medicine Co., Columbus, Ohio.

Gentlemen: "I had hemorrhages of the lungs for a long time, and all despaired of me. I took Peruna and was cured. It gave me strength and courage, and made healthy, pure blood. It increased my weight, gave me a healthy color, and I feel well. It is the best medicine in the world. If everyone kept Peruna in the house It would save many from death every year."---H. STUBENVOLL.

Thousands of people have catarrh who would be surprised to know it, because it has been called some other name than extarrh. The fact is catarrh is catarrh wherever located; and another fact which is of equally great importance, is that Peruna cures catarrh wherever located. If you do not derive prompt and satis-factory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable ad-vice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbas, Q.

His Father's Example. Army and navy officers are enjoying a hearty chuckle over the discomfiture of a volknown retired officer who is a familiar figure at several clubs in Washington. This officer has a son of considerable promise, but of tender years. A few years ago, so the story goes, the officer married a for-tune and soon after discovered that he had heart disease and went on the retired list. "Jack," said a visitor to the son the other day, "what are you going to be when you grow up?" "Well," and the eight-year-old with grave deliberation, "I've been think-ing of that for some time and I think that when I'm a man I'l get heart discase and go on the retired list, just like papa."-Chi-cago Chronicle. His Father's Example.

Mamma-"Don't be so selfish. Let your Mamma— Don't be so keinsa. Let your baby brother play with your marbles a lit-tle while." Tommy—"But he means to keep them always." Mamma—"O, I guess not." Tommy—"I guess yes, 'cause he's swallered 'em!"—Philadelphia Press.
