Her First Piece. A little girl during her first term at school when barely five years of age, was told she must "speak a piece."
Notknowing any, she made up and spoke the following:

"Unc I had an ittle dod
It runnedaway
I tied to tech it and tood not."
This little girl is now one of our

This little girl is now one of our most charming young ladies and we have often heard her recite. But at no time has she ever gotten the applause she did on speaking her first piece.

A Civil Service Side Show.

A Civil Service Side Show.

A most diverting side light on the civil service is shed by a two page article in McClure's for June called "Comedy of the Catechized," a symposium of freak answers given by applicants for various positions on the classified list. Few of them seem to be the answers of mere cranks or dunces; for the most part they appear the efforts of worthy and otherwise intelligent persons striving to rise to a great occasion by becoming grandoise, with the ludicrous result. Many ofthe most pretentions would have made an instant hit on the vaudeville stage, the fun is that they are all meant in such serious earnest.

We copy the following which is respectfully dedicated to the Sianamahoning liars club,
According to the Titusville Courier
"Gid" Morgan, who has the credit of being one of the most notorious liars ever known in the oil regions of this "Gid" Morgan, who has the credit of being one of the most notorious liars ever known in the oil regions of this or any other State, told this story of frozen gas. He struck a big gas well and the fluid was so cold that it came up from the casing head in chunks of ice and piled np about the derrick. Being unable to pipe it he built a large ice house, stored it away and used it in the summer as one would wood. It was, according to "Gid," a great scheme and he made a fortune out of it but lost it again in building a hotel, which he erected on a turntable so that he could give every puest a front room. The range in the kitchen was so large that when pancakes were to be baked darkies on roller skates with bacon tied to them were sent about on the gridles to greace them.

Letter to Frank Judd. Emporium, Pa.

Dear Sir: Here's what wears longer

Dear Sir: Here's what wears longer" means.

D. T. McGown, Cooperstown, N. Y., built a house in '85 and painted Devoe. The paint lasted ten years.

A year or two later, a neighbor built a house and painted it lead and oil. The neighbor's house was repainted twice in the same time.

This looks as if the neighbors house was painted three times in eightor nine years, and McGown's once in ten years. We are not quite sure—we tell the tale as it comes to us.

It is enough to say that Devoe Lead and Zinc lasts twice as long as lead and oil alone. The reason is: white lead is soft and chalks off; zinc is hard; and, when thoroughly ground into the lead, prevents its chalking and makes it more durable.

Yours truly,

Yours truly,

The Biggest Car in the World. The Pennsylvania Railroad has re ceived the largest car in the world for shippment to Pittsburg. The truck is 103 feet long, has 32 wheels and carries a forge press weighing in all 478,000 pounds, for the Munhall mills of the Carnegie Company at Pittsburg.

The car was built especially for the Bethleham Iron and Steel Company for use in conveying the largest cast ing ever made from the works at Bethleham, Pa., to the Carnegie mills. Last week the castings were loaded at Bethleham and given to the Lehigh Valley Lines for shipment. The offlcials of that line and connections found that some of the bridges would not be equal to the great weight and arranged to deliver the car to the Pennsylvania Railroad at Wilkes-Barre The car was brought to Rockville and will be sent west over the Pennsy main line, along which most of the bridges are of stone and capable of bearing any weight that may be piled upon them

The car travels as a special train and is inspected every few miles by car repairmen, It is not allowed to pass other trains on curves because of the fact that the castings are so large that they protrude on either side of the car to such an extent that there would be danger of striking where cars are thrown out of their usuai alignmens by curves.

The American Boy Wants to be a Plumber. A man who made millions by his

nechanical inventions, a whose inventions have changed the daily life of every American, told me, says Edward Everett Hale, in the June Cosmopolitan, that he asked fifty boys handiwork they would prefer; and that in every instance, the boy replied that he would like to be a plumber. The curious truth was that plumbing was the only mechanical art which these boys, trained in our modern life had seen in practice.

#### STRONGEST EVIDENCE OF FAITH.

L. Taggart Guarantees That Hyomel Will Cur-When one of the most reputable concern in Emporium guarantees that a medicine will effect a cure or he will re fund your money, it speaks volumes as to the merits of the remedy. It is in this way that L. Taggart is selling Hyomei, the treatment that has made so many remarkable cures of both acute and chronic cases of catarrh in Emporium

and vicinity. Hyomei is not a pill nor is it a liquid that has to be taken with a tablespoor or wineglass. Just breath it by the aid of an inhaler that comes in every outfit and benefit will be seen from the first

treatment. It destroyes all germ life in the air assages and lungs and enriches and purifies the blood with additional ozone. It cures catarrh of the head and throat, or of the stomach, liver and kidneys. Wherever mucous mem brane contains catarrhal germs, there Hyomei will do its work of healing

When using this treatment, the air you breathe will be found like that in the mountains high above the sea level,

where grow balsamic trees and plants which make the air pure by giving off volatile antiseptic fragrance that is healing to the respiratory organs. Remember that if Hyomei does not cure you, L. Taggart will refund your money. This is a good time to cure catarrh by the natural method and prevent catarrhal colds that are so common at this season.
