Not Acquainted with It.

Not Acquainted with It.

The Sunday school teacher was impressing on her pupils that discomfort always follows wrongdoing. "What is it hurts you here when you're naughty?" she asked, placing her hand on her chest. "Stomach, a small urchin replied, memories of stolen fruits coming into his mind. "And do you know," said the teacher, "those little heathen mentioned nearly every organ in the body and never mersioned that abstract thing, a conscience."—N. Y. Times.

The Four-Track News, with a monthly edition of 50,000 copies, has a steadily increasing subscription list, while its system of distribution is one of the best enjoyed by any magazine. In the United States and Canada it is handled by thirty-four news companies, while the International News Co. distributes it throughout Europe. Foreign offices for the reception of subscriptions are maintained at London, Southampton, Bremen, Paris, Havre, Antwerp, Liverpool, Hamburg and Genoa, and files are kept at the office of every United States consul and consular agent in the world. Through the express companies and tourist agents it is also on sale at upwards of 500 places, embracing 210 cities in forty-five foreign countries.—From Printers' Ink.

TORTURING DISFIGURING

Skin, Scalp and Blood **Humours**

From Pimples to Scrofula From Infancy to Age

Speedily Cured by Cuticura When All Else Fails.

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants, and anxiety of wornout parents, as in milk crust, tetter and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the cover to effect impossible reals. salt rheum,-all demand a remedy of power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cures, blood purifiers and humour reme-dies of the civilized world.

Bathe the affected parts with hot

Bathe the affected parts with hot water and Cuticura Sonp, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without rubbing, and apply Catlcura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This complete least and constitutions treatment. cool and cleanse the blood. This com-plete local and constitutional treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, berning and scaly humours of the skin, scalp and blood, and points to a speedy, permanent and economical cure when all else fails.

WESTERN CANADA MILLIONS.

HOMESTEAD LANDS of 160 Acres FREE,

NEW MILKING DEVICE.

As an Object of Curiosity It Is of Interest, Whatever Its Practical Value May Be.

The latest milking machine is here pictured in outline. It requires an engine or other power to drive it in orengine or other power to drive it in order to work the vacuum air pump located at some convenient point. From this a line of iron gas pipe is run above the stalls in the milking shed. This pipe is used only to exhaust the air in the milk buckets. No liquid passes through it. A small branch pipe terminating in a hook is fitted to the main pipe and hangs over the stall the main pipe and hangs over the stall

bout two feet above the cow's back.
The bucket is shown in the figure, and is air tight, the top being closed

MECHANICAL MILKER.

with a lid, clamped securely in place by simply raising the handle to lift the bucket. All that is needed to make connection is the mere hanging of the bucket on the pipe above the cow by a hook attached to the milk pail for that purpose, as shown in the cut. This is an ordinary pail with a cut. This is an ordinary pail with a tight lid and glass peepholes down the sides so that the milk can be seen. A rubber tube runs to the cups attached to the cow's teats. Between the cups is a valve and chamber about the size of a hen's egg which really consti-tutes the effective part of the machine.

The machine is set to work by a simple turn of the valve and the suction holds it in place until the milking is finished. The valves and the cups weigh about two pounds and one man can use four or five of them to advantage in a large dairy. The machine is cleansed by passing cold water through the hose and tubes a few moments. All parts of the bucket may be cleansed with a brush. The cups are new and novel in their action. They are so constructed that they collapse at the top first and thus com press the base of the teat and strip the milk, as by hand. It requires from two and one-half to ten minutes to milk a cow. With proper equipment one man can readily handle 50. The makers claim a cow may be milked perfectly clean and there is no tendency to dry up the flow of milk.— Orange Judd Farmer.

ESTABLISHED FACTS.

Eight Points Concerning Milk That Have Been Established by Exhaustive Experiments.

Some things may be said to have been well established concerning milk by long and exhaustive experiments, which we will enumerate as follows:

1. If milk rich in butter fat is de-sired we must breed for it. It is entirely dependent upon the individuality of the cow, so that men have finally established that individuality into a breed characteristic, as with the Jersey and Guernsey breeds.

2. A bull belonging to a butter breed

will impart this quality to his heifers if he has sufficient prepotency. Also a bull belonging to : milk low in percentage of butter fat will impart that quality to his heifers.

3. It is not possible to increase the

percentage of butter fat in milk by is the general idea with hosts of farm-

4. A food rich in protein increases the quantity but not the quality of the milk. But by inducing the cow to give a larger quantity we may also induce her to yield more butter fat in 24 hours than she otherwise would have done.

Sudden changes in the time of feeding or character of the food, or sudden changes in the temperature, or exposure of the cow to cold rainstorms or to brutal usage—all these affect the percentage of butter fat in milk. It may be mentioned also that some milk ers affect cows favorably or unfavor-

ably in this respect,
6. The milk of a cow does not, as a rule, reach its highest richness until after she has had her calf.

7. Milking three times in 24 hours has been found to increase somewhat the amount of butterfat production. 8. For the consumption of infants the milk of a herd of cows is safer and more digestible than that of a single cow, for the reason that it is less liable to variation from nervousness and other causes.—Hoard's Dairyman.

What Box Irrigation Does. In some parts of the west box irri-gation is practical as a cheap method f saving fruit trees, vines and gardens ough planks, usually about six inches n length, and inserted in holes a foot or more in depth, a few inches from the tree or plants to be irrigated. Wa-ter is filled in the boxes and left to find its way to the roots. This places the water where it will do the most good, precludes the possibility of waste and overcomes the objections to surface

VALUE OF THE SILO.

As Important in Animal Husbandry as the Improved Barn or Corn Crib.

The use of the silo as an economic institution of the farm has been exemplified the last winter in many farming sections I have visited. Almost without exception, wherever I have gone, I have seen more or less unhusked corn standing in the fields, exposed to the wind, rain and snow, and to the hungry tribute gatherings of mice and crows. The valuable food elements of the fodder are, of course, the ones most soluble, and moisture cannot fall upon and run off of any ripened forage without carrying away with it some of the most easily avail-able elements of nutrition. Fodder so exposed to the weather cannot be compared in feeding value with that early husked and stored, as any feeder who has fed the two kinds in comparison well knows. The good results from that consumed are much less, compared to the results from the early stored, while the amount refused by the animals is very much more.

These losses resulting from the corn

exposed in the shock to the fall and winter weather are so extreme that the saving that would have been effeeted had the corn been ensilaged is so apparent that it is not necessary to further enlarge upon it. But the corn saved in the silo has the further intrinsic value of being much more thoroughly saved at the very height of its perfection so that it is easy to count it as having double the feeding value of the other. It must be remembered also that corn cut for the silo is cut clear to the root or as close to it as possible, whereas that cut and shocked to be husked usually has a stubble from one foot to three feet long left on the field. This is all lost as feed. In the silo it is all saved.

The fact that corn is our greatest crop, most easily and profitably raised, and that by stirring it in the silo its fullest feeding value is obtained, and as a result the live stock capable of being kept on a given number of acres may be almost doubled, it seems strange that the silo among intelligent farmers is not considered as necessary in animal husbandry as the barn or the corn crib.-W. F. McSparran, in N. Y. Tribune-Farmer.

FARM MANURE SLED.

For Cleaning a Stable This Device In Highly Recommended by Those Who Have Used It.

My barn is 62 feet long and has two rows of stanchions, with 18 cows in each row. Cleaning out the manure has been a problem, but I have solved it by the use of a sled. I hook a horse

STRONG MANURE SLED.

to a specially made sled, driving back of the cows. All the manure 18 cows will make in 16 hours, I haul in one load to the hog lot. I have a ten-foot pole on which I draw the runner of the sled to about the center of the manure pile, when the sled is tipped over with the pole, and returned to draw the next load. The sled is six by two and one-half feet with two by six-inch runners, six-inch sideboards, and solid board floor, with chain from each runner attached to single tree. Pine wood is used, which is well spiked tightly together .- E. H. Boody, in Farm and Home.

TIMELY DAIRY NOTES.

Salt should be always accessible.

Do not allow dogs, cats or loafers to be around at milking time.

All persons who milk the cows should have the finger nails cut closely.

AURORA, New Mexico. — I received the free sample of Doan's Kidney Pills which I ordered for a girl nine years old that was suffering with bed wetting, and she improved very fast. The pills acted directly on the bladder in her case and stopped the trouble. J. C. Lucero.

Keep the stable and dairy room

in good condition by fresh air and cleanliness. Do not change the feed suddenly

Clean and thoroughly air stable before milking. Milk with dry hands and never al low the hands to come into contact

with the milk. Whitewash the stable once or twice

Use land plaster in the maa year. nure gutters daily, Use no dry, dusty feed just previ-

ous to milking; if fodder is sprinkle it before it is fed. If cover is left off the can a pic of cloth or mosquito netting should

be used to keep out insects. Do not move cows faster than ; comfortable walk while to place of milking or feeding.

Observe and enforce the utmost cleanliness about the cattle, their at tendants, the stable, the dairy, and all utensils.-G. H. Sammis, in Ep itomist.

Coffee from Soja Beans.

A new industry has sprung up ound Meherrin, Va., says the Times-Dispatch, in the past two years among the German settlers in the shape of cultivating soja beans, to be used in the place of coffee. Up to a few years ago this bean was unknown in that section, and since Ht has been substituted for coffee its cultivation has largely increased. eral times as tall as the common ; raising them that they are unsurhad much rather have them to make his coffee than the old Rio grain And as a result the coffee trade among this class has somewhat de-

unselfish."—Philadelphia Press.

Old Railroad Ticket Is Now a Curiosity.

Mrs. Laura E. Howey, librarian of the State Historical society, of Montana has received from C. E. Reese, of Virginia City, one of the tickets used in the early 60s on the stage lines of Montana. It is from Virginia City to New York, issued by the Wells Fargo company, the fare at that time being \$180. The ticket is composed of eight coupons.

The first is by stage, supposed or eight coupons.

The first is by stage, supposedly to Salt Lake, there being left a blank space to be filled in. From there it is over the Union Pacific railroad to Omaha, by omnibus to Conneil Bluffs and from there to Chicago over the Chicago & North-Western Railway.

From Chicago the ticket is over the Pittsburg, Fort Wayne & Chicago to Pittsburg and from Pittsburg to Harrisburg over the Pennsylvania Central. From the latter place to New York the ticket calls for passage over the Allentown line to New York.

The fool sits down and waits for extraor-inary opportunities to come his way, but he wise man grasps common chances and linary opportunities to come his way, but he wise man grasps common chances and proceeds to make them great.—Cnicago Daily News.

The Selection of a Range.

With so many ranges on the market, the housekeeper finds it difficult to make a selection. The Majestic is undoubtedly the best; it is made of steel and malleable iron and every part is of superior workmanship. It bakes quicker and more evenly than other ranges and requires less fuel.

Minnesota Man's Discovery

Minnesota Man's Discovery.

Adrian, Minn., June 1st.—Philip Doyle, of this place, says he has found out a medicine that will cure any case of Kidney Trouble. As Mr. Doyle was himself very sick for a long time with this painful disease, and is now, apparently, as well as ever, his statement carries in confirmation of personal experience.

The remedy that cured Mr. Doyle is called Dodd's Kidney Pills,
In speaking of the pills, Mr. Doyle says:
"In regard to Dodd's Kidney Pills, they are certainly a wonderful medicine—the best that I have ever taken.
"I was very bad for a long time with Kidney Trouble and could get nothing to help me till I tried Dodd's Kidney Pills.
"I used altogether about ten boxes, and I can say emphatically that I am completely cured. I am entirely well, without a symptom of Kidney Trouble left.
"I can heartily recommend Dodd's Kidney Pills to anyone who is suffering with Kidney Trouble, for they made-me all right.
"I have advised several of my friends to try them, and not one has been disappointed."

Nervous S Prostration

The Ills of Women Act upon the Nerves like a Firebrand.

The relation of woman's nerves and generative organs is very close; consequently nine tenths of the nervous prostration, nervous despondency, "the blues," sleeplessness, and nervous irritability of women arise from some derangement of the organism which makes her a woman. Herein we prove conclusively that Lydia E. Pinkham's Vegetable Compound will quickly relieve all this trouble.

Details of a Severe Case Cured in Eau Claire, Wis.

DEAR MRS. PINKHAM:—I have been ailing from female trouble for the past five years. About a month ago I was taken with nervous prostration, accompanied at certain times before menstruation with fearful headaches. I read one of your books, and finding many testimonials of the beneficial effects of Lydia E. Pinkham's Vegetable Compound, experienced by lady sufferers, I commenced its use and an happy to state that after using a few bottles I feel like a new women, aches and pains all gone.

"I am recommending your medicine to many of my friends, and I assure you that you have my hearty thanks for your valuable preparation which has done so much good. I trust all suffering women will use your Vegetable Compound."—MRS. MINNIE TIETZ, 620 First Ave., Eau Claire, Wis. (May 28, 1901).

Nothing will relieve this distressing condition so surely as Lydia E. Pinkham's Vegetable Compound; it soothes, strengthens, heals and tones up the delicate female organism. It is a positive cure for all kinds of female complaints; that bearing down feeling, backache, displacement of the womb, inflammation of the ovaries, and is invaluable during the change of life, all of which may help to cause nervous prostration. of which may help to cause nervous prostration.

Read what Mrs. Day says:

"DEAR MRS. PINKHAM: - I will write you a few lines to let you know of "DEAR MRS. PINKHAM:—I will write you a few lines to let you know of the benefit I have received from taking your remedies. I suffered for a long time with nervous prostration, backache, sick headache, painful menstruation, pain in the stomach after eating, and constipation. I often thought I would lose my mind. I began to take Lydia E. Pinkham's Vegetable Compound and was soon feeling like a new woman. I cannot praise it too highly. It does all that it is recommended to do, and more.

"I hope that every one who suffers as 1 did will give Lydia E. Pinkham's remedies a trial."—Mrs. MARIE DAY, Eleanora, Pa. (March 25, 1901.)

Free Medical Advice to Women.

Mrs. Pinkham invites all women to write to her for advice. You need not be afraid to tell her the things you could not explain to the doctor-your letter will be seen only by women and is absolutely confidential. Mrs. Pinkham's vast experience with such troubles enables her to tell you just what is best for you, and she will charge you nothing for her advice.

Another Case of Nervous Prostration Cured.

"DEAR MRS. PINKHAM: — Allow me to express to you the benefit I have derived from taking Lydia E. Pinkham's Vegetable Compound. Before I started to take it I was on the verge of nervous prostration. Could not sleep nights, and I suffered dreadfully from indigeston and headache. I heard of Lydia E. Pinkham's wonderful medicine, and began its use, which immediately restored my health.

"I can heartily recommend it to all suffering women."—Mrs. BERTHA E. DEIRKINS, 25½ Lapidge St., San Francisco, Cal. (May 21, 1901.)

\$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute gennineness.
