A large number of base ball sports from this section attended, yet we did not hear which side they banked their money. Not being on the inside we shall take the liberty of referring our readers to John Hogan, who has the game down fine.

Wanted—Goat Raisers.

Secretary Wilson has taken up the cause of the goat in the interest of American industry. He complains that twenty-five million dollars' worth of goatskins are being imported annually, with the world supply running short, while the American farmer fails to see in the goat a chance for great profit. He has issued some statistics which are impressive. Whether they will stimulate the goat-raising industry remains to be seen.

There is this to be said for the goat: that he is ordinarily inoffensive and lives cheerfully on a diet so modest that he puts to shame all other domesticated members of animated nature.

The goat loves a quiet pastoral life and eats any old thing from tomato cans to thistles and thrives without complaining. In the far East the goat is respected for his many good qualities. His hair is good for cloth, his meat is excellent—especially when not too old, while goat's milk is used extensively and is by many claimed to be in every way superior to that of the more aristocratic cow. Millions of humanity live off the goat; why not Americans?

The suggestion was made that the goat be turned loose on some of the abandoned farms of New England. It seems, however, that although the goat can live on almost anything he cannot survive on nothing. The rocks of a New England farm are too tough even for the digestion of the goat, and the movement in that quarter has come to an untimely end. The Secretary, however, wisely says that any farm in the country can support a number of goats without any extra expense, and that it would not be difficult to supply all the skins the country consumes if only the matter were taken up intelligently.

The thanks of the country are due the attention of the farmer. There seems to be more in him than we had suspected.—Philadelphia Inquirer.

Saving The Timber Lands.

The rural residents of Pennsylvania are slowly awaking to the fact that the new law gives them a rebate of county taxes for timber land on their premises up to 50 acres. This is likely to save many valuable tracks of timber land and also leave a few covers for the ruffed grouse which are slowly but surely being driven to pretty small quarters in many counties in the Northeastern part of the State.

We have seen acres of land cleared of all standing timber and brush, afterwards burned over and then left to grow a rank growth of berry bushes and thistles. This little left protection from storm for game and placed the land in a worthless condition for any agricultural use.

A few years ago many parts of Pennsylvania afforded fine shooting covers for grouse. The thickly grown hillsides and gulleys afforded the finest retreats for the birds, protecting them from the gunner and also giving shelter from the rigors of the winter. Large areas of swamp land gave unexcelled preservation to the game—not only from the sportsmen, but from the hawks, owls, foxes and game destroyers. But for the "advance of civilization" and the desire for more of country being cleared, or, at least, of land was the cause of much of this kind the heavy timber and brush. The birds and animals were driven off or burned out, fell a more easy prey to their natural enemies and apparently disappeared from that section.

There still remains many thousands of acres of uncultivated land in this State parts of which will never be entirely cleared. There is also considerable timber standing, but much of this is yearly being taken out by lumbermen. It is to be hoped that the new law will be remembered and many tracks of timber will remain uncut, not only as a refuge and protection for game, but for the good which it does mankind.

Dieting Invites Disease.

DEATH'S DOINGS.

COSTELLO. Mrs. John Costello, wife of John Costello, proprietor of Eagle Hotel, East Emporium, died at the family residence last Sunday, aged about 45 years. Deceased leaves a husband and family of five small children. The funeral took place on Tuesday and was quite largely attended.

DOLAN. Another old resident gone. Patrick Dolan, of Shippen township, died Sept. 21, 1903, aged 84 years.

Mr. Dolan was born in Ireland, but early in life removed to Canada. After a residence there of five or six years he came to Pennsylvania, where the remainder of his long life was spent. In 1848 he married Miss Mary Burns of Lock Haven, Pa., by whom he had four children, all of whom survive him. Since the death of his wife, four years ago, he has made his home with his only daughter, who was devoted to her father's interests. His demise will be keenly felt.

Read and Remember. The following from the McKean Democrat, is worthy of careful perusal by lodge members:

One of the incomprehensible things in life is why a man will join a beneficial order and pay out money year after year to retain his membership in the order, but always manages to keep in arrears just far enough so that in the event of illness or an accident that will incapacitate him for work, he is not in good standing with the lodge to the extent of being entitled to any benefits when he needs them most. We have in mind when we pen these lines a case of a young man who belonged to a beneficial order, when an accident that ultimately resulted in the death of the young man occurred, and the lodge books disclosed the fact after the injury had been inflicted that he was in arrears on his dues just three days, so that he was not entitled to any of the liberal provisions the lodge makes for its members under those sad circumstances.

This ought to be a warning to every man who belongs to a beneficial order that the only safe way is always keep your dues paid up in advance, as you know not when sickness or accident may overtake you.

Letter to E. C. Davison. Emporium, Pa.

Dear Sir: "It costs as much to put-on poor paint as good"—a common saying and true—it costs much more to put on poor paint; more gallons.

Poor paint is paint and barytes or paint and sand or paint and lime or paint and chalk or paint and benzine or paint and water; these are the usual cheat; there are others.

It takes more gallons of paint-and-cheat than of honest paint; and the cost of the labor of painting is so much a gallon—one gallon costs as much as another for labor.

This is the way to reckon your costs for this year; but how about next year? Paint Devoe, and next year costs nothing; year after next the same; the same for several years.

Paint anything else, and your costs recur according to what you paint with. Some of the mixtures wear one year; some two; some three.

It costs twice, three times, four times, five times, as much to paint with a cheat as to paint with Devoe.

Yours truly, F. W. Devor & Co.

P. S. Murry & Coppersmith sell our paint.

Ten Thousand Churches

In the United States have used the Longman & Martinez Pure Paints.

Every Church will be given a liberal quantity whenever they paint.

Don't pay \$1.50 a gallon for Linseed oil (worth 60 cents) which you do when you buy this paint in a can with a paint label on it.

8 & 6 make 14, therefore when you want fourteen gallons of paint, buy only eight gallons of L. & M., and mix six gallons of pure linseed oil with it.

You need only four gallons of L. & M. Paint, and three gallons of Oil mixed therewith to paint a good sized house.

Houses painted with these paints never grow shabby, even after 18 years.

These celebrated paints are sold by Harry S. Lloyd, Emporium, Pa. 28-2m.

It Does Not Pay

- To be unjust. To be dishonest. To be too exacting. To be too avaricious. To be a "good fellow." To be radical—inconsistent. To be careless and shiftless about your work.

To neglect to attend to the duty at hand.

To procrastinate for "procrastination is the thief of time."

To be headstrong in managing a business or directing employees.

To be unkind or ungenerous to those who are doing well in your employ.

To exchange a skilled worker for an unskilled worker—skill is what counts.

To do anything by halves. What is worth doing at all is worth doing well.

To increase your business capacity in the middle or at the wrong end; you can't load up 'till you've got something to load.

To be pennywise and dollar-unwise—save a cent and spend a dollar—it is surprising the amount of pennywise work is done in large and small concerns.

To be jealous hearted. Greeneyed jealousy has ruined its ten thousands and brought low its millions; it is the sword that beheads the innocent, makes flow the heart's blood of the just and upright; it is the darkening cloud which overshadows the successful business man, the skilled and energetic laborer; it is the thief which robs you while you are looking him in the face and the fiend who stabs you when your back is turned. Only cowards possess it, he who recognizes his superior and lies in waiting for his blood. His ways are dark, his tongue is smooth, his sword is keen and his swath of destruction is wide.
