Keep in Prime Condition. Nature, says Success, is not sentimentiful or merciful. If you violate her law, you must pay the penalty, though you sit on a throne; king or beggar is all the same with her. You cannot plead weakness or handicap as an excuse for failure. She demands that you be ever at the top of your condition, that you always do your best, and will accept no excuse or apology. A weakness anywhere mays one's whole career. It will rise up as a ghost all through one's life-work, mortifying, condemning and convicting one of past error. Every indiscretion or vicious indulgence simply opens a leak which drains off success capital. Of what use is great success capital, of mental and physical equipment, if you are not wise enough to manage it to the best advantage, and to make it last until your success is assured? It is sad to see a young man try to win high place with a broken-down constitution, or with his faculties half four territories into two states, are actutrained, and his success army completely ated by partisan and sectional motives, demoralized, his prospects ruined by a shattered physique. The saddest thing of all is that wise living might have made fulfillment of ambition possible, and enriched the world with a noble, wellroundel life. The great problem, then, which everyone has to face, is how to generate energy, how to conserve it, and to let in Arizona and New Mexico tohow to keep oneself always at the top of his condition.

Green, superintendent of the Edison Illuminating Electric company at Altoona, Pa., writes to the Electrical World and Engineer of his successful use of electricity for thawing water He has thawed 250 feet of onepipes. inch iron pipe in 20 minutes, using between 18 and 20 kilowatts; for between 30 and 40 feet of three-quarter-inch pipe, five to eight minutes and 11 to 15 kilowatts are required. The voltage is reduced to not over 50, and the connection made to the pipe to be thawed and to a hydrant or other connection to the main on the other side of the frozen portion. The work is performed for customers in less time and with much more cleanliness than it could be done by the plumber. The cost lies chiefly in the carting of the apparatus and labor

THE WEST AND SOUTHWEST

Some Reasons Why the Republican Party Is Stronger Than Ever Among the People.

The democrats charge that the repubicans, in proposing to consolidate the and that they want to minimize the "inand that they want to minimize the in-fluence of the west and the southwest in the citadel of federal power, the United States senate." This is the lan-guage of the democratic report against the bill passed by the house to admit Oklahoma and the Indian territory jointly as the state of Oklahoma, and gether as the state of Arizona. The same language was repeated by many of the democrats in their speeches against the bill. The bill had the solid support of the republicans and the solid opposition of the democrats. It is said to be the purpose of the democrats to make this charge against the republicans a feature of the presidential cam-paign in the west in 1904. The repub-

licans ought to hope that their enemies will do this. It will give a chance to show what has been the actual attitude of the two big parties toward the west.

Do the democrats who are prating about republican hostility to the west know what was the issue that created republican party? asks the St. Louis Globe-Democrat. It was the democrats' repeal in 1854 of the Missouri compromise, which repeal threw open to slavery Kansas, Nebraska and the rest of the territories above the Missouri compromise line. This was a national issue in its broad features, but it was directly and particularly a western issue.

IMPROVEMENT IS SLOW No Evidence of Increased Activity In

the Leading Industries-Review of Trade. New York, May 14 .-- R. G. Dun &

Co.'s Weekly Review of Trade says: Seasonable weather has restored normal conditions in many branches of retail trade, but the improvement has not yet extended to wholesale, jobbing or manufacturing depart-ments, except in special lines. It is difficult to find evidences of increased activity in any of the lead-ing industries, and there is more idle machinery. Traffic conditions are little changed, railway earnings in the first week of May falling 7.5 per cent, behind last year, and the late opening of lake navigation was fur-ther retarded by a strike. While many features of the business situation make poor comparisons with last year, it is worthy of note that few precidential years have made a better exhibit. In the leading manufacturing in-

dustry scarcely any decline in prices occurred, during the past week, but the average has fallen considerably from the best position of last year, and consumers are confident that further delay will result in still more attractive terms. This impression is largely due to the recent disagree-ment among ore producers. Commercial failures this week in

the United States are 236, against 196 the corresponding week last year. Failures in Canada number 23, 23, against 13 last year.

St., Lansing, Mich., writes: "Peruna has been such a blessing to my only child, as well as myself, that I feel induced to give my testi-monial. He has always suffered from catarrh of the head and throat, and I had to use extra precautions so as not to have him exposed to damp or cold weather. Last year he was taken with la grippe, and as it was a severe case, caused me much anxiety. No medicine helped him till he took Peruna. I noticed an improvement at once and in him till he took Peruna. I noticed an Improvement at once and in three weeks he was a different child; the grippe had been com-pletely cured and I noticed that the catarrh was made better. He kept taking it two weeks longer, when he was entirely well. I now use it off and on for colds, cramps, indi-gestion or general indisposition, and find it superior to any doctors or medicine l ever tried. It keeps me, as well as my child, in perfect health, and I gladly recommend it to mothers."—Mrs. A. Hobson.

Bishop Mylne tells in the London Spectator of an experience he had when in America. A workman had shown the way, as far as it coincided with his own, and at parting, knowing those he had directed to be Englishmen, he took off his cap and most courteously, and said, "Good evening, gentlemen." He had retired "half-across the pavement" when he thus took leave of them. "My friend and I," remark the bishop, "said to each other that an Englishman in similar circumstances would not have retired out of arm's length for fear we should offer him a gratuity."
