THE KEGS WERE LIGHTER.

Dr. Lorimer's Easy Explanation of an Apparently Difficult Performance.

Rev. George C. Lorimer, whose death at Aix was recently reported, was the main impetus that carried on the building of Boston's magnificent Tremont Temple, and Dr. Lorimer's wit, sincerity and imaginative sympathy made him a great favorite with the students of Harvard during his residence in Boston.

At Cambridge, one day, according to acurrent story, an undergraduate asked the opinion of Dr. Lorimer on drinking—moderate drinking.

"I am opposed to it," the clergyman said. "It is perilous. It frequently leads to drunkenness. In fact, most drunkards were moderate drinkers first."

"Naturally malt liquors and wines, though, are strengthening, aren't they?" the student asked.

Dr. Lorimer smiled.
"Beer," he said, "is very strengthening. I have known young men to have sent to their rooms large kegs of beer that they could not budge at first, and a day or two later they would be able to lift these kegs with ease."

THE PASS WAS GRANTED.

Young Man of Facile Reasoning Ability Has Only Once to Ask for It.

A young man who was working for the railroad company went to one of the direc-tors and asked for a pass to some distant point, relates the Philadelphia Public Led-

ger.
"You have been working for us some time?" inquired the official.
"Yes, sir," the young fellow answered.
"Have you ever had any complaint to

"Have you ever bad make?"
"No, sir," answered the employe.
"Well, if you were working for a farmer, would you have the nerve to ask him to harness his horses and take you to a certain part of the country?" the director

tain part of the country.

asked.

"No, sir. But if he had his horses all ready, and was going to that point, I would call him a very mean farmer if he refused to take me," was the young fellow's reply.

Looked That Way.

When a young woman at Allentown, Pa., entered the proper office alone the other day and asked for a marriage license, the clerk naturally inquired: "Where is the roung man?" "I've got him at home," re joined the woman, and the license was granted. Wonder if she had him chained.—Boston Globe.

Excursion

Insurmountable.

An indignant letter dictated by a clever old gentleman runs thus: "Sir, my stenographer, being a lady, cannot take down what I think of you. I, being a gentleman, cannot express it; but you, being neither, can readily divine it."—Argonaut.

Do not believe Piso's Cure for Consumption has an equal for coughs and colds.—J. F. Boyer, Trinity Springs, Ind., Feb. 15, 1900.

Ah, Povery, I could forgive thee for making me work late at night, if thou didst only not get me up so blooming early in the morning!—N. O. Picayune.

The czar's new baby has heaps of trouble before him. Incidentally, he has got to learn to talk Russian.—Boston Globe.

Either gink twice before you speak, or speak twice before the other fellow can think.—Chicago Tribune.

Straw vetes show which way the hot air lows.—Judge.

DISTRESS VOMITING SPELLS LONG RESISTED

EVERY EFFORT TO CHECK.

Mrs. Brooks Became So Weak She Thinks She Would Have Died But For Dr. Williams' Pink Pills.

Mrs. Sarah L. Brooks, of No. 45 Lincoln Park, Chicago, Illinois, gives the following account of her cure from dis-

ressing spells of vomiting:

"For five years off and on I was treated in vain by different doctors for relief from a stomach trouble which showed itself in frequent and trying spells of vomiting. Part of the time I was able to work and again I would be confined to bed for three or four days in

succession.

"My stomach was at times so delicate that it would not retain even plain water. The spells would sometimes occur at intervals of half an hour, and would leave me so weak that I would be compelled to lie down between them. I would have several of them during the night following a day of such attacks. Finally I became so weakened that I had to give up working altogether. I weighed only ninety-four pounds.

"Last January I read about Dr. Wil-

liams' Fink Pills for Pale People in one of the Chicago daily papers and bought a box and began to use them. After I had used half a box I found that I could keep on my stomach the food I ato. I was encouraged by this and kept on using the pills for four months. At the end of that time the vomiting spells had ceased altogether and my weight went

end of that time the vomiting spells had ceased altogether and my weight went up to 142 pounds and is still growing.

"I think I surely would have died if it had not been for Dr. Williams' Pink Pills for I sometimes vomited clear blood, and for three or four days at a tiacl tould not eat a bite of anything. One doctor said I had chronic inflammation of the stomach, and another said my difficulty was a cancer, but none of their medicines did me any good at all. Finally I concluded that I did not have blood enough to digest my food and I began the treatment that has cured me. I can eat anything now, and have strength for all kinds of work. I always keep Dr. Williams' Pink Pills on hand, and I recommend them to my friends because I know they cured me."

Dr. Williams' Pink Pills agree with the most delicate stomachs and strengthen the digestive organs until they do their work perfectly. They are sold by all druggists

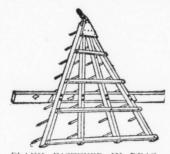

LEVELING THE SEED BED.

Here's a Drag That Levels Two or Three Times as Fast as the Harrow Pulverizer.

It is a common practice among wheat growers to drill wheat in the plowed ground, unharrowed and unpulverized. Some of the set! is covered two or three times deeper than other by this method. The ground, no matter how loose, should be level in order that correct drilling can be done. Ground that breaks up cloddy should be disked, harrowed with an A-harrow after a rain or rolled, preferably when ground has enough moisture to crum-

Much land only needs leveling. In

PLANK FASTENED IN DRAG.

14 or 16 feet long, between the third or fourth set of teeth from the back of an A-harrow so that it extends evenly on each side for several feet. The top of this plank should be in-clined toward the front, which position can be maintained by fastening a triangular timber on the upper edge of the plank directly between the teeth Kansas City Southern Ry. Special This device level frame.

This device levels two or three times Sept. 13, 20 and 27, Oct. 4 and 18, 1904 to Arkansas, Indian Territory, Louisian and Texas, very low one way and round trip rates.

For further information, write to S. G. Warner, G. P. & T. A., K. C. S. Ry., Kansas City, Mo. in Farm and Home.

THE DANDELION DIES HARD

Gardeners Have Hard Work in Trying to Get Rid of This Pernicious Weed.

In some parts of the country garden ers consider the dandelion a valuable crop to grow for the market. But while these people are studying methods of culture that will be more favorable to its development there are others who Surely, says Faith, the Providence which hath made time too valuable to be used in chewing food will not withhold a specific cure for indigestion.—Puck.

Women are perfectly contented with their lot so long as they don't meet another woman who appears better off.—N. Y. Herwood with the dandelion has become one of our most pernicious weeds within a few years and the more favorable to its development there are others who are equally anxious to find a way to get rid of it. To the latter the Denver Field and Farm does not offer much encouragement. It says:

"The dandelion has become one of our most pernicious weeds within a few years and the more favorable to its development there are others who are equally anxious to find a way to get rid of it. To the latter the Denver Field and Farm does not offer much encouragement. It says:

few years and the pest is spreading in spite of all efforts to get rid of them. Many a lover of a pretty lawn has tried to eradicate them by cutting out with a knife, but the fact is that when we cut off the crown an inch or two below the ground we simply multiply the number of plants. The side roots start into business for themselves, forming new crowns. If we do not cut, the seeds give new plants and so extermination is rather a hopeless task. Where the plants are very thick the only thing to do is to destroy the old sod, kill out the roots and re-seed heavily with grass. Where the plants are few in number it may be just as well to imagine that they add beauty to the lawn and try to enjoy their presence. Of course the roots can be killed by the free use of blue vitriol, but each spot so treated will remain bare for years."

LITTLE DAIRY POINTERS.

Cream irregularly ripened makes streaked butter. Dry salt cannot be worked into dry butter successfully.

The cows should be thoroughly acquainted with the milkers.

Never breed a "kicky" cow. Your herd needs cows, not mules. Soured milk affects the cream injuri-

ously. Get the cream off in time. Never put a fine cow in the care of a poor milker. The milker makes or unmakes the cow.

Dirt in milk makes more undesirable butter than all the wrong methods of working. No perfection of working out buttermilk and working in salt can secure the proper flavor of butter from

Some cows set the "dairy marks" of the experts at defiance and give large yields of good milk. All the same, the good dairy cow should show certain feature in size, shape and general make-up.—N. Y. Farmer.

Storing Vegetables in Caves.

In our experience the best way to keep vegetables is to put them in a cave, conveniently near the house. Dig the cave deep enough so it can have about three feet of earth over the top to prevent freezing, and large enough to hold several loads of potatoes, besides other vegetables you may wish to store. Have two doors, one at the foot of the stairs and a trap door above. Put the potatoes in bins, and have a bin of sand in which to store carrots, parsnips, beets, salsify and any other roots you may have. If the sand becomes dry it should be moistened at intervals. In this way the roots will keep fresh and crisp till late in the spring. Cabbages will keep nicely if pulled by the roots and placed close together with the heads down.—Mrs. J. F. Luke, in St. Louis Repubic. TO INVESTIGATE MILK DIET.

10,000,000 Rockefeller Institute Will Search for Cause of Mortality

Among Babies.

Monkeys fed on bread and milk rarely live more than three or four years, though their natural lifetime in the wild state is from 25 to 30 years at least. Their bread and milk diet is held to be conducive to tuberculosis. These facts are to be used as the basis of exhaustive experimental work in the \$10,000,000 hospital that is being built here by John D. Rockefeller as a memorial to his grandson, little John Rockefeller McCormick, son of Harold

McCormick, of Chicago.

The child died of "summer complaint," and one province of the hospital, the construction of which has just been begun, will be to investigate in the hope of finding a specific for this disease, which is the most com-mon cause of infant mortality. Special attention will be paid to milk and water supplies, as it is considered that the prime source of "summer com-

plaint" is in milk and water. Mr. Rockefeller already has set aside \$1,250,000 for the Rockefeller institute for medical research, which will be the largest institution of its kind in the world, and it is understood kind in the world, and it is understood
he is planning ultimately to devote
eight or ten times that amount to this
great enterprise. Now that work has
actually begun on the first laboratory
and animal-house, some of the details
of the enterprise are made public.

One of the most distinctive features
of this institution will be an elabor.

of this institution will be an elabor. ately contrived building for a large variety of animals to be used in the experiments. Provision has been made to maintain a temperature in each case to accord with the climate to which the various species are accustomed. The building will have a roof garden, with cages for such animals s are accustomed to live in the open air.

Should Not Get Reckless.

King Peter succeeded in getting himself crowned without the firing of a shot. If he is wise, however, remarks the Chicago Record-Herald, he will keep right on compelling the cook to taste his victuals first.

Long Pull.

A European scientist predicts that in about a million years hence the human race will be legless. Pulled doubtless, says the Atlanta Constitution-

An Irishman says the easiest way to take a cork out of a bottle is to push it in.—Chicago Daily News.

Japanese soldiers are equipped with fans. This probably accounts for the fact that there are no flies on them.—N. Y. Tribune.

Some men swear because they think it is smart; others because their vocabulary is very limited, and all who do swear do so because they are foolish.—The Commoner.

Now that man in Halifax, Nova Scotia, who pawned a cemetery lot in order to get money to take a vacation—where does he expect to go when he dies?—Indianapolis News.

set money to take a vacation—where does he expect to go when he dies?—Indianapolis News.

"I never knew there were so many before." said the new mayor. "So many what?" asked the city auditor. "So many men who have never been elected to anything who know just how this office should be run."—Cincinnati Tribune.

A Pennsylvania man bit into a peach the other day and was stung by a bee which was having a good time in the interior of the fruit. If people will but into the business of others, they must not complain of the consequences.—Buffalo Express.

Wealth takes wings; poverty jogs along in an ox-cart; poverty praises God; wealth sometimes rents a pew in His temple and demands salvation on a cash basis. But it's all "human natur';" so, on with the music, an hands 'round in the life-dance!—Atlanta Constitution.

"I sometimes feel," bitterly confided the wife of the great poet to her sister, "that I would have been happier win an organgrinder. Then we could, at least, pass the hat around unabasked. The pride that goes with great gifts too often walks hand in hand with starvation to satisfy an ordinary woman."—N. O. Picayune.

A London doctor has figured out that medical science will have destroyed all the

A London doctor has figured out that medical science will have destroyed all the bad germs in another hundred years, and that in the 2,000's everybody will five to be a centenarian. What will save the prophet physician from his fellow practitioners, doubtless, is that none of them expect to live to see their occupation disappear in n disappear in

and two terrible operations avoided. Mrs. Emmons and Mrs. Coleman each tell how they were saved by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR Mrs. PINKHAM: - I am so pleased with the results obtained from Lydia E. Pinkham's Vegetable Compound that I feel it a duty and a privilege to write you about it.

and a privilege to write you about it.

"I suffered for more than five years with ovarian troubles, causing an unpleasant discharge, a great weakness, and at times a faintness would come over me which no amount of medicine, diet, or exercise seemed to correct. Your Vegetable Compound found the weak spot, however, within a few weeks—and saved me from an operation—all my troubles had disappeared, and I found myself once more healthy and well. Words fail to describe the real, true, grateful feeling that is in my heart, and I want to tell every sick and suffering sister. Don't dally with medicines you know nothing about, but take Lydia E. Pinkham's Vegetable Compound, and take my word for it, you will be a different woman in a short time."—Mrs. Laura Emmons, Walkerville, Ont. ville, Ont.

Another Case of Ovarian Trouble Cured Without an Operation.

"Dear Mrs. Pinkham:—For several years I was troubled with ovarian trouble and a painful and inflamed condition, which kept me in bed part of the time. I did so dread a surgical operation.

"I tried different remedies hoping to get better, but nothing seemed to bring relief until a friend who had been cured of ovarian troeble, through the use of your compound induced me to try it.

who had been cured of ovarian trouble, through the use of your compound, induced me to try it. I took it faithfully for three months, and at the end of that time was glad to find that I was a well woman. Health is nature's best gift to woman, and if you lose it and can have it restored through Lydia E. Pinkham's Vegetable Compound I feel that all suffering women should know of this."—Mrs. Laura Belle Coleman, Commercial Hotel, Nashville, Tenn.

It is well to rememember such letters as above when some druggist tries to get you to buy something which he says is "just as good" That is impossible, as no other medicine has such a record of cures as Lydia E. Pinkham's Vegetable Compound; accept no other and you will be glad.

Don't hesitate to write to Mrs. Pinkham if there is anything about your sickness you do not understand. She will treat you with kindness and her advice is free. No woman ever regretted writing her and she has helped thousands. Address Lynn, Mass.

\$5000 FORFEIT if we cannot forthwith produce the eriginal letters and signatures of above testimonials, which will prove their absolute genwiseases.

Lydia E. Pinkham Medicine Co., Lynn, Mass.
