It is fair to infer, remarks the New York Post, that this resolve was taken only after a most careful study of medical statistics showing beyond a doubt as one of its provisions: "Laws enact-ed by the republican party, which the that there are three times as many men suffering from "catarrh, neuralgia, toothache, influenza, and heavy colds' as there are women similarly afflicted. The cause of this alarming preponderance of male patients along what may rough ; be termed facial lines it seems can only be explained by the old way of saluting the fair sex in bad weather. There is much to be said for the heroic step taken by the ladies of Haparanda, who are thus willing to content themselves for a time with a "simple military greeting:" but we think the Gaulois is rash in assuming that they will earn the particular gratitude of bald-headed gentlemen. A somewhat minute observation of the behavior of elderly men in the act of offering the customary salutation to passing female acquaintances has led us to believe that none are more eager to bare their heads on such occasions than those whose heads are already bare.

Spirit of the Democracy Which Is a Many Desertions from the Democratic Ranks to the Roosevelt Standard.

The swing of a large element of the democracy over to the republican side is so emphatic and so numerically powerful that some of the persons participating in it imagine that it is the republican party which is moving in their direction. Senator Carmack, of Tennessee, one of the radical faction of the democracy, says that "President Roosevelt has become the foremost disciple and ablest lieutenant of William J. Bryan." This expression came out in a meeting of the committee ou interstate commerce. The Tennessee democrat remarked that "such joyous harmony prevails in the committee that all party lines are obliterated." He added that "all the members of the committee, down to myself, are stirred by a keen desire to execute at the earliest possible moment the promise made by President Roosevelt to the people of the United States to carry

INCAPABLE OF GOVERNING.

The administration bill ardently supported by President Roosevelt and Sec retary Taft for the reduction of duties at American ports on Philippine sugar and tobacco to 25 per cent, of the rates prescribed in the Dingley law had been under consideration by the ways and means committee of the house of repreentatives for some time when a vote was taken which resulted: In favor of the bill, 14; opposed to the bill, 1. The minority vote was cast by S. M. Robertson, democrat, of Baton Rouge, La. Every republican member of the committee upported the measure.

Mr. Robertson's vote is instructive as showing the disease which afflicts the democratic party, says the Chicago Chronicle. He represents in part a state which is interested in the produc-tion of sugar. It is probable that he would not hesitate to deprive iron and steel, wool or hides, copper or glass of 100 per cent. of the protection given them under the Dingley law, and he would feel that he was acting on principle in so doing, but a proposition to reduce tariff taxation upon even the small sugar product of an American dependency could not be entertained by him for a minute.

Thus a democrat theoretically opposed to all tariff for protection outrepublicans the republicans of the ways and means committee, who believe in protection for protection's sake, but who can be persuaded on occasion to modify the laws on the subject when no harm will be done to any interest at home. As Mr. Taft has pointed out, the entire Philippine sugar crop, if admitted duty free, would have no effect whatever upon the American market.

Mr. Robertson's vote shows why the emocratic party cannot govern. It undertakes as a matter of principle to pass a tariff bill and selfish interests detach enough of its members to make the measure a matter of mere bargain and sale. Most democrats are radical free traders so far as the industries and products of other people are concerned. They are enthusiastic protectionists as far as their own local industries are concerned.

It is this spirit which makes the party when it is aggressive and dominant a menace to the greater business interests of the country. The Wilson tariff law as amended by democratic grafters and logrollers was more obnoxious than any republican tariff, because it was wholly selfish and unprincipled. A republican tariff bill is drawn with the idea that beneficiaries must give as well as take, and it does not attempt to smite one section in order to build up another.

A party which, even when in the minority, cannot agree to support its own professed principles, has little to offer to the people who at times may be inclined to favor a change of administration

in His Clash with the

Senate.

The overflowing energy of Mr. Roose elt, tempered by the mature wisdom of the senate (a condition never absent minds of the framers of the from the constitution), cannot fail to guide us along lines of sobriety and safety. When our excellent chief magistrate is right he has no warmer admirer, no stancher henchman than the Sun. He is for the most part right, always so by intention; but his most intemperate worshipers must admit that the impetuosity of youth sometimes gets the upper hand of his native judgment. It is on these occasions, and only on these, says the New York Sun, that the Sun has felt an admonitory impulse and has given expression to it in words of temperate and sauve reproof

Mr. Roosevelt is always wisdom itself when he permits himself to take time enough, and he must surely see that the late action of the senate is the best thing possibly have happened to

THE TRICKS

Coffee Plays on Some.

It hardly pays to laugh before you are certain of facts, for it is sometimes humiliating to think of afterwards.

"When I was a young girl I was a lover of coffee but was sick so much the doctor told me to quit and I did, but after my marriage my husband begged me to drink it again as he did not think it was the coffee caused the troubles.

"So I commenced it again and continued about 6 months until my stomach commenced acting bad and choking as if I had swallowed something the size of an egg. One doctor said it was neuralgia and indigestion. "One day I took a drive with my husband three miles in the country and I drank a cup of coffee for dinner. I thought sure I would die before I got back to town to a doctor. I was drawn double in the buggy and when my husband hitched the horse to get me out into the doctor's office, misery came up in my throat and seemed to shut my breath off entirely, then left all in a flash and went to my heart. The doctor pronounced it nervous, heart trouble and when I got home I was so weak I could not sit up. "My husband brought my supper to my bedside with a nice cup of hot coffee but I said. "Take that back dear I will never drink another cup of coffee if you gave me everything you are worth, for it is just killing me.' and the others laughed at me and said:

The fight against the octupus is getting lively along the whole line. Illinois joins hands with Kansas and Uncle Sam himself is taking a hand in the scrimmage. The oct pus may or may not be as terribe a critter as has been repretente¹. But one thing is certain—there never was an

The tariff revision idea is as dead as a door nail for a twelvemonth, and the truth is that popular sentiment regarding the matter seems to have been wrongly interpreted. Despite a great deal of newspaper representation to the contrary, it does not appear that there is any general and sincere desire
