WASHINGTON LETTER.

(From our Regular Correspondent.) Washington, April 15, 1905.

While the carping critics carp, as the President is fond of saying, the administration as daily demonstrating, in a quiet and unobtrusive manner, the benefits which this country can, and has, and will continue to bestow on the Philippines, not out of pure philanthropy, of course, but as a result of a determination to deal fairly with "the little brown man" and because of the long experience and superior wisdom of the United States.

The experience which the American colonies, the early Federation and the infant Republic gained at high cost, the little Filipino is profiting by now. In time he will enjoy all the prosperity of this country and will not have paid half the price, no, not a tithe of that which the sturdy American was compelled to pay before he knew as much about government and economics as he does now.

For the first time in their history the Philippines enjoy a stable currency, on the metric system, and they have made money acquiring it. Under the fatherly guidance of the Bureau of Insular Affairs, which direct all things Philippine bonds were issued to maintain the parity between the Philippine coinage and gold and the premium on these bonds has amounted to from \$1.18 to \$2.51 cents on each \$100 of every issue.

As the first two issues were refunded, the premium was nearly doubled so that the entire transaction has itself proved very profitable. These bonds were issued to purchase the Friars lands which will now be opened to private settlement. Bonds were issued to raise the purchase price on these lands and on the total issue of \$7,000,000 the premium was \$7.57 on every \$100. When the lands are sold to private parties, in small areas, the purchase price will be aggregated to pay off the bonds and it is probable that the purchase price will considerably exceed the total bond issue.

The last issue of Philippine bonds, made on March 10, amounted to \$2,500,000 was many times over subscribed and brought the highest recorded premium, \$9.06 on every \$100. The proceeds of this issue will be devoted to such public improvements as port and harbor works, bridges, school houses, court houses, penal institutions, etc.

Not only has the Philippine government been able to sell its bonds at a premium, because, of course, and in marked contrast with those of the little Republics in South America, for instance where the money lenders exact ruinous discounts, but now that the money is in the Philippine treasury it will be expended under the supervision of the best men this country can afford

men whose long experience in contracting for public improvements will insure to the Philippines the full value of every dollar of public funds expended. This affords another sharp contrast to the usual course followed in new and weak Republics.

President Lincoln Hulley.

Formerly of Bucknell, Writes About John B. Stetson University, Deland, Florida.

Florida is a land of blue skies, singing birds, beautiful flowers and soft breezes the whole year round. Hundreds of thousands of people stream into Florida from the North to spend the winter. The best thing about Florida is its climate. Next, its fine development. People North little realize that the University of Chicago is located in Florida. The John B. Stetson University of Deland, Florida, is organically affiliated with the University of Chicago. Its graduates receive Chicago degrees. Stetson has four Colleges and five schools, in 14 buildings with a Faculty of 48, the Faculty holding degrees from Chicago, Harvard, Yale, Dartmouth, Columbia, the U. of P., Bryn Mawr, Bucknell, Michigan, Denison, Utrecht Holland and other Universities. It has separate and distinct colleges of Liberal Arts, Technology, Law and Business. It has professional schools for Music, for Art and Normal and Practical work, an Academy which prepares for Chicago. Many people do not realize that a change has come over the South—that educational interests are booming. Stetson has a third of a million dollars in buildings and equipment, a quarter of a million in endowment, an endowed library, a beautiful auditorium, a ten thousand dollar pipe organ, a gymnasium complete, an enclosed athletic field with track, diamond, gridiron and tennis courts, five great laboratories, several large museums, a number of technological shops, electric lights, electric bells, steam heat, cement walks, shell roads, avenues, spacious campus, shrubbery and trees. It is the biggest educational proposition south of Johns Hopkins. A Pennsylvania citizen, John B. Stetson, the wealthy hat manufacturer of Philadelphia, has given it numerous buildings, large endowment and constant personal backing.

Letter to Frank Pearsal.

Emporium, Pa.

Dear Sir: Here's something every painter and builder ought to know.

Mr. J. J. Hall, Sheffield, Pa., painted two houses, 5 years ago, lead and oil; took 40 gallons. Last year, he painted Devco; bought 40 gallons had 10 left.

He is one of thousands. The knowledge is getting about pretty generally; that Devco goes further than anything else.

Have you found it out in your own experience?

How much further?

Suppose a job amounts to 10,000 square feet; how much less Devco could you buy?

Is it as easy to paint? Does it cost any more or less to put on by the gallon than anything else? how much?

If it costs no more to put on Devco by the gallon, it costs less by the foot, you know; for the gallon does more feet. How much less, do you find it, for wages?

Lasts say, twice as long; that is the owner's gain; but perhaps you reckon it yours; so do. The time, when that job comes in, is when he gives out the next job.

Who gets it?

Yours truly, F. W. DEVCO & Co., New York.

P. S. Murry & Coppersmith sell our paint.
