### WASHINGTON LETTER.

(Fromour Regular Correspondent.) Washington, May 20th, 1905.

"The protected hogs must take their hind feet out of the trough." "I demand the most favored nation treatment for ourselves in the construction of the Panama Canal." "For American manufacturers to sell to foreigners, at a profit, at from one-third to onehalf lower than they sell the same goods at home is not a square deal to the folks at home." With these characteristic and forceful, homely phrases President Roosevelt has launched a new issue, at least a new one for the Republican party, and there are strong indications that he will gain the support of the American people and put some hide bound ultra protectionists to confusion.

In his messages to Congress, last December, the President wrote, "I will have something to say on the tariff question latter on," but prominent members of his party who were permitted to read a proof of the message before it was made public pursuaded him to strike out the sentence. He yielded to their request, but then endeavored to secure some sort of an agreement from the leaders that provision would be made for a readjustment of the Dingley schedules later on. They had urged that agitation of the subject in advance would unsettle business, so he called them to the White House and asked what they thought of calling Congress in extra session this spring for the purpose of readjusting the tariff schedules. The stand patters claimed that it would require time for investigation and that the session had better be called in the Fall. To this the President agreed and October was fixed as the date of the special session. The President supposed, of course, that Congress would make provision for the existing schedules during the summer, and the Senate did, but the stand patters who control the House failed to do so and adjourn-A man who worries about the short- ed in fancied security, supposing that they had defeated the President. But they counted without their host.

The President is himself gratified at the turn the affair has taken. He believes in all the protection necessary to make up the difference between the wages American workmen and the wages of poorer paid foreign workmen, but in not one penny more. He has proved to his own satisfaction that there are some schedules of the Dingly tariff which American industries have outgrown and which en curing Coughs, Colds, Croup and are now being used to foster monopolies and extort exhorbitant prices from American consumers. He realies on the American people to realize that this is just one more step in the progress of his campaign against the great corporations and in favor of the square Most of the patent medicine testimon- deal for every American citizen. ly opposed to "those protected hogs who have grown so fast that they and get their hind feet in the trough while they prevent their weaker fellows from getting their share of the meal," and he counts ple for this new issue.

Who use molasses demand the best syrup obtainable. Treacle is not molasses al-though there's much treacle sailing under false colors. The difference between trea-cle and molasses lies in the fact that treacle comes from sugar in the process of making, while molasses is obtained in the process of rerefining. You can not get good out of bad, but you can get the best from the best which comes from the sugar.
