The College Bred R. R. Supt.

In railroad work we encounter green horns in all the various departments of the service. As new men are being hired all the time and the old timers put the new recruits through the mill by sending them after red oil to put in the red lanterns and having them try the lung tester or some other tricks. Each new comer takes his medicine and that is all about it. He in turn has his chance to laugh at the next victim, and soon. However in official circles, if any such things happen they seldom leak out.

The following true incident goes to show that there is once in a while a novice gets in the upper circle and proves that there is a good deal of railroad outside of books. Some years ago on a certain railroad in central New York, the president of the road had a son who went through college with flying colors and claimed to be familiar with railroad work from "A to Z." Accordingly his father appointed him Division Superintendent of one of the branches of the road. One day a train going north was side-wiped by a south-bound train while crossing over, and the tender of the engine of the north-bound train was damaged so badly that it would not hold water. Otherwise the engine and train were not damaged. The train was promptly side-tracked and the fire drawn on the disabled engine. The conductor wired the superintendent for another engine and the engineer wired to have his crippled engine towed to the shops. The Supt. flew in a rage and sent the following message to the engineer:

From S. 5-21-18.

To Engineer Train 135 at C.
Explain at once why you pulled fire on your engine. Why did you not put the broken tender on the siding, couple on a car of coal in its place and proceed with your train. Signed — Supt.

The engineer answered as follows:
From C. 5-21-18.
To — Supt. S. The engine I am running uses water as well as coal. Signed — Engineer. It is needless to add that no messages were exchanged.

Deafness Cannot be Cured.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness caused by Catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & Co., Toledo, O.
Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

A Touching Story.

Is the saving from death of the baby girl of Geo. A. Eyer, Cumberland, Md. He writes: "At the age of 11 months, our little girl was in declining health, with serious Throat Trouble, and two physicians gave her up. We were almost in despair, when we resolved to try Dr. King's New Discovery for Consumption, Coughs and Colds. The first bottle gave relief; after taking four bottles she was cured, and is now in perfect health." Never fails to relieve and cure a cough or cold. At L. Taggart's drug store; 50c or \$1.00 guaranteed. Trial bottles free.

No man over fifty should marry a woman who isn't a good nurse.

Is It Right.

Is it right that a property-owner should lose \$4.20 to let a dealer make 50 cents? A dealer makes more on fourteen gallons of ready for use paint, at \$1.50 per gallon, than our agent does on eight gallons of L. & M. paint and six gallons of linseed oil, which make fourteen gallons of the best paint in the world, at \$1.20 per gallon; the property-owner loses just \$4.20. Is it right?

It only requires 4 gallons of L. & M., and 3 gallons linseed oil to paint a moderate sized house.

Ten Thousand Churches painted with Longman & Martinez L. & M. Paint. Liberal quantity given to churches when bought from Harry S. Lloyd.

The Lassies

Who use molasses demand the best syrup obtainable. Treacle is not molasses although there's much treacle sailing under false colors. The difference between treacle and molasses lies in the fact that treacle comes from sugar in the process of making, while molasses is obtained in the process of refining. You can not get good out of bad, but you can get the best from the best which comes from the sugar.

We Sell Molasses

That comes from the best and it is the best. Try our New Orleans, finest quality, and be convinced.
