COWS AND THEIR MILK.

Deductions from Experiments as to the Quality of the Milk of Cows.

The matter of quality of the milk of cows has been pretty well settled by tests in this country, and English authority is in agreement with us...

1. That when a cow is in full milk and full flesh she will give her normal quality of milk for at least a limited time, even though the quality and quantity of food be very deficient.

2. That when in good condition a cow will take off her body whatever is deficient in food, in order to give her normal quality of milk.

3. That an extra supply of nutritious food, at all times increases the quantity of milk, but the percentage of fat is not in any way improved by it...

4. That an extra supply of nutritious food almost invariably very slightly increases the solids not fat of the milk.

5. That with a poor ration, a cow in full weight will lose carcass weight, while on a rich diet she will gain weight.

6. That although the percentage of fat in a cow's milk may vary daily we at present seem unable to control these variations or to account for them.

7. That for limited periods, up to one month or thereabouts, all ordinary quantities and qualities of food seem to have no material effect on the quality of the milk.

8. That some foods exercise a material effect in raising the melting point of butter.

9. That the aim of all producers of milk, butter or cheese should be to feed what will give quantity, in moderate amount and of a mixed nature, and the produce will be the best that the cow can give.

10. That extra quality must be looked for by improving the breeds, and judicious selection, rather than by any special foods or methods of feeding.

11. That the variations in the percentage of fat in a cow's milk are caused by something, but what that something is we at present do not know, though if we did we might be able to influence the quality.

THE DE LAVAL SEPARATOR CO. Randolph & Canal Sts. CHICAGO NEW YORK

THE WAITER WAS CURIOUS.

Poked His Hand Into a Bag of "Crab Apples" with Disastrous Result.

Four men, two of them carrying a big potato sack between them, walked into the Hotel Vendig cafe, at Twelfth and Market streets, shortly before closing time the other night, and sat down at one of the tables.

A German waiter took the order with one eye on the sack. Finally his curiosity got the better of him.

"Dot is a big bag, ain't it?" he said. "Yot is in him?"

"Apples, Fritz," said one of the men. "Take some home to the children."

The waiter accepted the invitation and plunged his hand into the sack. He brought it out again in a hurry, with a hard-shell crab clinging to one of his fingers.

Two hundred brothers and sisters of the crab promptly took advantage of the open mouth of the bag to crawl to liberty. They backed out of the sack with a rush and took possession of the cafe, nipping everything in reach.

Heroic waiters made a sortie with brooms and swept the crustaceans back into the bag and tied it up securely.

"Say, please," demanded the German waiter, sucking vigorously at his injured finger, "vot kind of abbles do you call dose?"

"Crab-apples," said the four men, in chorus.
