PASSING PERSONALS.

Miss Grace Barstow, of San Francisco, is the only woman violin-maker in the United States, and probably in the world. Moreover, she is a fine performer on the instruments of her own making. She is experimenting with native redwood as a base bar.

A famous Adirondack guide, in the days when the mountain region was a true wilderness, has just died at the age of 95. William McLaughlin was in the Adirondacks when there were none but old Indian trails, and he and St. Regis Indians cut new ones as the region began to be visited.

Green McCurtain, governor of the Choctaw nation, will take his place among the millionaires ere long. He settled up the affairs of the tribe recently, involving the sale of coal lands worth \$40,000.000. Of this purchase price Gov. McCurtain will receive ten

per cent. as commission, or \$4,000,000. Mrs. W. S. Pratt, of Atlanta, Ga., is said to be the only woman south of Chicago in the lumber trade. When the firm by whom she was employed went out of business without losing a day hunting a position she opened an office and began operations. she is head of a firm handling 100 cars of lumber monthly.

Henniker Heaton, who has done so much for the cheapening of postal communication in Great Britain, urgest the formation of a league to make the penny post universal. It is, he says, absurd to charge twopence-halfpenny for a letter to Calais or to New York, when a letter to Canada can pass through New York for a penny.

Mr. Edison has but one speech to his credit. He was to lecture on elcc-tricity before a girls' seminary, and was to be assisted by a friend named Adams to work the apparatus. He was so dazed when he arose that he simply said: "Ladies, Mr. Adams will now address you on electricity, and I will demonstrate what he has to say with the apparatus."

EDUCATIONAL ITEMS.

The income of Oxford university is slightly under \$350,000 a year.

The state forester of Massachusetts urges the study of forestry in the pub-

The opinion is making much headway in Germany that children should not be obliged to study out of school.

Under the auspices of the University of Frieburg, Switzerland, a business academy for women only has been

opened in that city. Swimming is part of the curriculum of the public schools of Yarmouth, England. The boys are taken to the shore in parties and are trained till they can

•wim 50 yards in the sea.

The imperial decree regarding the appropriation of temples for schools, says the Shanghai North China Herald, is being carried out in Anhul. At Luchoufu, four very large images, servants to the god of literature, have been torn down to make room for little Chinese 109 113 101 105 107 951 boys to study English.

The arrival of many Hindoos from India to enter as students at the Imperial university and schools of tech-nology at Tokio has been noted lately. It was intended to celebrate the festival of the great Indian national hero, Sivaji, at Tokio this year for the first time with great eclat.

In the coming autumn the schools of France are to experiment on an extensive scale with a system of teaching history by dolls dressed to represent various periods and characters. A suc-cessful exhibition of the method in Paris convinced educators that there was merit in the plan. The puppets are made to move, by means of silken cords handled from above, on a miniature stage. The dolls represent important scenes in the history of the country.

Wireless in New Zealand. The New Zealand postmaster general

hopes, with the cooperation of Australia, to have wireless telegraphy established across the Tasman sea within 12 months. The cost will be £28,000.

CHRONIC ERYSIPELAS

Cured by Dr. Williams' Pink Pills, Although Whole Body was Affected.

Et elas or St. Anthony's fire is a fortable disease on account most n. If of table disease on account of the burning, the pain and the disfigurement; it is also a very grave disorder, attended always by the danger of involving vital organs in its spread.

The case which follows will be read with great interest by all sufferers as it affected the whole bedread for the control of the vital and the control of the vital and the distribution of the vital and the distribution of the bedread to the occasion ever it comes, and to rule our own the water of the vital and the distribution of the burning that the

affected the whole body, and refused to yield to the remedies prescribed by the physician employed. Mrs. Ida A. Colbath, who was the victim of the attack, residing at No. 19 Winter street, Newburynort, Mass. says.

buryport, Mass., says:
"In June of 1903 I was taken ill with what at first appeared to be a fever. I sent for a physician who pronounced my disease chronic crysipelas and said it would be a long time before I got well.

THEIR DISCIPLINARY VALUE

VERY CONSIDERABLE AND GIRLS SECOULD NOT NEG-LECT THE STUDY.

Most School Girls Dislike Algebra-Mathematics a Fine Disciplinarian -It Helps One Acquire Perseverance, Moral Courage and Self-Control-Education Is Built on the Alphabet, the Multiplication Table and the Ten Commandments.

BY MARGARET E. SANGSTER. (Copyright, 1905, by Joseph B. Bowles.) I don't blame you much, Dorothy, for your great dislike of mathematics have never particularly enjoyed study ing them for my own part, and I have always looked with respectful wonder and almost awe on other people who have professed to find them delightful. Yet, my dear, the girl next you in the class may approach this subject in a quite different mood from yours. She may fully enjoy the abstract and concrete principles of the science of numbers; may fairly revel in difficult prop ositions, and may regard the hour for algebra, trigonometry or whatever else it may be as the most exhilarating hour of the day. Not infrequently two sister may be entirely in contrast when the question concerns this abstruse and, on the whole, formidable study; one may love it as much as the other loathes it You need not expect to receive much help from the people at home when you are puzzling over diagrams, examples and problems in mathematics. Most of us, after our school days, remember enough of what we learned there to enable us to foot up household accounts, and to see that we do not overrun our weekly or monthly income. But we do

not retain much more.

If we are thoughtless persons, we are apt to regret that we were compelled to spend a lot of time over things we did not like when there were so many other things that would have given us a great deal of pleasure.

But, Dorothy, stop a moment before you condemn your teachers for insisting on making mathematics the test of your scholarship. In the first place, it is good for most of us to do what we don't very much want to do. We are better for be ing compelled to exercise some self-de You and I are bound to meet obnial. stacles of one sort or another all along the road of life. If we are cowards, we shall shiver and shake and turn away and look for some little by-path by which we may avoid the issue. If, on the contrary, we are brave, we shall go boldly up to the thing in our path, and see whether it cannot be put aside. In order to get along creditably in this world. every one of us must have a good supply of moral courage and real force of char-These tasks of the schoolroom are chiefly valuable because in them there is hidden the element which turns the raw recruit into a soldier, the element called drill. You get an enormous amount of drill for your mind when you study mathematics. You may not find it agreeable, but that does not matter. The fruit will be reaped later on.

You need not laugh at me, Dorothy when I tell you that a girl who has been thoroughly trained and disciplined by struggles with mathematics, that for her mean conquest, will bear herself much more finely than one who has spent her time dawdling over lessons that never taxed her powers. For instance, it is a shame for a woman to scream when she sees a poor little mouse scuttling as fast as it can out of the closet, or to go into fits when a bat or a spider or some other uncanny creature crosses her field of vision. Women who do this are women who have never had any practical drill in self-control. You may not know it, but there is the greatest peril to women in not being able to keep a good grip of themselves.

I once met a lady approaching middle age, who boasted that she had never restrained an emotion in her life. "If anything goes wrong. I just go to pieces," she said, "and everybody has to fly around and wait on me." She seemed to think this a meritorius thing. In re ality, it was disgraceful. The one duty beyond all others for you and me. Dor othy, is to be equal to the occasion whenever it comes, and to rule our own spirit How are we ever going to rule anybody

Having said this, let me add that I look upon mathematics very much as the builder looks on the foundation of the house. If you are planning to build a beautiful mansion, with many rooms and corridors, with a tower on the and windows open wide to the sunshine you must first of all dig deeply into th earth and see that your underpinning will be safe and your foundation stable

disease chronic erysipelas and said it would be a long time before I got well.

"Inflammation began on my face and spread all over my body. My eyes were sockets. I was in a terrible plight and spread all over my body. My eyes were sockets. I was in a terrible plight and spread all over my body. The doctor said my for Burillo (Arr. 4.20 p. m.). Bolivar (Arr. 2.20 p. m.). The whole of education is built on the

pass. He asked if he might find shelter for the night, and the hospitality of the mountains was at once extended to him. Food and a bed and asylum for man and beast are always freely given by the dwellers in those hillside homes. Lying at full length on the cabin floor and ciphering by the light of blazing pine knots was a boy who seemed absorbed in his occupation. On inquiry, it transpired that this lad of 14, who had had very little schooling, was working his own way through algebra, patiently tackling every difficulty as he met it, and thus far he had had almost no help. The traveler discovered that the boy had a genuine love for learning; the sort of love that pushes a student on whether he has teachers or not. He was able o give him some suggestions, and after awhile to put him in the way of going to college. That mountain boy became

The little bag shown here, although of a well-known and popular design, presents modifications in the form of little side pockets, which are a decided improvement. The circular base measures ten inches in diameter, and must be constructed from stiff cardboard, and then covered on both sides with whatever material is selected. Anything with a smooth and dust-rejecting

A PRETTY GIFT

urface is to be recommended for this face cloth. The bag is formed from strip of material 36 inches long and 18 nches wide, three inches of the width being turned in and hemmed to form a wide frill, outside which rings should be sewn at intervals in which to thread the ribbon slide. Six pockets should be next constructed of double thickness of material, turning them in at their upper edges and machine-stitching, and making a button hole in each. The making a button hole in each. pockets should measure about six nches wide and eight inches high, and should be neatly stitched to the bag before it is made up. The whole can then be sewn to the base at once. It would look pretty to have the pockets of velvet in a contrasting shade or a deeper tone of the same color. Of course, the initials also must be worked before making up, and should be done in silk or one of the pretty silky cottons, in embroidery or satin stitch.

GOOD FOR THE HAIR.

Be Careful to Change the Part and Quite Often Change the Manner of Arrangement.

If you want to have a luxuriant head of hair at 70, don't part it in the same place from the time you leave school; if you do, you will have a "fly-walk" that would accommodate black beetles. No woman in the world has such beautiful hair as the woman who keeps well in sight of the prevailing fashion. means that she frequently changes her mode of dressing, and a change in dress ing is as good for the hair as intelligent irregularity is for the human mechanism. Those harmless little words, "I always do," have been the stumbling block in many and many a human life.

"Why do you always double on a win it so seldom comes off?" was asked a card player, who immediately replied, with a look of mingled pity and scorn: "Why, it is my system." It was a very bad system, but there was nothing more

So with your hair as with many of your habits, try swinging off once awhile into new grooves, and de and don't cramp yourself by a foolish regularity Remember the axiom: "Wise men change their minds," and it is to be hoped sometimes their habits.

Pretty Wedding Gift.

Antique brooches are popular with artistic folks as souvenirs to bring home from abroad. They are patterned after quaint old models. One beau-tiful brooch just sent to a local bride

Hard Record to Beat.

Friend-Do you think that automobiles rill eventually take the lpace of the railroads? Auto Enthusiast (gloomily)—I hardly think so. The railroad killed 15,000 peo-ple last year in this country alone.—Chicago Tribune.

Advice.

The Bride—He offered to toss up a cent to decide whether I should have my way or he should have his. O course, that seems fair—

Married Friend-Nonsense! Don't you make any concessions whatever.-Cleveland Leader.

After all that has been said and done, he cold truth of the matter seems to e that a combination of water wagon and brewery truck won't work.—N. Y.

Six Doctors Failed.

six Doctors Failed.

South Bend, Ind., Sept. 25th (Special).—After suffering from Kidney Disease for the distinguished professor in a great university, proving himself not only skilful in mathematics, but able to master other studies in many fields.

Dorothy, the real value of mathematics for you will be to convince you that whatever other girls have done, a girl like you may do. Also, it may help you to adopt the motto of the wisest of men, "Whatsoever thy hand findeth to do, do it with thy might."

ATTRACTIVE WORK BAC.

This Shows Some Improvements on the Popular Design in the Shape of Little Side Pockets.

The little bag shown here, although of a wall-known, and ropular design. "The real value of going to collect the only relief, but a speedy and complete cure in Dodd's Kidney Pills, and they not only order the very same, and tried six doctors to no good. Then I took just two boxes of Dodd's Kidney Pills, and they not only cured my kidneys, but gave me better health in general. Of course I recommended Dodd's Kidney Pills to others, and I know a number now who are using the with good results."

Mr. Laudeman's case is not an exception. Thousands give similar experiences. For there never yet was a case of Kidney Trouble from Backache to Bright's disease that Dodd's Kidney Pills could not cure. They are the only remedy that ever cured Bright's Disease.

"De man wif a clean conscience," said Uncle Eben, "feels mighty comfortable, but he doesn' do near de braggin' of de man wif no conscience at all."—Washington Star.

SALT RHEUM ON HANDS.

Suffered Agony and Had to Wear Bandages All the Time-Another Cure by Cuticura.

Another cure by Cuticura is told of by Mrs. Caroline Cable, of Waupaca, Wis, in the following grateful letter: "My husband suffered agony with salt rheum on his hands, and I had to keep them bandaged all the time. We tried everything we could get, but nothing helped him until he used Cuticura. One set of Cuticura Soap, Ointment and Pills cured him entirely, and his hands have been as smooth as possible ever since. I do hope this letter will be the means of helping some other sufferer."

Many a young man asks for a girl's hand when what he really wants is her father's pocketbook. — Philadelphia In-

Piso's Cure cannot be too highly spoken of as a cough cure.—J. W. O'Brien, 322 Third as a cough cure.—J. W. O'Brien, 322 Third Ave., N., Minneapolis, Minn., Jan. 6, 1900. Doing without finishing is many a man's finish.—Baltimore Herald.

AMERICAN WOMEN FIND RELIEF

The Case of Miss Irene Crosby Is One of Thousands of Cures Made by Lydia E. Pinkham's Vegetable Compound.

How many women realize that men struction is the balance wheel of woman's life, and while no woman is entirely free from periodical suffering, it is not the plan of nature that women should suffer so severely.

Thousands of American women, however, have found relief from all monthly suffering by taking Lydia E. Pinkham's Vegetable Compound, as it is the most thorough female regulator known to medical science. It cures the condition which causes so much discomfort and robs menstruation of its terrors.

Miss Irene Crosby, of 313 Charlton Street East Savannah, Ga., writes:
"Lydia E. Pinkham's Vegetable Compound is a true friend to woman. It has been of great benefit to me, curing me of irregular and painful menstruation when everything else had failed, and I gladly recommend it to other suffering women."

Women who are troubled with painful or irregular menstruation, back-Thousands of American women, how-

Women who are troubled with painful or irregular menstruation, backache, bloating (or flatulence), leucorrhoma, falling, inflammation or ulceration of the uterus, ovarian troubles, that "bearing-down" feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should fake immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, Lynn, Mass., for further free advice. Thousands have been cured by so doing. so doing.
