#### ARE STRONGLY CENSURED.

House Cleaning Committee of New York Life Insurance Co. Denounces the Act of McCall and Hamilton.

New York, Feb. 9.—The special committee appointed by the trustees of the New York Life Insurance Co. to investigate the affairs of the company made a partial report of its labors to the directors yesterday. This report deals only with the relations of An-drew Hamilton, the legislative agent, This report with the company and is a severe ar-

raignment of his methods.

John A. McCall, late president of the New York Life, also comes in for a share of the committee's criticism.

He is blamed for his methods in connection with the "bureau of taxation and legislation" during the last ten years and for allowing Hamilton to pay out vast sums without a proper accounting.

Special attention is called to remit-

tances of \$10,000 to Mr. McCall in London and \$134,500 to Hamilton in Paris in 1900. The purpose of these remittances the committee says it has been unable to ascertain, and recommends that proceedings be instituted against Hamilton and McCall for an accounting or repayment.

The committee adds on this point that application has been made to Mr. McCall for information regarding the transactions, but it is informed by Mr. McCall's family that his physical and nervous condition is such that the subject cannot be taken up at present. As to Mr. Hamilton's health, which has been represented as being bad, the committee says it has been in-formed that he was physically able to cravel and has exerted every effort to induce him to return to make a full disclosure of his transactions, but without success.

#### A MINE HORROR.

Twenty-seven Men are Believed to Have Perished in a Shaft.

Charleston, W. Va., Feb. 9.-At least 27 men are supposed to have met death in a terrible mine explosion in the Parallel mine of the Stewart Colliers Co. near Oak Hill. Thirty-nine men were employed in the mine and only 12 have escaped alive. At midnight six bodies had been recovered near the mouth of the mine and it is certain that all the others in the mine are dead.

Robert Feathergill escaped with a broken leg. The explosion occurred at 1:30 o'clock Thursday afternoon and was caused by a pocket of gas which was struck in the mine. The explosion was terrific and it is thought that many of the miners were killed outright by the explosion. The system of fans was completely wrecked by the explosion and all all was the off the explosion and all air was shut off from the mines, leaving the men who had not been killed by the explosion to smother to death. The mine is a shaft about 700 feet deep and the unfortunate miners had little chance of

#### WESTERN CANADA'S MARVELOUS RETURNS.

The increase in the crop returns of the Canadian West, in the past seven years, has approached the marvelous, and there is no reason to believe that a corresponding increase will not re sult for many years to come. The increase has been particularly noticeable in what was formerly known as the Northwest Territories, but which, on September 1, 1905, became the provinces of Alberta and Saskatchewan. From the official returns we find the following results in the acreage sown to wheat, oats and barley in the years mentioned, and a more favorable showing cannot be pointed to in any other

country	during a li	ke period.	
	Wheat.	Oats.	Barley.
1898	307,580	105,077	17,092
1899	363,523	134,938	14,276
1900	412,864	175,439	17,044
1901	504,697	229,439	24,702
1902	625,758	310,367	36,445
1903	837,234	440,662	68,974
1904	965,549	523,634	98,154

The yield has been uniformly good every year except 1900, when there appears to have been a slump all along the line. This, however, was more than compensated for in the following year, when the bumper crop in wheat, oats and barley put the returns of all previous years completely in the shade and gave an impetus to settlement in the west which has prevailed to the present, as the following table by bush-

els will show:		
Wheat.	Oats.	Barley.
1898 5,542,478	3,040,307	449,512
1899 6,915,623	4,686,036	337,521
1900 4,028,294	4,226,152	353,216
190112,808,447	11,113,066	795,100
190213,956,850	10,661,295	970,417
190316,029,149	14,179,705	1,842,824
190416,875,537	16,332,551	2,205,434

It will be seen that the number of acres sown to wheat, oats and barley in 1898 was 429,749, and that this had Increased in 1904 to 1,587,337. The total crop in the cereals mentioned was 9,033,297 bushels in 1898, and in 1904 it had grown to the magnificent total of 35,413,522. In the year just closed the "forward movement" in the agriculture of the west has been the wonder and envy of the world. New sections of the country have been placed under tribute to the plow and harrow and the grain area has been largely increased. This is particularly the case where it has been demonstrated that "Alberta Red" winter wheat may be successfully grown, and along the lines of the new railways towards the center of the counutry, where mixed farming prevails.

The future of the Canadian West is assured, and for years to come it is bound to be the land of promise to the agriculturist of every nation and of every clime, and the land of oppor-tunity to every settler within its

Just pure linseed is the "life"—the one great requisite of good paint for which there is no substitute—and the sure way to get the pure, fresh linseed oil is to buy the oil and C separately. For every gallon of Kinloch Paint buy one gallon of linseed oil. This makes two gallons of-paint, ready for use. You then know that the paint you're putting on your house is alive—"the genuine oil is in it," and paint is not paint unless it contains 50x of really pure oil.
