# WESTERN CANADA.

Says Our Prairies Will Be Filled Up in Ten Years.

L. A. Stockwell, of Indianapolis, a United States land man who made an extensive tour of inspection in the west, wrote the following article, under date of Jan. 8, for an Indiana publication:

"States." In this letter I propose to show by extracts from my note book that thousands who have come up here from the "States" have succeeded far beyond their most sanguine expectations.

Mr. N. E. Beaumunk, of Brazil, Indiana, was earning \$100.00 per month with a coal company. At about the age of 40 he had saved about \$3,000. Four years ago he landed near Hanley, Sask. He now owns 480 acres of land. Last fall (1905) he threshed 4,700 bushels of wheat and 3.100 bushels of oats. His wheat alone brought him over \$4,000, which would have paid for the acres that it grew on. He is to-day worth \$15,000.

This Is Making Money Fast.

In Feb., 1902, J. G. Smith & Bro. were weavers in a big cotton mill in Lancashire, England. Coming here, they arrived in Wapella, Sask., with \$750.00 between them. They were so "green" and inexperienced that all they could earn the first summer was \$6.00 per month, and the first winter they had to work for their board. The next year, 1903, they took homesteads. and by working for neighbors they got a few acres broken out, upon which the next year they raised a few hundred bushels of wheat and oats. They also bought a team and broke out about sixty acres more. In 1905, they threshed 17,000 bushels of wheat from it, and 13,000 bushels of oats. Their success being then assured, they borrowed some money, built a good house, barn and implement shed, and bought a cream separator, etc. They now have a dozen cows, some full blooded pigs and chickens, good teams and implements to match, and are on the high road to prosperity. Here are three cases selected from my note book from among a score of others. One, a mine boss, one a farmer, and one a factory operator. With each of them I took tea and listened to their story. "I

hoped to better my condition," said "I thought in time I might make a home," said another. "I had high expectations," said the other, and all said that "I never dreamed it possible to succeed as I have."

#### Like Arabian Nights. Everywhere, on the trains, at the hotels and in family I have been told

successes that reminded me more of the stories in the Arabian Nights than of this matter-of-act workaday world. Yields of wheat from 35 to 53 bushels per acre, and of oats of from 60 to 100 bushels, are numerous in every locality and well authenticated. At Moose Jaw, Lethridge, Calgary, Edmonton, Regina, Brandon, Hanley and many intermediate places I saw cattle and young horses fat as our grain-fed animals of the "States" that had never tasted grain, and whose cost to their was almost nothing. At Moosomin I saw a trainload of 1,400 steers en route to England, that were shaky fat, raised as above stated. If the older generation of farmers in Indiana, who have spent their lives in a contest with logs and stumps as did their fathers before them, could see these broad prairies dotted with comfortable homes, large red barns, and straw piles innumerable, and the thriving towns with their towering elevator jammed to the roof with "No. 1 hard," and then remember that four or five years ago these plains were tenantless but for the badger and coyote, they would marvel at the transformation. Then if they followed the crowds as they emerged from the trains and hurried to the land offices, standing in line until their respective turns to be waited on came, and saw with what rapidtheir long stretches of yellow stubble standing high above the snow, what must they be in summer time, when covered with growing or ripening grains? Speaking of winter, reminds me that our Hoosier friends shrug their shoulders when they read in the Chicago and Minneapolis dailies of the temperature up here. For that very reason I am here this winter. The Canadian literature with its pictures, half-tones and statistics, gives a good idea of her resources, but thirty or forty degrees below zero sounds dangerous to a Hoosier, who nearly freezes in a temperature of five above, especially when accompanied by a wind, as it often is, but the fact is, when it is very cold here it is still and the air being dry, the cold is not felt as it is in our lower latitudes, where there is more humidity in the atmosphere. I am 56, and I never saw a finer winter than the one I am spending up here. I arrived in Winnipeg Nov. 9, and have not had the bottoms of my overshoes wet since I entered Canada. Under a cloudless sky I have ridden in sleighs nearly a thousand miles, averaging a drive every other day. Stone masons have not lost a week's time so far this winter. Building of all kinds goes right ahead in every city and hamlet, as though win-

Information concerning homestead lands in Western Canada can be had from any authorized Canadian Government Agent, whose advertisement appears elsewhere in this paper.

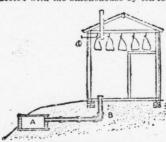

ter were never heard of.

#### CONVENIENT SMOKE-HOUSE

One Which Can Be Built at Small Expense and Which Will Do Good Work.

A smokehouse like the one shown is a good thing to have on every farm. Build of matched boards with shingle roof. Six feet square is a good size. Build close to a side hill so that a small furnace, A, may be made of clay, bricks or sheet iron or a large tile may be used. This should be connected with the smokehouse by ten feet

THE SMOKE HOUSE.

of eight-inch tile, B. A piece of stovepipe should lead out through the roof, having a damper at D that can be worked from the outside of the house Hang meat in the house, explains the Farm and Home, build a fire at the furnace of green birch chips, turn the damper so as to let the draft out through the stovepipe till the fire gets going well, then shut the damper and cover draft in furnace and the smokehouse will do business for six hours at least.

#### A GRAIN BIN.

Plan of One Which Will Economize Space, and Be Easy of Access.

A grain bin somewhat similar to that shown in the cut was recently seen by the writer, and its economy of space struck him favorably.

Its thickness from the wall out is not more than one foot, yet because it reaches to the floor and can be carried up four feet from the floor, its capacity is large. One-half of the front is hinged so that all the contents can be easily reached, even when the grain is nearly used up. For limited quarters, says the Farm Journal, such bins would certainly prove very useful.

## SUGGESTIONS.

Buy seed corn on the ear, when it can be obtained in that way. See that the seed corn is all germinable.

While the mows are full of hay, it is a good time to fix the pulleys in the roof of the barn for using the horse fork next year. Not so much danger of falling and getting injured.

When it gets so that we can dig a bit of horseradish with the pick or crowbar, it is a sure sign that spring is coming. Keep up your spirits; horseradish is the sure forerunner of spring .- Farm Journal.

The chief enemies of wheat are the Hessian fly, chinch-bug and grain-plant louse. The chinch-bug is credited with annual ravages to the total of \$20,000,000, which is probably a low

## Man Is Master of the Land.

cannot be overcome by man if those conditions are such that they interconditions are such that they interfere with the growing of crops. What seems impossible now will be possible later, when the value of land has risen to the point where great operations will pay. The sandy, leachy soils can be covered with a layer of clay and wrote the Postum and Grape-Nuts adity these lands are being taken, they would certainly catch the "disease" and want some of it, too. If these and want some of it, too. If these ard lands watered. The time will arid lands watered. The time will quiries of this kind, that it is a simple of the results and the second water and the second water arid lands watered. when man will put into use every foot of kand not closed up by the eternal ice around the poles. Even in the far north, glass gardens Even in the far north, glass gardens will yet become numerous and beat Hand." (Mrs. Post has assisted him back the frost line.

## Alfalfa Pointers.

Alfalfa is a deep rooted plant, hence requires soils in which the subsoil is of such a nature that the roots can readily penetrate it. It must be well drained to a depth of at least two feet

or the alfalfa will not prosper.

Any field likely to be under water for more than 36 hours at a time is quite unsuitable for alfalfa. The same is true of a field with hardpan subsoil within two feet of the surface.

To get a stand of alfalfa sow sufficient good seed which you know will germinate. Have the land well pre-pared and in a good state of fertility, and be sure that the land is well drained.

## Fertilizers.

A man must use fertilizers intelligently or he will throw away a great deal of money upon them. It is absurd for a farmer to purchase a fer-tilizer just because it is a valuable fertilizer and put it upon land that he does not know needs fertilizers. A man should not expend a dollar in fertilizers till he knows what kinds he needs. If his land is rich in a certain element he will but throw money away if he buys fertilizers to put on his land. Wasting money in this way is one of the penalties of not knowing Caught on the Rebound.

Slimm-What are you going to have for dinner to-day, Mrs. Hasher? I'm hungry as a wolf.

Mrs. Hasher—We are going to have lamb stew, Mr. Slimm.

"What! again? I'm tired of lamb!"

"Huh! Then you can't be hungry as a wolf."—Columbus Dispatch.

Very Cheap.

"The really rich are the only ones that ought to put on airs."
"Not on your life! Anyone can afford to do that! There's nothing cheaper in the world."—Detroit Free Press.

Pretty Near It.

Teacher—What, Tommy, is the meaning of the word "bigotry?"
Tommy (hopefully)—It's when a man married two women.—Half Holiday.

#### MISTAKE ABOUT FATHER.

Boys Thought He Was to Be Pitied, But Found They Were Mistaken.

taken.

At the Waldorf they are telling this story of a Pittsburg millionaire who is over 70, and the way he tooled his son and nephew on a recent visit to the city of the Great White Way. The two young men dined with "father" every evening, and then watched him take the elevator to his quarters, relates the New York Tribune.

"Too bad father has to go to bed at mine every evening," said the son.

"He doesn't have much fun, does he?" returned the nephew.

"Wonder if he goes to sleep right away, or if he'd like us to stay and talk to him?" from the son.

"Let's go up and see," said the nephew, feeling the full grip of compassion.

They found his shoes outside the door waiting for the coming of the bootblack, and there was no light in the transom.

"Poor old man, he doesn't have a very good time over here," they chorused. Then they went out into the night in a cab, and toward midnight turned into one of the gilded mirrored lobster places. When they were finally seated about a table and had given the waiter his order, they looked about the room. The first individual to meet their astonished gaze was "father," in full evening drees, pouring champagne into a glass which was held by an actress.

"How about the shoes in front of your door?" they asked him afterward.

"It's a pity a man of my age and money can't have two pairs of shoes, my children," he said, with a wink. "Those were my old shoes."

Quite a number of eminent gentlemen have lately inaugurated retorms without meaning to do it.

# A PERFECT HAND.

How Its Appearance Became Familiar to the Public.

The story of how probably the most perfect feminine hand in America became known to the people is rather

interesting.

As the story goes the possessor of the hand was with some friends in a photographer's one day and while talk-There are no soil conditions that ing, held up a piece of candy. The pannot be overcome by man if those pose of the hand with its perfect conto photograph it. The result was a beautiful picture kept in the family until one day, after reading a letter evident some people are curious to know, suppose we let the advertising department have that picture of your in preparation of some of the most famous advertisements.)

There was a natural shrinking from the publicity, but with an agreement that no name would accompany the picture, its use was granted.

The case was presented in the light of extending a welcoming hand to the friends of Postum and Grape-Nuts, so the picture appeared on the back covers of many of the January and February magazines and became known to millions of people.

Many artists have commented upon it as probably the most perfect hand in the world. The advertising dept. of the Postum

Co. did not seem able to resist the temptation to enlist the curiosity of the public, by refraining from giving the name of the owner when the picture appeared, but stated that the would be given later in one of the newspaper announcements, thus seeking to induce the readers to look for and read the forthcoming advertisements to learn the name of the owner.

This combination of art and com-merce and the multitude of inquiries furnishes an excellent illustration of the interest the public takes in the personal and family life of large manufacturers whose names become household words through extensive and continuous announcements in newspapers and period-

# SICK HEADACHE Positively cured by these Little Pills.

They also relieve Dis-ress from Dyspepsia, In-ligestion and Too Hearty cating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste n the Mouth, Coated rongue, Pain in the side, rorpid Liver. They

regulate the Bowels. Purely Vegetable. SMALL PILL. SMALL DOSE. SMALL PRICE.

Nasal CATARRH
In all Its stages.
Ely's Cream Balm CATARRH cleanses, soothes and heals

the diseased membrane. It cures catarrh and drives away a cold in the head

quickly.

Cream Balm is placed into the nostrils, spreads over the membrane and is absorbed. Relief is immediate and a cure follows. It is not drying-does not produce sneezing. Large Size, 50 cents at Drug-gists or by mail; Trial Size, 10 cents.

ELY BROTHERS, 56 Warren Street, New York.

WHOOPING COUGH Lickes Drug Co., Mfrs., CLEVELAND, O.

This is the butcher of Spotless Town. Whose tools are bright as his renown. To leave them stained were indiscreet. For folks would then abstain from meat. And so he brightens trade you know. By polishing with SAPOLIO.
