FOR NERVOUS PEOPLE

A Michigan Mother Preserved to Hei Family by Dr. Williams' Pink Pills.

When the blood is impoverished the nerves starve and neuralgia or something more serious swiftly follows. Nervous people are generally pale people. By supplying through the blood those vital elements that the nerves need, Dr. Wil-

elements that the nerves need, Dr. Williams' Pink Pills for Pale People have performed those remarkable cures that make it impossible for any nervous sufferer to neglect them.

A recent case is that of Mrs. Peter Morrissette, of No. 315 Eleventh street, Alpena, Mich., who writes as follows:

"My trouble started with childbirth. After one of my children was born I had a kind of paralysis. I was very weak and my mouth was a little crooked. I was always tired and was so nervous that I could not bear to hear a dog bark or a bell ring—even the little bird in its cage would annoy me. My heart fluttered a great deal and I had dizzy spells. I was not able to be left alone.

"My doctor gave me different kinds of medicine, changing it several times.

"My doctor gave me different kinds of medicine, changing it several times. When it was evident that he could not help me he said he did not understand my case. This was three years ago and I was very much discouraged, when my brother, who had taken Dr. Williams' Pink Pills, recommended them to me. I tried them and oticed a change for the better when I was taking the second box. Dr. Williams' Pink Pills cured me and I have been well ever since. I now do all have been well ever since. I now do all my own housework, sewing and wash-ing for seven of us."

Dr. Williams' Pink Pills have also

Dr. Williams' Pink Pins have also cured diseases caused by impure or impoverished blood such as rheumatism, anemia and after-effects of the grip.

All druggists sell Dr. Williams' Pink Pills or the remedy will be mailed, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y.

YARNLETS RARE

A writer tells this story of old-time In dianapolis: "The people living near a veteran pork packer's establishment stood the smells a long time, but at It t entered a complaint. The case was brought up in a squire's court, and the defendant, after listening to the charges attentively, remarked in an injured tone: "Well, it seems to me that any man who doesn't like the smell of a hog is just a leetle too good for Indianapolis.

He went into a drug store and bought a bottle of some patent stuff, which was advertised thus: "No More Coughs. No More Colds. 25 Cents a Bottle." Three days later he went to the druggist complaining that his throat was stopped up, and that he could scarcely breathe. "I've drunk all that patent cough mixture," he said. "Drunk it!' yelled the man; why, that's an India rubber solution to put on the soles of your boots!"

"Who ever saw a perfect man?" asked the revivalist. "There is no such thing. Every man has his faults, plenty of them." The revivalist continued: "Who ever saw a perfect woman?" At this juncture a tall, thin woman arose. "Do you mean to say, madam," the evangelist asked, "that you have seen a perfect woman?"
"Well, I can't just say that I have seen her," the woman replied, "but I have heard a powerful lot about her; she was my husband's first wife."

Her stock of German was scanty. The day after her arrival in Berlin she went to make a purchase. After se had made known her wishes in halting German the cld woman who waited upon her exclaimed: "Is the fraculein an American?" The fracu-lein was. "And do they all speak like you?" continued the old German. On receiving an affirmative answer she she hilled her hands to heaven with the verds: "Thank God! My boy went to America to escape the conscription. He does not speak a word of English, but if they all speak like you my poor boy will understand every word."

PASSING PERSONALS.

STUDYING WATER POWER.

The French Government Is Anxious to Assist Industrial Development.

The French government is pursuing a course which promises to result in great benefit to the manufacturers of erating power for the service of fac-tories, reports the New York Tribune. Industrial men in the United States have made many serious mistakes in the past by developing water power for factories, only to find that lack of water at certain periods of the year compelled discouraging and costly shutdowns or the installation of re-serve steam power plants. France does not purpose to have her manufacturers make such mistakes as these in the future, and has begun the work of classifying and controlling her streams. In the United States hydraul-ic enterprises have been limited to great streams and executed mainly by private enterprise. The United States has never attempted a scientific examination of its resources with a view to enabling towns and villages on streams of minor consequence to put to profit the power now lost. This is what

France now proposes to do. In France the rivers susceptible of being controlled with a view to in-dustrial utilization are numerous. But before erecting hydro-electrical works of importance, it is very important to know the variations in the volume of the stream to be utilized at various seasons of the year. The factors to be investigated are the surface

COMPASS OF LITTLE USE.

The Instrument on Submarine Boat Ceases to Point North Under Water.

Talking with a young naval officer, I learned something about submaring boats that astonished me, says a Brookthat nation, by surveying the rivers and streams of the country in order to determine their capacity for genridiculed the value of such vessels for warfare. Then he told me the strange. inexplicable fact that after the boat is entirely submerged the compass ceases to point to the north. It flies around any old way and cannot be relied upon for steering. Even when the water is clear and still the man at the lookout cannot see more than 20 feet in front of the bow.

Rough water on the surface has the effect of giving an opaqueness to the sea underneath—the opposite of theory. The approach of a submarine can be detected by the masthead that stands out of the water. The vessel rarely descends more than ten or twelve feet below the surface. The general supposition that the boat flounders about in the mud is erroneous.

But the impossibility of steering by ompass destroys the practicability of this weapon for actual warfare. In an engagement the submarine would be as likely to torpedo friend as enemy. All manner of strange currents exist under the surface of the sea, and as they have the boat wholly in their grasp she might be turned entirely around in a quarter mile's run. Many of the most expert men in the navy are frying to divise means to overcome the effect of submersion upon the compass.

"Dew Ponds."

The "dew pond" is a curious Stone age relic yet to be traced in Great Britain. In the absence of springs, broad hollows were scooped out, and these were covered with straw or other non-conducting material, with a thick layer of clay and stones on top. At night the cold surface of the clay condensed an abundance of water for the cattle to drink.

Safe Assertion.

For Sick Women To Consider

FIRST.—That almost every operation in our hospitals performed upon women becomes necessary through neglect of such symptoms as backache, irregular and painful periods, displacements of the female organs, pain in the side, burning sensation in the stomach, bearing-down pains, nervousness, dizzlness and sleeplessness.

SECOND.—The medicine that holds the record for the largest number of absolute cures of female ills is Lydia E. Pinkham's Vegetable Compound. It regulates, strengthens and cures diseases of the female organism as nothing else can.

For thirty years it has been helping women to be strong, curing backache, nervousness, kidney troubles, inflammation of the female organs, weakness and displacements, regulating the periods perfectly and overcoming their pains. It has also proved itself invaluable in preparing women for childbirth and the change of life.

THED.—The great volume of unso-licited and grateful testimonials on file at the Pinkham Laboratory at Lynn, Mass., many of which are from time to time published by permission, give ab-solute evidence of the value of Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice.

Mrs.Pinkbam's Standing Invitation to Women.—Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. From symptoms given, your trouble may be located and the quickest and surest way of recovery advised. Mrs. Pinkham is daughterin-law of Lydia E. Pinkham and for twenty-five years under her direction and since her decease she has been advising sick women free of charge. Out of the vast volume of experience in treating female ills Mrs. Pinkham probably has the very knowledge that will help your case. Surely, any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance. Mrs. Pinkham's Standing Invitation

THE BEST COUGH CURE
