

CAMERON COUNTY PRESS.

H. H. MULLIN, Editor. Published Every Thursday.

TERMS OF SUBSCRIPTION. Per year in advance \$2.00. If paid in advance \$1.75.

ADVERTISING RATES:

Advertisements are published at the rate of one dollar per square for one insertion and fifty cents per square for each subsequent insertion.

Legal and Official Advertising per square three times or less, 40 cents subsequent insertion 15 cents per square.

JOB PRINTING.

The Job Department of the Press is complete and affords facilities for doing the best class of work.

Kind Men Needed.

If one were to go to the president of the United States and ask him to name the country's greatest need, he would reply in his quick, conclusive way: "Clean men."

Some Dogs Are Lucky.

A big touring car rolled up to the entrance of a roadside "hotel" over in Jersey one day lately with two men on the front seat and two women and a beautiful cocker spaniel in the tonneau.

It is the opinion of an eastern contemporary that every sign of the times indicates that the people of America are advancing to a higher ethical plane.

Things that heretofore have been tolerated are now condemned. The ancient excuse that "I have done it—that it is the way of the world—is less accepted.

An Oklahoma historian raises the question whether men of the European race saw that country before John Smith landed at Jamestown.

Doubtless they did not, since De Soto did not go so far west and Coronado hardly so far east. But the white man has been making up for lost time by getting into the garden patch of America with both feet, and to the number of nearly 10,000,000 in the last 16 years.

Justice Gould, of Washington, in sentencing a man to be hanged, named Tuesday, October 30, as the day of execution.

"I see no reason," remarked his honor after court had adjourned, "why Friday should be hanged-man's day exclusively. Friday is as good a day as any other, and I do not wish to put the slightest opprobrium upon it."

THE WATCH INDUSTRY.

Killed by British Free Trade and Promoted by American Protection.

Massachusetts is one of the states where watches are made in large quantities. Certain congressmen of Massachusetts have just been thrown hard by the other Republicans in congress because they made an appeal for a chance to make a revision of the protective tariff, to push this country along toward free trade.

GERMANY'S BACK DOWN.

Knew Who the Sufferer Would Be in a Tariff War with America.

As this paper has frequently suggested, the Germans are so far from looking for a tariff war with the United States that the vote in the Reichstag to extend the existing duties in favor of this country to June 30, 1907, was almost unanimous.

OPINIONS OF EDITORS.

"La Follette is hailed for 1901 as 'the ideal Democratic Moses.' As Moses never reached the promised land, the title may be considered prophetic.—Chicago Post.

"The anti-imperialists are at it again. At least the Salem (Mass.) Civic League demands that a large picture of Theodore Roosevelt be removed from a store front because it mars the beauty of the town.—Indianapolis News (Ind.).

"It is for the farmers of Iowa to say with which cause they propose to be identified—that represented by the Calhoun-Cleveland-Cummings school of political theorists, or that of McKinley, Dingley and Roosevelt.—Des Moines Capital.

"It will be an easy and a pleasant task for the Republican newspapers and the Republican stump orators in the congressional campaign of 1906 to show that the American people are vitally interested in keeping the Republican party in control of the government.—St. Louis Globe-Democrat.

"Protection, adjusted to the varying requirements of the nations that adhere to the system, unquestionably is productive of good, and the fact that it is so generally practiced is its vindication.—Troy Times.

"The salaries and wages paid by the United States Steel corporation in 1905 amounted to \$128,952,955, and 23.88 per cent. of the preferred stock was subscribed for at the end of 1905 at \$100 per share. Here is another argument against protection! Power with a law that brings prosperity and gives employment to labor.—Salem (Ore.) Statesman.

CONDITION OF TREASURY.

Prosperity and Good Times Under the Operation of a Protective Tariff.

On April 30, a year ago, we had a deficit of \$37,714,956. On April 30, this year, we had a surplus of \$3,359,671, a gain of \$41,074,627. The surplus at the end of the fiscal year will undoubtedly be much more than it is now.

Two men recently took an evening train out of the Grand Central depot for Boston. They were both extensive travelers. The question arose as to the grandest sight they had witnessed. They told of the beauties of nature, of great buildings, etc. One remarked:

"After all, the grandest sight, in my opinion, is a factory and its hundreds of lights at night. As we pass through South Norwalk, Stamford, Bridgeport, New Haven, Wallingford, Meriden, Hartford, Springfield and Worcester, we shall see hundreds of factories all lighted and hear the hum of wheels as the night shifts are turning out wares for sale and distribution all over the world. Not only is this true in Connecticut and Massachusetts and Rhode Island, but all over the country. These night workers are getting double pay, or at least time and a half, and their earnings are enormous."

Such is prosperity and good times. Times that we know only under the operation of a protective tariff. Not only are we buying about all we can produce ourselves, but a billion of dollars' worth of merchandise abroad, paying a duty on over half of it to add to our internal revenue for the purpose of meeting the expenses of the government. It is the most equitable and the least burdensome method of taxation in existence, for much of it is paid by foreigners to get their goods into our market. And so the perfection of the Dingley law is seen in every detail. A perfectness never known before and which could not at present be equaled through any revision of our present most admirable and most successful tariff.

BUYING PAINT.

Springtime—after the weather has become well settled—is painting time. There is no dust flying, no insects are in the air at that time ready to commit suicide by suffocation in the coat of fresh paint.

It should be a habit with every property owner every spring to look over his buildings, etc., and see if they need repainting; not merely to see if they "will go another year," but whether the time has not come for putting in the proverbial "stitch in time" which shall eventually "save nine."

Paint lets go because linseed oil, which is the "cement" that holds all good paint together, gradually decays or oxidizes, just as iron exposed to air and dampness will slowly decay or oxidize.

This explains why it is better economy to repaint a little before it becomes absolutely necessary than a little after. When the paint is once dead the fresh coat will pull the whole coating off.

When it comes to picking out the paint it is not necessary that one should be a paint chemist, any more than one should be an oil chemist when buying kerosene, or a department store buyer when selecting shirts, or a soap chemist when buying soap.

But paints sold in responsible stores under the brands of reputable manufacturers are all good products, differing from one another in the less important matter of the solid pigments contained, but practically alike in having their liquid portions composed essentially of pure linseed oil.

As to guarantees on paint, they can be taken for what they are worth. Any reputable manufacturer will make good any defect actually traceable to the paint itself and not to improper use or treatment of it.

The competition of the better class of paints has driven inferior goods practically out of the market, and no manufacturer of standing now puts out a poor paint, under his own name at least.

As to guarantees on paint, they can be taken for what they are worth. Any reputable manufacturer will make good any defect actually traceable to the paint itself and not to improper use or treatment of it.

He Fitted Them. A little boy was on his first country excursion, relates the Brooklyn Citizen. Some birds were flying high overhead, and his hostess, a young woman, said:

"Look up, Tommy. See the pretty birds flying through the air." Tommy looked up quickly, and then he said in a compassionate tone: "Poor little fellers! They ain't got no cages, have they?"—Detroit Free Press.

Feet. "Tess—Isn't that Chicago girl tall? She must be nearly six feet." Jess—Yes; and if she stood on tiptoes she'd be seven feet.—Philadelphia Press.

"It is a faux pas," remarks an urban philosopher, "to ask a lady what a faux pas is who never heard of a faux pas."

A BIG STORM

Swept Over Chatham and Hamilton, Ont.

DID MUCH DAMAGE

At Hamilton the Storm Reached the Proportions of a Cyclone—No Lives Were Lost.

Detroit, Mich.—Eastern Ontario was swept by a terrific rain and wind storm Friday afternoon and as a result all wire communication between this city and Canadian points east of Chatham, about 60 miles from here, was cut off.

A torrential rain storm accompanied by a 40-mile wind storm swept Detroit just before 6 o'clock last evening. The rainfall in less than an hour measured 1.34 inches. Trees were felled all over the city, causing severe damage to wires.

Hamilton, Ont.—A terrific wind and rain storm swept over Ontario on Friday from one end of the southern peninsula to the other, demolishing buildings, uprooting trees and leaving the telegraph and telephone lines in a tangled mass of wires.

The storm struck this city at 4:35 p. m. and for 20 minutes the wind tore through the streets at the rate of 85 miles an hour. Immense oak and maple trees were cut off at the base as though a saw had been used; buildings were demolished and electrical wires of all kinds prostrated.

The street car service was suspended for four hours. Forty buildings in course of construction and some that had been finished were blown down.

Washington, D. C.—In response to a request from the house committee on agriculture, President Roosevelt on Friday forwarded to Representative Wadsworth, chairman of that committee, the report made to him by a committee of the department of agriculture regarding conditions in the Chicago meat packing houses.

The president says his investigations have not been completed, but that "enough has been developed in my judgment to call for immediate, thorough-going and radical enlargement of the powers of the government in inspecting all meats which enter into inter-state and foreign commerce."

REVIEW OF TRADE.

Prices of Commodities are the Highest in 20 Years.

New York.—R. G. Dun & Co.'s Weekly Review of Trade says: Current distribution of merchandise is largely dependent upon the weather, which varies widely according to locality. On the whole the week's results were encouraging, and monthly reports for May show splendid gains over last year's figures.

In the iron and steel industry there is not only little idle machinery at the present time, but little prospect of any shutdown in the near future.

Failures this week in the United States are 206, against 216 the corresponding week last year. Failures in Canada number 18, against 20 last year.

Congress.

Washington.—On the 8th the house passed 357 private pension bills and devoted the rest of the day to the sundry civil bill. In the senate Mr. Morgan spoke in favor of an investigation of affairs on the Isle of Pines and Senator Hopkins spoke in opposition to the sea level Panama canal bill.

Three People Burned to Death.

Newton, N. J.—Three persons were burned to death Friday in a fire near Walpack Center, N. J. They were Mrs. Samuel Garrison, 50 years old; Mrs. Jacob Emery, 80 years old, and Mrs. Garrison's daughter, aged 12 years.

Gorman's Successor Is Named.

Baltimore, Md.—Gov. Edwin Warfield Friday night announced the appointment by him of ex-Gov. William Pinkney Whyte, of this city, to succeed the late United States Senator Arthur P. Gorman.

A CRITICAL PERIOD

INTELLIGENT WOMEN PREPARE

Dangers and Pain of This Critical Period Avoided by the Use of Lydia E. Pinkham's Vegetable Compound.

Mrs. A. E. G. Hyland

How many women realize that the most critical period in a woman's existence is the change of life, and that the anxiety felt by women as this time draws near is not without reason?

If her system is in a deranged condition, or she is predisposed to apoplexy or congestion of any organ, it is at this time likely to become active and, with a host of nervous irritations, make life a burden.

At this time, also, cancers and tumors are more liable to begin their destructive work. Such warning symptoms as a sense of suffocation, hot flashes, dizziness, headache, dread of impending evil, sounds in the ears, timidity, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude are promptly heeded by intelligent women who are approaching the period of life when woman's great change may be expected.

We believe Lydia E. Pinkham's Vegetable Compound is the world's greatest remedy for women at this trying period.

Lydia E. Pinkham's Vegetable Compound invigorates and strengthens the female organism, and builds up the weakened nervous system as no other medicine can.

Mrs. A. E. G. Hyland, of Chestertown, Md., in a letter to Mrs. Pinkham, says: "I had been suffering with a displacement for years and was passing through the change of life. I had a good deal of soreness, dizzy spells, headaches, and was very nervous. I wrote you for advice and commenced treatment with Lydia E. Pinkham's Vegetable Compound as you directed, and I am happy to say that all those distressing symptoms left me, and I have passed safely through the change of life a well woman."

For special advice regarding this important period women are invited to write to Mrs. Pinkham, Lynn, Mass. She is daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge. Her advice is free and always helpful to ailing women.

THOUGHTS FOR QUIET HOUR.

Don't call the world dirty because you have forgotten to clean your glasses. If your religion is of the kind that can be easily hidden it can as easily be lost. The only reason some men won't go to the church is because they are not invited into the pulpit.

If you want to make a rich man understand you must touch his pocket-book. The people who are too lazy to prepare always have a lot to say about the way the prizes are distributed.

Kicker by Habit.

"That man began to kick the minute he entered the office," said the hotel clerk. "Yes," answered the proprietor, "He behaves as if he had always been used to the worst of everything."—Washington Star.

Disappointed.

"So Mrs. Nurich was held up and robbed. How did she feel about it?" "Oh, she's fearfully mad. Only had five cents in her pocket book at the time, you know, and she's afraid people will think she hasn't any money."—Detroit Free Press.

Experience Makes Us Wise.

Teacher—Can anyone tell me what a palmist is? "I know, teacher. It's a woman who uses her hand instead of a slipper."—Judy.

Prosperity has ruined many a man, but if a fellow is going to be ruined at all that is the pleasantest way.

FAINTING SPELLS

Cured by Dr. Williams' Pink Pills, the Remedy Which Actually Makes New Blood.

Anemia makes the patient short of breath so that there is often a sense of suffocation, sometimes there is a cough and the sufferer seems to be going into consumption, at others there is a murmur of the heart and heart disease is feared. In the following case severe fainting spells were an alarming symptom resulting from "too little blood."

Mrs. George Forrester, of 7 Curtis street, Watertown, N.Y., says: "Some time ago I took a heavy cold and it left me in a very weak condition. I became worse and worse until finally I had anemia. I lost flesh and appetite, had no color and was subject to fainting spells. Sometimes they would attack me suddenly and I would fall to the floor with hardly any warning.

"I had one of our best physicians, but after he had been attending me about a month without any improvement in my condition, I decided to see what Dr. Williams' Pink Pills would do. "The pills were well known to me for, about two years before, members of my family had taken them with the best results. I soon found that the pills were just what I needed for I soon began to notice an improvement. After I had taken them a while longer I was entirely cured, and we all believe in Dr. Williams' Pink Pills and recommend them highly."

Dr. Williams' Pink Pills actually make new blood. They do one thing and they do it well. Impoverished blood is deficient in red corpuscles. Dr. Williams' Pink Pills increase the number of these red corpuscles and in this way send health and strength to every tissue. All druggists sell Dr. Williams' Pink Pills or they will be sent by mail, post-paid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y.

ARE IN A HURRY TO CLEAN UP.

The President Gives Out Another Report Regarding Packing Houses and Their Managers.

Washington, D. C.—In response to a request from the house committee on agriculture, President Roosevelt on Friday forwarded to Representative Wadsworth, chairman of that committee, the report made to him by a committee of the department of agriculture regarding conditions in the Chicago meat packing houses.

The president says his investigations have not been completed, but that "enough has been developed in my judgment to call for immediate, thorough-going and radical enlargement of the powers of the government in inspecting all meats which enter into inter-state and foreign commerce."
