Girl's coat in blue and green plaid cheviot, with dark green velvet collar and cuffs, trimmed with shaped straps, which start from the box-plaited back and are carried over the box plaits in front. These straps are made of straight material trimmed with braid, and lend a very elaborate effect, secured by simple methods. This model may be developed to advantage in any plain or mixed ma-terials, as well as in broadcloths, velvets or cheviots. The pattern 2134 is cut in in the shops.

FADS AND FANCIES.

BY MINNA SCHATT CRAWFORD

and fastened with fancy buttons. In tan covert cloth, or in white or light-colored broadcloth, with the collar, cuffs and capes trimmed with a fancy braid, it would be rich enough for any wear. The pattern 2135 is cut in sizes 2, 4 and 6 years. Price 15 cents. As may be imagined, it will be neces-sary to have more frocks in one's ward-robe when so sharp a line is drawn be-tween the short and long skirt, and lucky the woman who is clever with her needle, and, to some extent at least, in-dependent of the dressmaker. With the

Jos. Hall, H. S.,

Copper is the Safest--the Most Profitable--the Most Permanent Investment in the World Today Copper is a Safe Investment. Copper is a Permanent Investment Copper is a Profitable Investment

Copper is a Safe Investment. The uses of Copper are extending every year. The demand is far a.cad of the supply. All the present production of Copper in the world cannot supply the demands of electricity alone. All scientists agree that we are just beginning to learn the uses of electricity. As these uses multiply, so will the demands for Cop-per increase. The price is steadily going up. In the last few years it has risen from 11c to 19c a pound.

Thomas W. Lawson says: "A good Copper mine is really a safe-deposit vault of stored up dividends which cannot be stolen or destroyed by fire, flood or famine."

THE COPPER MINE IS THE MINE OF TO-DAY.

Copper is a Permanent Investment No man can tell how long a good Copper mine will last, because no man has ever seen one exhausted. The Rio Tinto mines in Spain have been worked for over two thousend years, and last year they were the third largest producer in the world. The Mansfield mines in Germany have been worked for seven hun-dred years, and last year they were the sixth largest producer. Copper was discovered in this country in 1845, and in the Lake Superior district the levels are a mile below the lake, vet last year they produced more 1845, and in the Lake Superior district the levels are a mile below the lake, yet last year they produced more copper than ever before in their history. The famous Anaconda mine is steadily increasing its production. The United Verde in Arizona is turning out more and more Copper every year. No real Copper mine in this country has yet been exhausted.

of track, paid only \$9,750,000 dividends. Thirty-two of the leading Copper mines in this country on a paid-in capital of \$92,000,000, have paid over \$230,000,000 in dividends, while no railroad in the United States has ever paid back its original cost.

000,000, earned only \$74,000,000 profit last year.

Of the seven largest dividend-paying mines in the United States to-day, six are Copper mines.

Investment in Copper Stocks Offers the Safety of a Government Bond with the Speculative Element of a Gold Mine.

OTHER GREAT COPPER MINES All the large Copper mines that we have quoted had to expend from one to four million dollars in smelting plants. There are TIRKEE large independent smelters within hauling distance of our property, obviating all necessity on our part of this tremendous cutlay of money. Therefore, all we need to do is to concentrate our ore, an inexpensive process, haul the con-centrates to the smelter, and there re-ceive our money. This puts us practically in the same position that these other large Copper mines attained only after the ex-

Price of Stock Now 15c a Share--Par Value \$1

The executive and finance committee of the Consolidated Copper Creek Mining Company has authorized the sale of a limited amount of treasury stock at 15c a share. Par value of this stock is §1.00 a share, and we believe that within one year it will be worth a dollar a share on the markets of the world; nor will its top there. A good Copper stock will rise and rise till the owners be come dizy; there seems hardly any limit to its valuation. As our shafts go down, this stock will go up in value. We, therefore, re-serve the right to advance the price without notice. If you are wise, buy stock now and thus secure the benefit of the future advance in price.

WITH WE SELL SIUUK We have a great property, but we need money to develop it. If a farmer owned a quarter section of land and had only a spade to cultivate it with, it would take years of toil for him to get money enough to buy proper machinery to work it to advantage. So it is with a mine. If we went to a capitalist he would demand the lion's share; but we believe that the American people will be glad to come in with us and help us to make this property the greatest Copper mine on the continent. So we go to YOU, relying on your judgment and sound common sense, and ask YOU to join with us, man to man, share and share alike, in this great enterprise. With YOUR aid, we should make a second United Verde of this property. With unity there is hardly any limit to what can be ac-complished. The day will come when you will be proud to be a stockholder in the Cun-solidated Copper Creek Mining Company. CUT OUT THIS COUPON AND MAIL TO-DAY I. W. DUMM, Financial Agent, Consoldated Copper Creek Mining Co. 221 Shukert Building, KANSAS CITY, MO.
