THE FARMER IN WESTERN CANADA.

The Quality of No. 1 Hard Wheat Cannot Be Beaten.

The Canadian West in the past five or ten years has given a set back to the theory that large cities are the backbone of a country and a nation's best asset. Here we have a country where no city exceeds 100,000, and where only one comes within easy distance of that figure according to the census just taken and where no other city reaches a population exceeding 15,000. The places with a population over 5,000 can be counted upon the fingers of one hand, and yet the prosperity that prevails is something unprecedented in the history of all countries past or present.

The reason for this marvelous prosperity is not hard to seek. The large majority of the 810,000 people who inhabit Manitoba, Saskatchewan and Alberta, have gone on to the farm, and have betaken themselves to the task of not only feeding and clothing themselves, but of raising food for others less happily circumstanced.

crop of 1906, although not abnormal, is an eye-opener to many who previously had given little thought to the subject. Ninety million bushels of wheat at 70 cents per bushel—\$63,000,-000; 76,000,000 bushels of oats at 30 cents per bushel—\$22,800,000; 17,000,-000 bushels of barley at 40 cents per bushel—\$6,800,000; makes a total of \$92,600,000. This is altogether outside the root products; dairy produce, and the returns from the cattle trade; the the returns from the cattle trade; the beet sugar industry and the various an ideal colony house for 10 hens, or other by-products of mixed farming

When such returns are obtainable from the soil it is not to be wondered at that many are leaving the congest- a smaller house, built of one box. The ed districts of the eayst, to take upon themselves the life of the prairie farm and the labor of the housbandman.
With the construction of additional

railroads new avenues, for agricultural enterprise are opening up, and improved opportunities are offered to the settler who understands prairie farming, and is willing to do his part in building up the new country.

This is the theme that Mr. J. J. Hill, the veteran railroad builder in the West, has laid before the people in a series of addresses which he has given at various points during the past few months, and, having been for so long identified with the development of the West, there are few men better qualified than he to ex-press an opinion upon it. Take care of the country, says he, and the cities will take care of themselves.

The farmers of the Western States

and the Canadian West, are more prosperous than ever before, and when it comes to measuring up results, the Canadian appears to have somewhat the better of it. His land is cheaper in fact, the government continues to give free homesteads to settlers, and the returns per acre are heavier when the crop is harvested. Farming land in the Western States runs from \$60 to \$150 an acre and up, whereas equally good soil may be pur-chased in Canada for \$8 to \$15 per acre, within easy reach of a shipping point, and much of this is available for free homesteading. The quality of the Canadian No. 1 hard wheat cannot be beaten, and the returns to the acre are several bushels better than on this side of the line; the soil and climate of that country being peculiarly adapted to wheat growing.

The fact is evidently appreciated by the large number of American farmers who have in the past two or three years settled in the Canadian West. The agents of the Canadian Government, whose address will be found elsewhere, advise us that for the fiscal year 1904-5, the records show that 43,543 Americans settled in Canada, and in 1905-6 the number reached 57,796. From all of which, it appears that at present, there is a good thing in farming in Western Canada, and that the American farmer is not slow to avail himself of it.

Depew Writes Reminiscences.

While Senator Chauncey M. Depew was enjoying his long rest at Ardsley-on-the-Hudson he did a good deal of on-the-Hudson he did a good deal of work on his reminiscences. He is not sure that they will ever be published, his idea being that they might be of interest to his son. In his fifty years of public life Mr. Depew has known a great many prominent personages and his reminiscences can hardly fail to be exceedingly readable.

BOY'S HEAD ONE SOLID SORE.

Hair All Came Out-Under Doctor Three Months and No Better-Cuticura Works Wonders.

Mr. A. C. Barnett, proprietor of a general store in Avard. Oklahoma. tells in the following grateful letter Cuticura cured his son of a terrible eczema "My little boy had eczema. His head was one solid sore, all over his scalp; his hair all came out, and he suffered very much. had a physician treat him, but at the end of three months he was no beter. I remembered that the Cuticura Remedies had cured me, and after giving him two bottles of Cuticura Resolvent, according to directions, and using Cuticura Soap and Ointment on him daily, his eczema left him, his hair grew again, and he has never had any eczema since. use the Cuticura Soap and Ointment, and they keep our skin soft and healthy. I cheerfully recommend the Cuticura Remedies for all cases of eczema. A. C. Barnett, Mar. 30

Natives Steal Many Sheep.

A farmer at Winburg, Orange River

Colony, alleges that in his district alone 24,000 sheep are stolen annually by the natives. On this basis he calcu lates that 300,000 sheep are stolen throughout the colony every year.

CHEAP HOUSE OF PIANO BOXES

How They Can Easily Be Converted Into Serviceable Chicken House.

Piano boxes can easily be procured at a low cost and cheaply converted into good houses for small flocks. The cut shows two styles of houses. The one at the right of the picture is made of two boxes set back to back. The top and back of each are taken off and will give enough material to close in the ends and roof, also the floor. The top of one can be cut

Piano Box Poultry House.

down for a door and the houses should be set the distance apart of the width of the door. In the other end place a window, or the same may be put in the front. To make the house warmer individual brooder house.

front is removed and extended height. For brooder house for small chicks the plan may be reversed, says the Farm and Home, and the front of the house made the height of the back of the box. Two small sash and a door complete the arrangement.

KEEPING OUT MITES.

How the Poultry Raiser Can Keep His Hen House Clean.

The successful poultry raiser has learned how to keep out mites. It may well be doubted if any successful poultry raiser can be found whose houses are teeming with mites. Among the ways of keeping off the mites are the following:

Have a house that is light and large enough for the flock, and see to it that it is well ventilated.

Have the roosts, nests, dropping boards and all fixtures removable they can be cleaned perfectly, easily and often.

Do not permit filth of any kind to accumulate in this house, but make sure that it is cleaned often.

The advice given by some is to treat the house once in two weeks to a dusting with air-slaked lime and sul-

The boxes for the sitting hens should be washed in kerosene or crude petroleum before being used in the hatching operations The straw in such boxes should be burned after the hen is through sitting.

Lastly, watch the entire poultry establishment to make sure that mites do not get a start.

Hay for Poultry.

The suggestion that hay makes a good winter food for poultry would have been ridiculed a few years ago, but experiments have proved that clover hay is now almost a necessary portion of a hen's cold weather diet. Clover hay for fowls should be cut very fine, not over half an inch in length, steamed and scalded and fed once a day. A small quantity of corn meal and bran sprinkled over the cut hay will improve it. One reason clover is such an excellent food for hens is that it is rich in lime, a substance the hens require in providing the shells for eggs. It is about equal to corn as a flesh producer and contains nearly 30 times as much lime. It is plentiful on all farms and requires but little time in preparation. After the green food is gone it will keep the hens in laying condition and increase the production of eggs.

Poultry and Bee Notes.

Carelessness in handling poultry will ruin the finest flock in a short

Nitrogen may be the costliest or the cheapest element of fertility, as you like it.-C. E. T. Paint the poultry house and have it

an addition to the looks of the farm rather than something that detracts from the appearances.

Scratchivity is a virtue to be en-

couraged in the hen because upon it largely depends layity, and that is what most of us want.

If a cellar stands too near the freez-

ing point for the bees, bring the temperature up by making the cellar closer; but there will be better venti-lation and better air by bringing the temperature up at such times by means of as mall fire.

Our Domestic Turkey. While there are differences of opinion regarding the origin of our domestic turkey, it is currently believed that it came directly from the wild turkey of the United States and Canada. One writer expresses the opinion that the original variety imported into England in 1520 came from a variety that formerly existed in the West Indies and was afterwards exterminated by the natives. This is guesswork. There is apparently no good reason for going out of the way to hunt for any other origin than that currently accepted. What is known as the domes-tic turkey crosses freely with the wild variety, thus establishing a close relationship as having existed in the past TEN YEARS OF PAIN.

Unable to Do Even Housework Because of Kidney Troubles.

Mrs. Margaret Emmerich, of Clinton

street, Napoleon, O., says: "For fif-teen years I was a great sufferer from kidney troubles. My back pained me ter ribly. Every turn or move caused sharp shooting pains. My eyesight was poor, dark spots appeared be-

fore me, and I had dizzy spells. For ten years I could not do housework, and for two years did not get out of the house. The kidney secretions were irregular, and doctors were not helping me. Doan's Kidney Pills brought me quick relief, and finally cured me. They saved my life."

Keep in Good Health.

There are many thousands of peo-ple all over the world who can at-tribute their good health to taking one of two Brandreth's Pills every night. These pills cleanse the stomach and bowels, stimulate the kidneys and liver and purify the blood. They are the same fine laxative tonic pills your grandparents used, and being purely vegetable they are adapted to children and old people, as well as those in

the vigor of manhood and womanhood. Brandreth's Pills have been in use for over a century and are for sale everywhere, plain or sugar-coated.

Lord Rothschild's Tart Reply.

Lord Rothschild, who is taking a prominent part in the commission which is considering as to the best territory for Jewish colonization, is the wealthiest member of the wealthiest and most famous banking house in the world. His monetary and social influence suggest the monarch rather than the financier. There is a story that Jay Gould once called upon him on business. Lord Rothschild sent out word that he was too busy to see the caller. Mr. Gould, not accustomed to being denied audience by anyone, sent back rather a tart repetition of his request. After an interval the attendant returned with this reply from Lord Rothschild: "Tell Mr. Gould that Europe is not for sale."

To Represent Italy and Spain.

The two great Catholic countries of Europe, Italy and Spain, are sending new ambassadors to the court of St. The marquis di San Giuliano, who will represent Italy, is comparatively a young man. He comes of an old Sicilian family of Norman descent, and is highly cultured, having traveled extensively with good results. He is an enthusiastic student of Dante, and is president of the Italian Geographical society. Senor Villa Urattia, the new Spanish ambassador, accompanied King Alfonso to London on the mo-mentous occasion that ended in his engagement to Princess Ena, and won golden opinions for his tact and courtesy during that visit.

NEW YEAR'S CALLS.

A New Drink to Replace the Old-Time "Apple-Jack."

Twenty-five years ago the custom of making New Year's calls was a de lightful one for all concerned, until some of the boys got more "egg-nog" or "apple-jack" than they could successfully carry.

Then the ladies tried to be charitable and the gentlemen tried to be as chivalrous as ever and stand up at the same time.

If anyone thinks there has not been considerable improvement made in the last quarter of a century in the use of alcoohlic beverages, let him stop to consider, among other things, the fact that the old custom of New Year's calls and the genteel tippling is nearly obsolete.

The custom of calling on one's friends, however, at the beginning of the new year, is a good habit, and another good habit to start at that time is the use of well-made Postum instead of coffee or spirits.

A Staten Island doctor has a sensible daughter who has set Postum before her guests as a good thing to drink at Yule Tide, and a good way to begin the New Year. Her father Ely's Cream Balm writes:

"My daughter and I have used Postum for some time past, and we It cleanses, soothes, feel sure it contains wholesome food heals and protects the diseased membrane.

"I shall not only recommend it to my patients, but my daughter will be most pleased to give a demonstration of Postum to our Christmas and New Year's callers." Read "The Road to Well":lle" in pless. "There's a reach"

WHO SHE WAS

SKETCH OF THE LIFE OF LYDIA E. PINKHAM

And a True Story of How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused it to be Offered for Public Sale in Drug Stores.

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9th, 1819, coming from a good old Quaker family. For some years she taught school, and became known as a woman of an alert

and investigating mind, an earnest seeker after knowledge, and above all, possessed of a wonderfully sympa-thetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter. daughter.

In those good old fashioned days it

In those good old fashioned days it was common for mothers to make their own home medicines from roots and herbs, nature's own remedies—calling in a physician only in specially urgent cases. By tradition and experience many of them gained a wonderful knowledge of the curative properties of the various roots and herbs.

Mrs. Pinkham took a great interest in the study of roots and herbs, their characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvestfields and orchards vegetable foods of all kinds; so, if we but take the pains to find them, in the roots and herbs of the field there are remedies expressly designed to cure the various ills and weaknesses of the body, and it was her pleasure to scarch these out, and prepare simple and effective medicines for her own family and friends. Chief of these was a rare combination of the chiegest medicine, wother the sequence of the chief was a rare combination of the choicest medicine, we then the sequence of the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the company to the chief of the sequence of the chief

Chief of these was a rare combina-tion of the choicest medicinal roots and herbs found best adapted for the cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured and it became quite popular among them.

erty swept away. Some other source of income had to be found.

At this point Lydia E. Pinkham's egetable Compound was made known to the world.

women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of

The wonderful curative properties of The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

mand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until today Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not

Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself. herself.

During her long and eventful expe-During her long and eventual experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice woman who applied to her for advice—and there were thousands—received careful study, and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured and it became quite popular among them.

All this so far was done freely, without money and without price, as a labor of love.

But in 1873 the financial crisis struck Lynn. Its length and severity were too much for the large real estate interests of the Pinkham family, as this class of business suffered most from fearful depression, so when the Centennial year dawned it found their property swept away. Some other source is from the content of the work when its originator passed away. For nearly twenty-five passed away. Fo probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound; made from simple roots and herbs; the one The three sons and the daughter, with their mother, combined forces to woman whose name it bears.
