Dangers of a Cold and How to Avoid Them.

More fatalities have their origin in or result from a cold than from any other cause. This fact alone should make people more careful as there is no danger whatever from a cold when it is properly treated in the beginning. For many years Chamberlain's Cough Remedy has been recognized as the most prompt and effectual medicine in use for this disease It acts on nature's plan, loosens the cough, relieves the lnngs, opens the secre cough, relieves the imags, open the sys-tions and aids nature in restoring the system to a healty condition. Sold by L. Taggart; J. E. Smith, Sterling Run; Crum Bros., Sinnamahoning.

When the cold winds dry and crack the skin a box of salve can cave much discomfort. In buying salve look for the name on the box to avoid any imitations, and be sure you get the box to avoid original DeWitt's Witch Hazel Salve. Sold by R. C. Dodson.

Clear up the complexion; cleanse the liver and tone the system. You can best do this by a dose or two of DeWitt's Little Early Risers. Safe, reliable little pills with a reputation. The pills that everyone knows. Becommended by L. Taggart.

"They like the taste as well as maple sugar" is what one mother wrote of Ken nedy's Laxative Cough Syrup. This modern cough syrup is absolutely free from any opiates or narcotic. Contains Honey Tar. Conforms to the National Pure Food and Drug Law. Sold by R. C. Dodson.

Mothers who give their children Ken

nedy's Laxative Cough Syrup invariably indorse it. Children like it because th taste is so pleasant. Contains Honey and Tar. It is the Original Laxative Cough Syrup and is unrivaled for the croup. Drives the cold out through the bowels. Conforms the Na-tional Pure Food and Drug Law. Sold by R. C. Dodson.

Glasses and the Eyes.

Every one knows that in using a

field glass it is necessary to adjust it to a proper focus. Suppose that you

put one of the tubes at your focus and

the other tube at a focus that suited

some one else and then you looked through both tubes. You would have

a more or less blurred vision, and if

you kept on looking the chances are

that you would feel giddy and get a

headache. Now, the two eyes are sup-

posed to have an equal natural focus,

and when by any chance that focus is unequal a headache results. The rem-

edy is a pair of glasses or a single

glass to make the eyes equal in power.

teresting description of the fish of the

Orinoco country. He says the party

several times came in contact with the

carib fish, which are the most ferocious inhabitants of the water known. The

fish are not over fourteen inches long but they travel in schools. Their teeth

are three cornered. Any living object which attracts their attention is at

tacked with fury. Mr. Thompson tells of an Indian woman who entered the

water to fill a bucket. She was at tacked by the fish and reached shore

only to die in fifteen minutes. The flesh was literally torn from her body.

Mr. Dart, who was with Mr. Thomp son, caught one of the fish and pulled

it upon the bank. He held the carib under his foot while he pointed at the

peculiar teeth with his finger. With a quick movement the carib flopped out

from under Mr. Dart's foot and seized

him by the finger, cutting that member to the bone. The fish frequently have been known to blte ordinary fishhooks

Progress of Dentistry. Though dentistry became a science under the hand of Professor Richard

Owen as late as 1839, there are evi-

dences that it was practiced in a crude

way by the ancients. Herodotus refers

to treatment of the teeth by the Egyp tians, and evidences of attempts to

supply artificial teeth have been dis-

covered in ancient skulls and mum-

mies. Galen was the first physician to speak of treatment of troublesome

teeth, and Ambroise Pare, in his work

on surgery in 1550, makes mention of

the preservation of the teeth. It is only since the middle of the last cen-

tury, however, that dentistry has be

come a branch of surgical science. Be-

fore that time bad teeth were extract-

ed, and mere tooth drawing constitut-
