Fear Trolley Freight Bill Contains Some Deadly Ambuscade.

## IT IS LAID UP FOR REPAIRS

But Will Undoubtedly Be Passed When Legislative Doctors Have Succeeded in Extracting Its Venom. Trolleys May Become Numerous.

(Special Correspondence.) Harrisburg, Pa.-A great deal of interest is being displayed in the fate of the trolley freight bill that has been sent back to committee for amend ment. Some think that it is never to see the light of day again and that its enemies are responsible for its re-commitment. But this view is not generally accepted. Although it is the evident purpose of the railroad companies to keep all inimical railroad legislation in committee, both friends and enemies of the trolley freight bill were responsible for sending the measure back to the committee on

electric railways for repairs.

A bill allowing trolley cars to carry freight will be passed just as certain as anything can be. The disposition of the legislators and the temper of the people will allow nothing else But the lawmakers realize that there is danger in giving trolley companies too much power, just as the railroads have had too much leeway in the past

It is desired that trolley companies shall be regulated by the cities and boroughs through which they pass. Otherwise it might happen that freight handling, proving more profitable than passenger traffic, the latter would be discriminated against by the trolley companies much to the disadvantage of the people.

Bill Carelessly Drawn.

There is one thing certain, and that is that the moment the bill allowing trolley companies the right to carry freight passes and is put upon the statute books there will be a great impetus to the trolley business. New companies will spring up all over the state and this state is likely to be gridinged from one end to the other with trolley lines within the next few years. It consequently behooves the lawmakers to go slow in granting so important a privilege to trolley companies. The bill that came near passing the house would allow freight of any and all kinds to be carried in the same cars with passengers, for there was no provision or restriction of any kind respecting the latter. It was a carelessly drawn bill and had been very hurriedly considered in commit

The passage by unanimous vote in the house of the 2-cent fare bill was administered as a sort of rebuke to President George F. Baer of the Philadelphia & Reading railway, who intimated that members of the legisla-ture had the right to violate their pledges of they wished to do so in voting upon the 2-cent fare bill. Not a member of the lower house dared vote against the measure-not even Mr. Blakeslee, Democrat, of Carbon who made a speech against the me sure. He declared that the bill is unconstitutional.

# May Need Amendment.

Well, whether the bill is unconstitutional or not, it went through the house and will go through the sen ate unless it is found to be illegally drawn. Then some amendments will be made to it to make it legal. There is nothing that can stop it from going through, not even George F. Baer or and of his railroad associates. Both the trolley freight bill and the 2-cent fare bill were in the plat-

of the Republican party, and the Republicans have essumed the re sponsibility for putting both of these bills through. The senate is not un-der railroad domination. Even if a majority of the members should feel friendly toward the railroads, most of the members are ambitious politically, and any man knows that it would be political suicide for him to attempt to sidestep any of the great issues of the day.

Rights of Foreigners.

The bill prohibiting unnaturalized foregn-born citizens from firearms and making it unlawful for anyone to sell firearms to them is going to get a bump before it gets through. D. F. Dempsey, of Lacka-wanna, threatens to make a fight against its passage. He says that the bill is not a "square deal" to the foreigners. He says that they are not all criminals and that to prohibit them from possessing weapons of any kind is an infringement upon their personal rights. It allows officers to who is suspected of carrying or ewning firearms. After five days the

same errand. Mr. Dempsey says that foreign-born women are often obliged to carry weapons for their own protection and that it would be a hard-ship to them to be deprived of this

Mr. Esler, of Allegheny, has a bill providing for the education of all classes of foreigners. He wants to establish educational camps where the foregn-born may have an opportunity to learn the English language and the American way of doing things. The idea is to teach the foreigner something about our American government in order that he may become useful citizen.

### The Chances of To-Day.

That was a happy remark of Gov. Stuart to the students of the Carnegie Technical schools in Pittsburg on Wednesday. "I want to say to you that there is a greater chance for men ofintegrity, industry and ability than there ever was in the world's history." The governor had just observed that there are men who say there is not the same chance for young men to-day that there was 25 years ago.

It has been said of the new governor that, as he is not a lawyer and not given much to oratory, it must not be expected of him that be shall shine a public speaker, but here we have proof that he can concentrate a great many striking truths into a few words. What he told the "tech" boys is wor. thy the careful consideration of every Pennsylvania youth with genuine ambition. The idea that there is less chance to-day than in the last generation is an absurdity. It is the stock argument of the thoughtless and the covenient refuge of the doless. As Gov. Stuart pointed out the royal read to success is still open to him who in. dustry and integrity-are unchanged. With the growth of the world, the advancement in methods, the progress of development and the opening of new and undreamed of avenues of endeavor-as electricity, for instanceit is inevitable that there should be a wider diversity and an increased number of changes and success. While in the matter of population we have thousands where in the long ago there were only hundreds, it must not be forgotten that the needs and demands of the world have expanded, that genius, invention and science, the diversions, business and social requirements of mankind bave multiplied vocations and created opportunities for material success to a degree that would have appeared impossible to our forefathers. The cry for competent young men, strong in their integrity and purpose, is as loud to day as ever before, and it is up to the young man himself to work out the chances of
