Really Worth Readings. At certain times in the year, and particularly a month or two before the Christmas holidays, new books come into newspaper offices for review faster than any one man can possibly read and review them with justice either to himself or the books. He glances through them hastily, unless they are by noted authors, gets a salient point here and there and "writes them up" as best he can. Then he forgets all about them. "A friend came to me one day and expressed his gratification at the way I had written up a new novel by a comparatively unknown author," said the literary editor of a Chicago paper. "You expressed my idea of it exactly," he said. "It is one of the remarkable books of the year. The plot is absolutely unique, the treatment of it is bold and original and the dialogue crisp and delightful. It will make a great hit." "Well, I said, 'if it is as good as all that I'll read it.'"—Youth's Companion. How the Gems Rank. In the gem kingdom the ruby, the diamond, the emerald and the sapphire constitute "the big four" and take precedence—and in the order named—of all other precious stones. The pearl is of course not a stone. It has a standard of its own. The expert test of the gem is its color, its degree of clearness and its perfection of cutting. Upon the last depends its brilliancy. In the diamond the "brilliant" cutting holds first place. The other stones are cut altogether differently—they are crystallized in different systems—in fact, they differ in another respect, the diamonds being a mineral carbon, the finer ruby (the oriental) a variety of corundum, the emerald a variety of beryl and the sapphire a colored variety of corundum. What is technically known as the "step cut" is an essential to bring out the fire of the last three.—New York Tribune.

How the Pulse Varies. The human pulse has rather a wide range, but the general average may be put about as follows: At birth, 140; at two years, 100; at from sixteen to nineteen years, 80; at manhood, 75; old age, 60. There are, however, great variations consistent with health. Napoleon's pulse is said to have been only forty-four in the minute. A case is also related of a healthy man of eighty-seven whose pulse was seldom over thirty during the last two years of his life and sometimes not more than twenty-eight. Another man of eighty-seven years of age enjoyed good health and spirits with a pulse of twenty-nine, and there is also on record the curious instance of a man whose pulse in health was never more than forty-five, and, to be consistent in his inconsistency, when he had fever his pulse fell to forty instead of rising, as is usual.

Wrestling For Exercise. Wrestling, the "microcosmos of gymnastics," is a fine form of bodily exercise for those who enjoy hard muscular work after the tedious business hours of the day and may be practiced—adapting it to circumstances—by the man of a ripe age as well as by the boy of ten or twelve, especially the form known in this country as catch-as-catch-can (which is about identical to one form of Swiss wrestling). I exchanged the Greco-Roman (or German gymnastic) style for this one about twelve years ago, and I was then over forty years old, and still enjoy it much if my opponent is of my own weight or a little lighter and if it is deprived of its potential roughness by a gentlemanly spirit of the partners.—New York Medical Journal. Precautions of Old Time Doctors. It was formerly the practice among physicians to carry a cane having a hollow head, the top of which was gold, pierced with holes like a pepper box. The top contained a small amount of aromatic powder or of snuff, and on entering the house or room where a disease supposed to be infectious prevailed the doctor would strike his cane on the floor to agitate the powder and then apply it to his nose; hence all the old prints of physicians represent them with canes to their noses. A Marriage Warning. In Germany all marriages have to be contracted before a register previous to the ceremony in church, which is optional. The law requires public notice to be given of the match, and this notice is generally exhibited in a box hung up at the town hall or other municipal building. The following official announcement appeared lately in a small town: "From today there is fixed at the town hall the new box, in which all those who intend to enter the married state will be hung."

Not Labor Lost. The safe bore a paper stating that there was nothing of value within. Nevertheless the burglar blew the receptacle open, finding the statement correct. "Well," he remarked, gathering up his tools, "it's worth something to ascertain that there are still people who tell the truth."—Philadelphia Ledger. The Opportunity. Opportunity has all her hair on her forehead, but when she has passed you cannot call her back. She has no tuft whereby you can lay hold on her, for she is bald on the back part of her head and never returns.—Francis Rabalais. The weakest living creature by concentrating his powers on a single object can accomplish something; the strongest by dispersing his over many may fail to accomplish anything.—Carlyle.

Constipation. Baked sweet apples, with some people, bring prompt relief for Constipation. With others, coarse all-wheat bread will have the same effect. Nature undoubtedly has a vegetable remedy to relieve every ailment known to man, if physicians can but find Nature's way to health. And this is strikingly true with regard to Constipation. The bark of a certain tree in California—Cascara Sagrada—offers a most excellent aid to this end. But, combined with Egyptian Senna, Slippery Elm Bark, Solid Extract of Prunes, etc., this same Cascara bark is given its greatest possible power to correct constipation. A toothsome Candy Tablet, called Lax-ets, is now made at the Dr. Shoop Laboratories, from this ingenious and most effective prescription. Its effect on Constipation, Bloating, Sour Stomach, Bad Breath, Sallow Complexion, etc., is indeed prompt and satisfying. No griping, no unpleasant after effects are experienced, and Lax-ets are put up in beautiful lithographed metal boxes at 5 cents and 25 cents per box.
