"Tipping" in Europe.

According to immemorial usage, European servants are entitued to tips as an assured part of their income. At the hotels the theory is that the landlord furnishes a guest a private room and the use of the public rooms, heat and light, food and dishes, but not menial service. For convenience he keeps at hand a corps of servants who will respond to the guest's summons, but at his expense. In old times, says Travel Magazine, travelers were attended by their own servants to wait on them. The modern custom echoes the ancient. The traveler no longer carries with him a retinue of servants, because he can hire temporarily those of the landlord. The cus tomary fees are the payment. To avoid feeing is really to cheat the servants, who need all they can get, heaven knows. A chambermaid at the best hotels receives as wages only about two dollars a month. Tipping servants in America is a regrettable imitation of the European custom, without its resting on the reasonable basis of the foreign institutions.

SENATOR BEVERIDGE DEFINES REPUBLICAN POSITION.

Nation's Power Above That of State to Right Evil or Secure Benefit for the Whole American People.

In a printed debate on the subject of state's rights between Senator Beveridge and William Jennings Bryan, appearing in the Reader Magazine, Senator Beveridge refers to the recent contests waged by advocates of state's rights against certain federal legislation; the Louisiana State lottery; the sending of obscene literature through the mails, the meat bill, etc., and defines the position of the Republican party on future meas ures as follows:

When an evil or a benefit is so widespread that it affects so much of the country as to be called national, the nation's power should be equal to end that evil or secure that benefit to the American people.

"When an evil or benefit is purely local and affects none of the American people except that part of them who live in the state where the evil exists or the benefit can be applied, and nowhere else, the state that evil or secure that benefit

"The storm raised by the beef trust seandal caused the passage of the pure food bill; and state's rights, though sorely wounded, made little outery because it would have been most unpopular. You will observe that state's rights is a very politic creature and seldom becomes excited for 'liberty,' except when some financial interest is endangered by the assertion of nationality. State's rights is not often heard of, unless financial interests are threatened; and not even then, if the people happen to be sufficiently aroused against an evil which nationality will end.

'An example immediately at hand: Child slavery exists in the mining re gions and in the silk mills of Pennsyl vania, the cotton factories of the south, the glass works of New Jersey and West Virginia, and, indeed, at numerous points throughout the whole republic. Where the Farmer Comes In.

In the calendar year 1906 American manufactures of iron and steel exorted to foreign countries amounted in value to \$172,500,000, against \$143. 000,000 in 1905, \$128,500,000 in 1904, and \$99,000,000 in 1903, having thus increased 75 per cent. in three years. This \$172,500,000 for 1906 is high rec ord of exports of iron and steel man ord of exports of fron and steel manufactures. Paid to the producers of the United States by consumers in other parts of the world, it is the equivalent of yearly wages of \$500 each, earned by 34,500 American workmen and by them distributed into all the channels of supply. The American farmer got a very liberal share of the \$172,500,000 of foreign money thus spread around, for the extra force of wage earners employed in producing the goods exported, together with their families, consumed probably ten times the quantity of American farm products that would have been consumed by foreign workers engaged abroad in producing the

NO DIAGRAM IS NEEDED.

William Whitman's Position on Tariff Easily Understood.

We ought not to allow our indus trial system to be made a political plaything.—From a speech of William Whitman, at Boston.

Whitman is president of the National Association of Woolen Man ufacturers. He was talking about tar iff revision. No diagram is needed to explain his position.—N. Y. Sun.

Mr. Whitman's position is easily un derstood. Briefly, it is that the up roar for tariff revision has politics as that it is being utilized by political schemers as a means to an end. As a large employer of labor, with big payrolls to meet and a heavy output manufactured products to market, he the country's industrial interests to the tender mercies of political gamesters. He does not play politics. He him and many thousands similarly situated tariff stability is a vital requisite to business stability; a condition too important to be made a po-litical plaything. That is his position and it needs no diagram. When busi ness men of the stamp of William Whitman raise their voices in test against the schemes and strataof self-seeking politicians like Guild and Foss it is time for the Re publican party to take notice.

The Difficulty.

The New York Tribune remarks that "it ought not to be difficult for the United States and Germany to come to a satisfactory understanding." True, it ought not to be difficult. But it has been made difficult by the alliance between tariff ripping Republicans and tariff ripping Demo crats working in such organizations as the American Reciprocal Tariff rates of the Dingley tariff. Germany has been misled by this combination into supposing that American sentiment supported her demand for tariff concessions. She is now discovering her error, and accordingly postpones her maximum tariff another 18 months. Once Germany is convinced that the United States has no inten tion of abandoning its protective tar iff system there will be no difficult; in coming to an understanding.

Cummins Lets Go of the Tariff.

As Gov. Cummins did not mention tariff revision either in his mes or his inaugural address, the matter can be considered closed. It was long, hard fight, and we hope now the governor will steady down and pull true in the party traces. A political party is always in need of leaders, that they should study well the desires of their party, and aid in bringing about its wishes. If the gov ernor finds himself to-day simply eader of a faction he can lay the blame on no one but himself. It may be a temptation to be in advance of public sentiment, but one is apt to give more weight to his own opinion than the merit of the case warrants, and he finds himself stranded, and wonders why .- Vinton Eagle.

First the Minimum.

Secretary Root in a speech recently favored that kind of tariff reform that will place the country on a maximum and minimum tariff basis. This kind of a change has been advocated for some years, and one of its earliest and ablest advocates has been the secretary of the treasury. It repre sents a vital principle and one which discriminations on the part of other countries against the United States can be most successfully combated. The country that treats us fairly will be given the minimum tar iff and the other the maximum tariff. It is the kind of a tariff, properly safeguarded, that we may have in this country at some time in the near future.-Cedar Rapids Republican.

JUDGE LANDIS IN THE FEDERAL COURT RENDERS DECISION IN FAVOR OF GOVERNMENT.

Chicago, Ill.-The contentions the attorneys for the Standard Gil Co. that the government, which is now prosecuting the company on indictments charging it with accepting rebates, had not proven the existence of the route by which it claimed the alleged shipments in violation of law had been made, were on Friday swept away by Judge Landis in the United States district court.

The court declared that the government had proven the existence of a route by the Chicago & Alton railroad from Whiting, Ind., and Chappell, Ill., to St. Louis. He also declared that the omission of the name of Chappell from the tariff sheet did not invalidate that these their search of the control of the chappell from the tariff sheet did not invalidate that their search of the chappell of the ch date that tariff as applied to the Standard Oil case.
