WASHINGTON LETTER.

From our Regular Correspondent. Washington, May 4th, 1907. While there is no immediate prospect of tariff changes, and in the nature of things cannot be before Congress reassembles there is a great deal of interest in the matter both in the Treasury Department and at the State Department owing to the action of France in threatening to enforce the maximum tariff against this country, and the announcement of Ex-Premier Balfour coming out unreservedly in favor of a British protective tariff. The situation with France is the more pressing of the two. France was a party to the new German tariff treaty, and in common with six other European countries made a special arrangement in virtue of which they were to accord each other the "most favored nation" treatment, and this meant that other countries, including the United States, would be cut out of such treatment as soon as their treaties expired. Now France is our third largest customer, the two leading ones being Great Britain and Germany, so that while the maximum tariff wouldnot mean shutting us out of all trade with France and Germany, it would seriously reduce the volume of trade and would inflict commercial trouble that this country could ill afford. The threat of France has been to enforce the maximum duties in the oase of cotton and cottonseed oil, and exclude American meats altogether unless they have a goverdment certificate of microscopic inspection. These three articles are the articles of largest trade between. this country and France, and their reduction under the new tariff arrangement would mean great loss to the planters of the south and

another year till Congress has a chance to make al definite treaty arrangement. France is now demanding the same thing, and negotiations are progressing between Secretary Root and Ambassador Jusserand that probably will result in sending a
