JOB PRINTING.

The Job department of the Press is complete, and affords facilities for doing the best class of work. PARTICULAR ATTENTION PAID TO LAW PRINTING.
No paper will be discontinued until arrearages are paid, except at the option of the publisher.
Papers sent out of the county must be paid for in advance.

No advertisements will be accepted at less than the price for fifteen words.
Religious notices free.

WASHINGTON LETTER.

[From our Regular Correspondent.]

Washington, April 4, 1908.

A peculiar situation was revealed this week when the House Committee on Claims undertook to scale down the bill presented by the Southern Pacific for repairing the damage done by the Colorado River when it created the Silted Sea, in Southern California. It seems the railroad has presented a bill of \$1,600,000, and the committee proposed to cut this down to \$1,000,000, when the attorney for the Harriman road charged the committee with demanding rebates in violation of the law and declared that nothing would induce his client to violate the law even to oblige Uncle Sam. However, there is every indication that Congress will strike about \$500,000 from the company's bill, even though it be obliged to enact a suspension of the interstate commerce law for this particular occasion.

In spite of the efforts that have been made in his behalf, it is perfectly obvious that Rear Admiral Evans will not receive the rank and title of vice-admiral at this session of Congress. Senator Hale is opposed to granting this recognition to Admiral Evans at this time, though it may be done after the Admiral is placed on the retired list. In view of this opposition it is believed that even though the House were to pass such a bill it would be allowed to slumber in the Senate committee, consequently there is little likelihood that any action will be taken by the House committee, in spite of the earnest efforts of Representative Kennedy who introduced a bill along these lines.

Hearing on the Aldrich bill by the House Banking and Currency Committee began on April 3rd and will continue for one week. In the House and in the committee strong opposition has developed to the amendment put in the bill by Senator La Follette, prohibiting any national bank from investing its funds in stocks of a corporation, the officers of which are officers or directors of the bank. This is looked upon as a hardship to the many banks in the smaller towns, where the bank directors are generally interested in every local enterprise.

Catarrh Cannot be Cured.

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surface. Hall's Catarrh Cure is not a quick medicine. It is prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free. F. J. CHENEY & Co., Toledo, O. Sold by druggists, 75c. Take Hall's Family Pills for constipation.

DeWitt's Little Early Risers, the famous little liver pills. Sold by R. C. Dodson.

DeWitt's Carbolized Witch Hazel Salve. It is perfectly good for piles. Sold by R. C. Dodson.

There is nothing better than Kodol for Dyspepsia, indigestion, sour stomach, belching of gas and nervous headache. It digests what you eat. Sold by R. C. Dodson.

Don't cough your head off when you can get a guaranteed Remedy in Bees Laxative Cough Syrup. It is especially recommended for children as its pleasant taste, is a gentle laxative thus expelling the phlegm from the system. For coughs, colds, croup, whooping cough, hoarseness and all Bronchial trouble. Guaranteed. Sold here by R. C. Dodson. 3m

Itch cured in 30 minutes by Woodford's Sanitary Lotion. Never fails. Sold by L. Taggart, druggist. 32-1yr.

Pine Trees Reclaim Abandoned Farms.

Everywhere in the eastern and southern states the ax is transforming the magnificent forests of the past into culled and cut over land. The demand for lumber is so great and operations are so extensive that in a comparatively few years those who wish to see timber in its virgin luxuriance will have to visit distant and isolated sections of the country.

Under the new conditions brought about by the exploitation of the virgin forests a type of woodlands known as the old field pine has developed into commercial importance within recent years as a result of clearing away the original forests for agricultural purposes. This old field type promises to increase in value more and more with the corresponding increase in the price of wood products. Old fields are common both in the South and in the North, although they arise from different causes and become reforested with different species of trees.

In the South, before the Civil War, vast areas of land were in cultivation which have since been allowed to return to forest. Many thousands of acres were often included within a single plantation, mostly cleared, and growing splendid crops of cotton, corn, tobacco, and many other valuable farm products. It is common to-day to see in certain sections of the South, old plantations of great extent that are now growing up with loblolly, or as it is generally called, old field pine.

The war was responsible for this neglect of cultivated land. With the freeing of the slaves the immense plantations could no longer be managed and the land was abandoned. In many cases, however, the land was impoverished through many years of cultivation, but with the use of fertilizers will be reclaimed in the future. Farmers now point out splendid stands of pine already large enough to be lumbered, on land that they once plowed. Growth has been phenomenal, the trees being often 12 to 14 inches in diameter at an age of no more than twenty to twenty-five years.

Loblolly pine bears seed prolifically nearly every year and being light these seeds are carried long distances by the wind. The open fields offer ideal places for the young trees to start. The ground has been worked many years and there is no young oak brush to interfere with their growth as in the case of the stump or cut-over lands. Longleaf pine, on the other hand, seeds much less abundantly and the seeds being heavier are not carried by the wind far from the mother trees, so that its reproduction is much less abundant. The loblolly, however, is most aggressive in taking possession of abandoned lands and preeminently deserves its popular name of "old field pine."

Through this natural reforestation nature has freely furnished a source of income on land that would otherwise have been unproductive all these years. Yet it has not been until recently that the old field pine was thought to have any value. There were forests of longleaf pine everywhere close at hand and the wood was much superior for every purpose. Fence rails made from longleaf pine last many years, but loblolly rails soon decay and must be frequently replaced. Railroads through the pine country would accept nothing but longleaf pine for ties. So the old fields were allowed to grow up and remain untouched except that occasionally the owner would cut down a few trees to prevent them from encroaching into his very door yard.

Ideas are changing rapidly now as to the values and uses of certain woods. The longleaf pine is disappearing from the land and there are few young trees to take the place of the old. Necessity for future wood material has resulted in many investigations and experiments with inferior kinds of wood. Loblolly or old field pine has been found to be exceedingly durable when impregnated with creosote. This has given the old field pine a new value and to-day thousands of railroad ties are cut near the railroads and shipped to treating plants to be creosoted. Small portable mills are easily and cheaply located and many of these are now cutting the best trees in these old field stands for lumber to be used locally among the farmers. The future lumbering will be carried on extensively in these second growth stands of oldfield pine.

The situation in the North is very much the same. White pine is here found occupying the old fields much as loblolly pine does in the South. The seeds are light and are carried considerable distances to the open fields where they find plenty of light and suitable soil conditions to make excellent growth.

Fifty years ago or more there were many small areas under cultivation which have since been abandoned and have now grown up to white pine. Farming has always been on a small scale but with the development of great farming interests in the West, the farmer of the Northeast has been handicapped in his competition for the markets. Many of the younger generation have left the old home farms and gone to the cities for more lucrative employment. All this has resulted in abandonment of old farms and fields and many of these are growing up to pine. There is a tendency for men who left the farms many years ago to return and spend the summer months among their boyhood surroundings. They love the native forests and consequently encourage the growth of pine in the fields once cultivated. So there is an esthetic as well as a commercial value attached to this young growth.

The white pine of the Northeast does not compare in rate of growth with the old field pine of the South, but the wood is more valuable for lumber, boxboards, shingles, and other purposes, and the demand for second growth pine is very great. It is estimated there are 800,000 acres of abandoned land in southern New Hampshire and a large part of this is growing up to white pine. Investigations show that it is most profitable to lumber these second growth stands of white pine when they are fifty to sixty years old.

There is a large and increasing source of wealth in our old field pine lands. It is never the object of forestry to encourage tree growth on land that is better suited for agriculture. At the same time there are vast areas uncultivated that are producing no income to their owners. Such land should be permitted to grow trees and be protected from fire and misuse until such time as they may become more desirable for other purposes.

L. G. Cook Farm for Sale.

The well known L. G. Cook farm, located on Eddy Run, in Shippen township consisting of 450 acres—200 acres improved—is offered for sale. Proposals for purchase or rental will be considered. This farm is one of the best fruit and hay farms in the county and is a golden opportunity for the right party. Also for sale five tons of fertilizer and a quantity of sawed lumber. Apply to Mrs. NELLIS PEARL Emporium, Pa. 5-1f.

English Spavin Liniment removed Hard, Soft or Calloused Lumps and Blemishes from horses; also Blood Spavins, Curbs, Splints, Sweeney, Ring Bone, Stiffes, Sprains, Swollen Throats, Coughs, etc. Save \$50 by use of one bottle. A wonderful Bleemish Cure. Sold by L. Taggart, druggist. 32-1yr

For Sale at a Bargain.

One pair of draft horses, sound, and in first-class condition. Also one single draft horse. Owner has no further use for them. Inquire at this office, or address Lock Box E, Emporium, Pa. 4 6t.

Wm. H. Anderson, M. D., of Soda Springs, Ida., says that Bees Laxative Cough Syrup has relieved coughs and colds where all other remedies failed. Its gentle laxative effects especially recommend it for children. It is pleasant to take. For coughs, colds, hoarseness, whooping cough. Money refunded if not a relief. Sold by R. C. Dodson. 3m

A BEAUTIFUL FACE

Before Using If you have pimples, blotches, or other skin imperfections, you can remove them and have a clear and beautiful complexion by using **BEAUTYSKIN**. It Makes New Blood, Improves the Health, Removes Skin Imperfections. Remedial results guaranteed or money refunded. Send stamp for Free Sample, Certificates and Testimonials. Mention this paper. After Using. CHESTER CHEMICAL CO., Madison Place, Philadelphia, Pa.

DR. CALDWELL'S SYRUP PEPSIN CURES INDIGESTION.

Straight Talks on Patent Medicines

The "Rexall" Remedies are successful and this is why. They were placed on the market three years ago. They have scored already the record of the greatest success ever known in the history of the drug business.

"Come and go" popularity may arise from any number of causes (hullabaloo advertising among them) and may or may not be founded on real worthiness. But the man, the plan, the idea, or the article that truly succeeds, does so because he or it *deserves* to succeed, and for no other reason.

The success of the "Rexall" Remedies is therefore the first evidence of their real merit. They sell because they cure, and they cure because each one of them is the best remedy known to medical science for the particular ailment it is made to relieve.

There are nearly 200 remedies sold under the "Rexall" name, each for one disease or one purpose. Each of these has been selected by a committee of experts from among *all other remedies of its class*, for manufacture and sale by The United Drug Company, a cooperative association of leading American druggists.

Wherever you see the name "Rexall," you may know that it stands for a formula scientifically correct and proved efficient in actual, long extended practice. We know these formulas and are glad to answer all inquiries regarding them, giving full information as to the ingredients.

Here are three famous members of the "Rexall" family:

FOR CATARRH—MUCU-TONE

The chief ingredients of Mucu-Tone are Gentian, Cubebs, Cascara Sagrada, Glycerine, and Sarsaparilla. Gentian is recognized in medicine as one of the greatest tonics ever discovered. It is the foundation on which Mucu-Tone is built. Gentian combines in high degree the tonic powers of all the known "bit-ter" with none of the disadvantages applying to them.

Cubebs have long been recognized as a specific in the treatment of all catarrhal conditions. Its action is prompt and its benefit almost invariably. In whatever part of the body the inflamed or diseased condition of the mucous membrane exists, the use of Cubebs has been recommended by the best physicians for many generations.

Cascara Sagrada is especially introduced for its necessary laxative properties. The combination of these with Glycerine and Sarsaparilla makes Mucu-Tone a remedy that attacks catarrh from every point, gradually restores and rebuilds the diseased tissues to their former health and strength, promotes digestion and creates a normal appetite. Bottle, 50c.

REXALL DYSPESPIA TABLETS

The remarkable success of Rexall Dyspepsia Tablets is largely due to the new and successful method of manufacture, whereby the well known properties of Bismuth Subnitrate and Pepsin have been combined with carminatives and other agents. Bismuth Subnitrate and Pepsin are recognized by the entire medical profession as specific for acute indigestion or chronic dyspepsia.

The pepsin used is manufactured under a new process which develops its greatest efficiency. Pepsin not only supplies to the digestive machinery one of the most important elements of the digestive fluid, but it seems to exert a tonic influence upon all the glands which supply all the other elements.

The carminatives add properties which promptly relieve pains caused by undigested food. The combination of the whole makes a remedy absolutely invaluable to any man or woman suffering from Dyspepsia—and not only a remedy but a cure which works gradually rebuilding and stimulating the glands which perform the digestive functions. Package, 25c.

FOR NERVES—

AMERICANITIS ELIXIR

The Rexall Americanitis Elixir is a tonic nerve food composed chiefly of free Phosphorus, Glycophosphates, Iron Pyrophosphate and Calisaya.

The wonderful results of this remedy are due to the fact that it supplies Phosphorus to the nerve cells in a condition in which it can be immediately and easily taken up by them. It is the only known preparation in which free Phosphorus—that is, Phosphorus which remains indefinitely unoxidized—is used.

The Glycophosphates, actual nerve-tissue builders, are one of the most recent and valuable additions to the field of this branch of medicine and unquestionably a more efficient remedy than the well-known Hypophosphites.

The Iron Pyrophosphates is the most easily assimilated form of iron which gives tone and color, and the combined alkalis of Calisaya Bark have a tonic effect on almost all the functions of the body. In compounding these various elements, the very highest degree of pharmaceutical skill has been employed. 75c. and \$1.50 a bottle.

This "Rexall" Guarantee Appears on each package: "This preparation is guaranteed to give satisfaction. If it does not, come back and get your money. It belongs to you and we want you to have it."
