CAR STRIKE IS SETTLED

MOTORMEN AND CONDUCTORS TO RECEIVE 22 CENTS AN HOUR.

"Swing System" Is Abolished and Ten Hours Will Constitute a Day's Work for Philadelphia Street Car Men.

Philadelphia, Pa.—"The strike has been settled. The men will receive 22 cents an hour and 10 hours will constitute a day's work." This statement, emanating from C. O. Pratt, chairman of the executive committee of the Amalgamated Association of Street Railway Employees, the leader of the striking motormen and conductors, followed by the deportation of the 450 strike breakers who came here from New York, ends the strike of the employees of the Philadelphia Rapid Transit Co. The men go back to work immediately.

The termination of the trouble between the company and its employees was brought about primarily by State Senator James P. McNichol, the Republican leader of this city, at conferences with the traction officials and the strikers' representatives. These conferences were followed by additional meetings. The delegates chosen by the strikers met Pratt later in the day and discussed the proposition which had been made by the traction people. Some of the delegates insisted upon 25 cents per hour, while others thought 22 cents an hour and a 10-hour day was a fair compromise.

After being in session nearly all day the men agreed to accept 22 cents an hour. The old "swing system" has been abolished; 10 hours will constitute a day's work; all employees will be permitted to purchase their uniforms in the open market; all future differences are to be adjusted between the company and a grievance committee chosen by the employees. If, after an investigation by the city controller of the books of the company, it can be shown that more than 22 cents an hour can be paid without crippling the finances of the Rapid Transit Co., then the men will insist upon a further advance in wages.

TRADE CONDITIONS IMPROVE

Increased Orders, Expanding Production, Higher Prices and Wages Shown in Iron and Steel.

New York City.—R. G. Dun & Co.'s Weekly Review of Trade says:

Every test by which trade conditions are determined records improvement. In the iron and steel trade the progress made is, indeed, extraordinary, and again does this branch of industry give a signal proof of its power to rise out of the depths of the depression with wonderful rapidity. Increased orders, expanding production, higher prices and wages, and in some lines records approaching even the high figures before the panic—such are the reports that now come from the trade every week.

Thus the recent progress making toward full business recovery in the United States is most notable, and it is facilitated by favoring financial conditions. The effects of the late crisis are still to be seen in the large volume of commercial defaults, although this seems a passing condition, as the aggregate of these in May was the smallest of any month of this year. Business world moves ahead regardless of tariff and crop uncertainties.

WOODENSTEAMER DESTROYED

Iron Age Burns to Water's Edge in Lake Erie—Captain and Crew of Nine Men Escape.

Detroit, Mich.—The wooden steamer Iron Age, 226 feet long, burned to the water's edge 10 miles southeast of Bar point in Lake Erie. Capt. William J. Willoughby and his crew of nine escaped in a small boat, but lost all their personal effects. So quickly did the vessel burn that scarcely 15 minutes elapsed between the discovery of flames around the smokestack and the order for the crew to take to the small boat. Capt. Willoughby and his crew were brought to Sandwich, Ont., by the steamer Warner.

The Iron Age, valued at \$32,000 and insured for \$5,000, was owned by her captain, W. J. Willoughby of Windsor, Ont., and her engineer, Richard Baxter, also of Windsor. All the members of the crew hailed from Windsor and vicinity. The vessel was engaged in carrying coal from Cleveland to Sandwhich for the Pittsburg Coal Co., and was bound down light. Wrecking tugs went from Amherstburg to tow the derelict into the Detroit river.
