Flocked to See Mrs. Siddons. According to Dean Ramsay, "in the year 1784, when the great actress, Mrs. Siddons, first appeared in Edinburgh, during the sitting of the general assembly, that court was obliged to fix all its important business for the alternate days when she did not act, as all the younger members, clergy as well as laity, took their stations in the theater on those days by three in the afternoon."

Marvelous. "More than 5,000 elephants a year go to make our piano keys," remarked the student boarder who had been reading the scientific notes in a patent medicine almanac. "For the land's sake!" exclaimed the landlady. "Ain't it wonderful what some animals can be trained to do?"

As to Bottle Babies. A Kansas editor braves a lot of scorn when he declares that one way to stop the ravages of tuberculosis in milk is to not have any bottle babies around the house. Some one will tell him, if he doesn't watch out, that bottle babies make bridge clubs possible. —Kansas City Journal.

Fulfilling Instructions. The managing editor wheeled his chair around and pushed a button in the wall. The person wanted entered. "Here," said the editor, "are a number of directions from outsiders as to the best way to run a newspaper. See that they are all carried out." And the office boy, gathering them all into a large waste basket, did so.—Green Bag.

Its Headquarters. Once upon a time a child who was asked upon an examination paper to define a mountain range replied: "A large-sized cook stove." And the answer on one paper said: "The stomach."—Everybody's Magazine.

Modern Life So Depends Upon Medical Science that, whether humanity is willing or unwilling, the profession is indispensable to progress.
