**A New Delight—
Foods Shot from Guns**

There are myriads of homes where these foods are not new—these delicious Puffed Wheat and Puffed Rice.

The people who know them are already serving seventeen million dishes per month.

But to millions of others these foods remain a new and unknown delight. And to those this appeal is addressed.

The appeal is to try one package—just for the children's sake.

Serve it tomorrow morning. Listen to what they say. Then ask them what food they want next.

Wheat and rice are common foods, prepared in numerous ways. See if this way is best.

We make all sorts of cereal foods, so it matters little to us which kind you prefer.

But it means much to you to get the food that you like best. See if Puffed Wheat is that food.

Puffed Wheat—10c Puffed Rice—15c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.
