All Who Would Enjoy

good health, with its blessings, must understand, quite clearly, that it involves the question of right living with all the term implies. With proper knowledge of what is best, each hour of recreation, of enjoyment, of contemplation and of effort may be made to contribute to living aright. Then the use of medicines may be dispensed with to advantage, but under ordinary conditions in many instances a simple, wholesome remedy may be invaluable if taken at the proper time and the California Fig Syrup Co. holds that it is alike important to present the subject truthfully and to supply the one perfect laxative to those desiring it.

Consequently, the Company's Syrup of Figs and Elixir of Senna gives general satisfaction. To get its beneficial effects buy the genuine, manufactured by the California Fig Syrup Co. only, and for sale by all leading druggists.

AS UNDERSTOOD IN BOSTON

Traditional Episode of "Little Miss Muffet" Brought Into Every-Day Cognizance.

A diminutive specimen of juvenile femininity yelept Miss Muffet had placed herself in a sitting posture upon an article of household furniture ordinarily termed an ottoman or has

Miniaturing to the gratification of her gustatory organs by ingurgitating the coagulated portion of bovine lacteal fluid mingled with the watery serum of the same which remains after the coagulated portion has been segregated and withdrawn.

Happening to glance downward she observed that a specimen of the genus Aranea, class Arachnida, remarkable for its ability to produce filaments of extraordinary tenuity from its own interior, had taken a position upon the ottoman or hassock in immediate prox-

Which totally unexpected incident aroused her apprehension to such an extent that she immediately, not to say precipitately, arose from her sitting posture and departed from the locality, leaving the intruder in undisputed possession of the apartment.

NOT SO BAD.

Nervous Lady-Don't your experi-ents frighten you terribly, professor? I hear that your assistant met with a horrible death by falling four thousand feet from an aeroplane

Bold Aviator-Oh, that report was greatly exaggerated.

Nervous Lady—Exaggerated! How? Bold Aviator—It wasn't much more than two thousand five hundred feet that he fell.

RASH ALL OVER BOY'S BODY.

Awful, Crusted, Weeping Eczema on Little Sufferer-A Score of Treat ments Prove Dismal Failures.

Cure Achieved by Cuticura.

"My little boy had an awful rash all over his body and the doctor said it was eczema. It was terrible, and used to water awfully. Any place the water went it would form another sore and it would become crusted. A score or more physicians failed utterly and dismally in their efforts to remove the Then I was told to use the Cuticura Remedies. I got a cake of Cuticura Soap, a box of Cuticura Ointment and a bottle of Cuticura Resolvent, and before we had used half the Resolvent I could see a change in him. In about two months he was en-tirely well. George F. Lambert, 139 West Centre St., Mahanoy City, Pa,. Sept. 26 and Nov. 4, 1907."

Potter Drug & Chem. Corp., Sole Props., Boston The Rare Gift of Courtesy.

Courtesy includes not merely social kindness, graces of speech, absence of rudeness, but honoroable treatment of business associates and of all the fellow citizens with whom a man of afmay have business to transact It is not American to keep one citizen waiting all day at the door be-cause he is poor, and to grant an-

other citizen an interview because it is believed he is rich. Wisdom is not confined in a purse, and frequently much wisdom may be learned from a Loor man.

METHOD TO COMPLETELY ERADICATE THE BINDWEED

This Injurious Plant May Be Exterminated in Any Field or Orchard if Proper Effort Made-By H. R. Cox.

The only successful methods for the | flood times, is also a factor in distribueradication of bindweed must be based on the suppression of all top growth, Bindweed can be eradicated by in order to starve out the underground parts. A great many farmers are looksuch a formidable enemy as this weed requires heroic treament. Other farm-cultivate as thoroughly as is neces-

clean cultivation if thorough and persistent. The case requires going over ing for some easy method of killing the land once every week or ten days the bindweed, and in the meantime are during the entire growing season of letting it cover the fields and festoon the weed, which is between the spring the trees of the orchard. They are and fall frosts. Two years of this looking for some magic "remedy" that treatment will accomplish the result will completely eradicate the weed in most cases, and it is probable that with a small amount of exertion on one year will suffice where the plant their part. It must be understood that ers have gone at the problem less sary. Even a small top growth is heedlessly, as in the case of a man enough to form some new underwho followed the root of a plant to the depth of four feet and then applied roots or root stocks, thereby carrylarge quantity of salt in the hole.
Various methods have been tried Cultivation has the further advantage

Showing Flower, Roots and Weed Cutter.

hence starve out the underground seeds of the weed which are in the parts. There are three methods that soil, the young seedlings being prompt-have given satisfactory results, namely, clean cultivation, alfalfa growing and hog pasturing. There are other methods that have been tried, but not with a large measure of success.

Conditions is orchard lands are such as to offer a favorable opportunity to get rid of this weed, or at least so reduce it that it does not do much The water of streams, especially at and is comparatively inexpensive.

These include the placing of building paper, beet pulp, apple pomace, straw or manure on the ground to smother the weed growth, and also the application of chemicals. Conditions in irrigated regions are complicated by the fact that bindweed is often allowed to grow along irrigation ditches, the water in which distributes the seed.

PROFITS IN BASKET WILLOW

Tree and Wide Opportunities for Articles Made from It -By W. F. Hubbard.

Willow growing gives an uncommonly high margin of profit. A large demand for willow is now supplied by Cuttings fo import, and as American-grown rods are of good quality when proper care is taken in their culture there is no reason why the further development of the industry should not be possible of the industry should not be possible if more American farmers can be conlong for moist, rich soil, and 12

vinced of its practicability. of late years willow furniture has sprung into fashion and to-day no minor industry is more prosperous they may be made several weeks in a state moist sand and stored in a demand a steady supply of superior cold barn until needed.

This is now almost entirely received from France at a price which will give the entire trade to the American if he

can equal the quality.

Great care should be taken in the selection of the willow beds. Rich, permanently moist sandy loam gives best manently moist sandy loam gives best ciple holds for all willows and for all returns, though ordinary moist sandy soils: The closer the cuttings are land often yields profitable crops of

soils produce paying crops Poor where there is a market for short rods. Avoid land on which water is stagnant during the summer. If by stagnant during the summer. If by drainage the water level on such land can be lowered at least six feet below the surface the situation may be considered appropriate.

Do not plant willows in localities where early frosts occur. shoots are easily injured by the

Plow tensor twelve inches deep in the fall, prior to planting the following spring. This turns the top layer of the soil so deep that weed seeds cannot spring up.

If rain is insufficient, irrigate the willow bed if possible, but thorough drainage must be provided, as water must not stand on the surface. It is best also to keep the land well drained during the winter.

Returns depend very largely upon the method of culture, but more upon the variety of the willow planted, because the shoots of even the best varieties and in the most suitable soil grow brittle after the stools become

The American green and Welsh wil- \$25,000 to pay one-third of the full aplows are most generally planted. The praised value of live stock destroyed rods of the former peel readily, split on account of foot and mouth disease and heavy.

They have a tendency to branch, however, and unless the stools are planted close together a large percentage of the rods branch so much that they are often unfit for peeled stock.

A good basket willow possesses the American Soil Well Adapted to following characteristics: (1) Ability to yield an annual and uniformly paying crop of rods; (2) flexibility; (3) productiveness—i. e., many shoots to each stool; (4) slender and branchss rods; (5) smooth and white wood

Cuttings for plantings should be made from one-year-old shoots. The length of the slips is regulated by the condition of the soil. The richer the soil is the shorter the cuttings may be.

inches for dry, sandy soil.

Bury the cuttings in sand to within one inch of the top. be taken to have the buds point upward.

Plant early in the spring, as soon as the frost is out of the ground. In spacing the plants the following prinplanted the more valuable-i e flexible, tough, slender and branchless the rods become. On the other hand,

Poultry in the Orchard

Poultry may often with advantage be kept in the orchard. This makes it possible to engage in poultry keeping on a considerable scale without any cost for land, writes James Dry den in Farm Press. In other words, a double use of the land may be made. The trees afford shade to the fowls in warm weather. It will be necessary to furnish them ample green food at all times, especially when the apples are on the ground If no other green food is available they are liable to eat an injurious amount of apples. On the other hand, poultry is a decided advantage to the orchard as an aid in the warfare on insect enemies.

Pay for Stock Destroyed

The legislature of New York has been asked to levy an appropriation for the commissioner of agriculture of and eradicating that dispase.

FINE RECIPE FOR COLDS.

Any druggist can supply these ingredients or will get them from his

wholesale house.
"Mix half pint of good whiskey, two ounces of glycerine; half ounce Concentrated pine compound. Shake the bottle well each time and use in doses of a teaspoonful to a tablespoonful four times a day." This prescription is said to work wonders.

The Concentrated pine is a special pine product and comes only in half ounce bottles, each enclosed in an air tight case, but be sure it is labeled "Concentrated."
