

PROOF POSITIVE.

"I believe I once had the pleasure of meeting your wife." "If you consider it a pleasure, it is not she." "Relieved in... DEN HIM. Cured by Cuticura in a few..."

"I am seventy-seven years old, and some years ago I was taken with eczema from head to foot. I was sick for six months and what I suffered tongue could not tell. I could not sleep day or night because of that dreadful itching; when I did sleep it was from sheer exhaustion. I was one mass of irritation; it was even in my scalp. The doctor's medicine seemed to make me worse and I was almost out of my mind. I got a set of the Cuticura Soap, Ointment and Resolvent. I used them persistently for twenty-four hours. That night I slept like an infant, the first solid night's sleep I had had for six months. In a month I was cured. W. Harrison Smith, Mt. Kisco, N. Y., Feb. 3, 1908." Potter Drug & Chem. Corp., Sole Props., Boston.

She Could Not.

"With one wave of my wand," says the fairy, "I can make you grow young again."

"Excuse me," replied the woman, "if I decline your kind offer. If you can bring youth to me at my present age, all right; but I positively refuse to travel back through pyrography, the first stages of bridge, the habit back, the straight front, the balloon sleeves, and all the rest of the fads I can remember."

BEAN RUST DISCOVERED AMONG COMMON PLANTS

Destructive Disease, Similar in Character to that Which Often Attacks Wheat—Has Three Stages—By L. H. Pammel.

For a number of years we have had under observation a rust occurring rather abundantly on the common bean, especially the pole bean. During the summer of 1908 specimens of the rust were sent in by a correspondent from Grinnell, Ia., where it was common and destructive. During the same season the cluster-cup stage was reported by one of us at La Platte, Mo. That stage of the disease is of especial interest because of its source of infection on the cultivated bean.

This bean rust in its development is not unlike the common wheat rust, which has three stages. In the case of

The number of the cups (aecidia) varies from 4-6 in the smaller spots to 20-25 in the larger spots. They are pale in color, the peridial cells being colorless. The spores are spherical to elliptical 10-26 u in diameter, minutely roughened. The spermatogonia are on the upper surface of the leaf, minute; the spermatia small, spherical. The uredospores occur in spots which are at first roundish, but later, becoming confluent, for irregular patches frequently quadrangular in form; the sori or pustules of the fungus occur on the surfaces of the leaf, and not in troublesome spots and peduncle, occasionally becomes a spot, cause serious loss. It is recur-

wheat rust, the first stage is upon the barberry, but in the case of the bean all three stages occur upon the same host plant.

The aecidium or cluster-cup stage occurs upon the under surface of the leaves in definite spots. The color of the leaf in the vicinity of the spots does not differ materially from the color of the remainder of the leaf.

Pammel and by Beach as destructive to late varieties, particularly to the wax bean.

Careful selection of seed grown in regions where the rust is not found, the burning of old bean leaves likely to contain winter spores, and the destruction of wild beans in the neighboring grounds are the best means to hold the bean rust in check.

ENGINES ON SMALL FARMS

Twenty-Horse Power Engine at Work.

The use of the most "modern machines" in farming in Kansas is by no means restricted to the huge ranches. In nearly every locality in the state there are farmers who are using traction engines, with either steam or gasoline for power, to plow and harrow.

Near Muscotah, Kan., there is a ranch comprising 680 acres, on which the plowing and harrowing is being done with a 20-horse power gasoline engine. This hauls four 14-inch gang plows and a two-horse harrow—the equivalent of saying that the engine

does the work of 20 horses. The distance traversed—and it's over "tough" soil, too—is from two to two and one-half miles a day. One narrow is placed off to the side so that the result is a double harrowing of the ground without making a second trip.

There were many doubters of the advisability of investing in an engine for a tract of 680 acres. It was considered too small an area to warrant the initial expense for the machine. The owners of the ranch, however, say that the engine soon will save its own cost. Thus far in the test it has proved entirely satisfactory.

APPLE BARRELS VERY COSTLY

Manufacturers Report Good Inquiry for Finished Stock, Also for Staves and Heads.

Barrel manufacturers report a good inquiry for finished apple barrels, also for staves and heads. Prices promise to rule about as high as last year, says Orange Judd Farmer. In a general way new apple barrels, three-bushel standard, are quotable in a wholesale way to 32 to 35 cents each. A manufacturer at St. Louis quotes 35 cents f. o. b. A Kansas City cooper quotes No. 1 apple barrels at 35 cents and No. 2 at 30 cents f. o. b. factory. He writes that apple

crop is light in that section. With no relief in price of containers, this fact must be considered in contracting the crops now on the trees.

The price of new apple barrels in the west is much as last year, coopers asking something close to 35 cents each for new barrels, standard size. Some of the large growers buy barrel stock and put up their own barrels. This season such will cost them about 32 cents, or possibly a little less, in thus handling them.

In the apple territory between Cincinnati and Philadelphia there is nothing to indicate any lower prices for apple barrels with lumber and timber held so continuously high. Manufacturers in West Virginia are quoting new barrels at 32 cents each.

The demand for animals of good dairy breeding is greater than the supply.

The bottle must be well shaken each time. This simple remedy is one of the most effective known. The restorative action will be felt after the first few doses.

The Remarkable Trimming.

"Jimmy," said the pretty actress to her actor husband, "won't you run down to the milliner's and get me the hat I ordered?"

"Sure I won't make a mistake!" queried Jimmy, somewhat dubiously, with a caution born of an utter ignorance of millinery.

"Oh, you won't," laughed the spouse. "It is the white beaver trimmed on-ya!" And the fyer can remember made funny Parisian girls.

One Was Enough for Johnny.

The Sunday school lesson was from that scripture which teaches that if your brother strike you on one cheek, you should turn the other also and endure even for seventy times seven. Johnny had listened to his teacher very attentively, while she emphasized this fact, and after the lesson the superintendent rose to make a few remarks.

"Now, boys," he said, "how many times ought another boy to strike you before you hit him back?"

"Just about once!" promptly answered Johnny.—Delineator.
