Yours truly. C. B. HOWARD & CO. Knew It Was a Canal.

Some of these youngsters who are studying physiology have as hard a time as their parents figuring out the terms used in that profoundly interesting subject. One little girl, according to her mentor, was asked the other day to name the three openings into the throat. For the benefit of the gentle reader who may not have studied physiology recently it may be stated that the openings are the epiglottis. e esophagus and the alimentary ca-

The Bucket Shop.
"Bucket shops"—a name now used to denote small "outside" stockbrokers or financiers not in membership with the Stock Exchange—were so called because when they first started in y small speculators to any exte as wheat. The legitimate deale ould not handle an order for le han 5,000 bushels, and then a lot claces sprung up where men of lined capital could speculate with vermall sums, and these men were spe sold, and it was applied particularly to those places where both seller and buyer did not more than "gamble" on the rise and fall of stocks.

Why is it that a man's hat has a band, and why is it this band has a

bow invariably on the left side?

The answer is that there was a time when a piece of cloth adjusted to the head and tied with a band of other material served for a headpiece. The reason the bow was always placed on the left side had its origin in the fact that in wielding a sword-an ac-complishment possessed by nearly evy one of consequence at one period the world's history—the bow or of the world's history—the bow or rosette if placed on the right side would have been in the way. Its present day utility is that it keeps most men from wearing their hats hind side before, and, although with most hats that would not matter, with most heads it does.—Chicago Record-Herald.

the moon?" has been put to an emi-nent astronomer, who replied: "I am afraid not. A man transplanted to the moon would find bimself the lone in-habitant of a perfectly lifeless orb in which eternal silence reigns. He would have to manage without air, water or fire. He would not need to put windows In his house, for there is no wind, no rain, no dust, upon the moon. It has been truly and practically observed that the moon is apparently abandoned to death, nourishing no inhabitants, producing nothing resembling trees, flowers or beautiful things of any kind—useless, in short, except as a mass of extinct volcanic rubbish, which drags the sea into tides and re flects the sunbeams in moonlight."

The Dean's Retort.

One Sunday morning at Caunton church Dean Hole noticed a tipsy man in the congregation. He bore his presence until it was no longer possible and then came to a halt with the state of the congregation. question, "Are you fit to remain in God's house?'

The man got up unsteadily and was helped to the door.

Names In Politics.
"I want to make a name for myself in politics," said the ambitious youth.
"Well," answered Senator Sorghum, "it's liable to be a long and difficult enterprise. You'll probably have to put in a considerable share of your time allowing your enemies to call you any names they happen to think of."—Washington Star.

Theaters of Different Ages.
The difference between the play-house in which we see a drama of Bronson Howard's today and the play-house in which Sheridan's comedies were originally acted is greater than the difference between Sheridan's Drury Lane and the house for which Congreve wrote and in which Better-ton acted. And that restoration playhouse was very unlike the Elizabethan theater for which Shakespeare wrote and in which Burbage acted. Even more apparent is the difference be-tween the theater of Dionysius at Athens and the Roman theater at Orange. These theaters are sharply distinguished from one another by their size, by their shape, by their methods of Illumination, by the ab-sence or presence of real scenery and by the arrangement of the seats for the spectators, and as we study these successive changes we are confirmed in the conviction that these physical conditions must have exerted a powerful influence upon the dramatists who followed one another down the centuries.-Brander Matthews in Cen-

Wisdom In Fable.

Among the best things that have ever been written are the Aesop's fables, which date back to the sixth cen-bles, which date back to the sixth cen-tury B. C. They present human na-ture as it always has been, is and probably always will be. Take, for example, the story of "The Fox With-out a Tail:"

out a Tail:"

"A fox was once caught in a trap
by his tail and in order to get free
was obliged to leave it behind. He
knew that his fellows would make fun
of his tailless condition, so he made
up his mind to induce them all to part
with their tails. At the next assembinge of foxes he made a speech on
the uselessness of tails in general and
the inconvenience of a fox's tail in he sat down a sly old fox rose and, waving his brush, said, with a sneer, that if he had lost his tail he would be convinced by the last speaker's arguments, but until such an accident occurred he fully intended to vote in favor of tails."

Peculiar Superstitions.
The people of Kulu are extremely superstitious and go in extensively for demonolatry. Many trees are held to be sacred and have tiny temples dedicated to them. The demons are popularly supposed to live at the tops of that it is possible to pass under it, as is often the case on the mountain sides every man before going beneath the trunk will place on it a stick or stone to propitiate its guardian spirit. Cer tain streams are also sacred, and none is allowed to wash dirty clother one is allowed to wash dirty clothes in them. One year some strangers came into the valley and happened to pollute the water of a river in this manner. It chanced to be a year of extraordinary rainfall, and the people implicitly believe that the excessive rain was sent by the outraged "deota" of the stream as punishment.—Wide World Magazine.

Helping Hubby Out.
"Your wife seems to be wonderfully interested in your business. Must be "Yes, indeed. Do you know I used to think she cared nothing about it."
"Why the change?"

"I don't know. That's the funny part of it. I can't imagine what has changed her. A few nights ago I went home, tired most to death, and during the evening I casually remarked: Tole, my business is getting most too much for me to handle. I am thinking of employing a nice, steady stenographer and typewriter. Don't you think it would be a good idea? From that moment the good little woman has been extremely anxious to assist me and make my lot easier in every way. I suppose it's her naturally sympathetic nature. It must be."—

A Brilliant Judge.
Steady Baker was at one time mayor of Folkestone, England. Once a boy was brought before him for stealing gooseberries, and Steady, aware of the importance of the case, turned over the pages of the alphabetically arrang ed "Burn's Justice" for a precedent Failing to find one, he turned to the culprit. "My lad," said he, "it's lucky for you that you were not brought here for stealing a goose instead of for stealing gooseberries. There is a statute against stealing geese, but I can't find anything about gooseberries in all 'Burn,' so let the prisoner be discharged, for I suppose it is no offense.'

The Way Down.
They had been making hay while the sun shone, and when they had finished a high haystack the farmer's boy shouted from the top, "Say, mis-ter, how am I goin' to get down?" The farmer considered the problem

and finally solved it:

"Oh, jest shet yer eyes an' walk round a bit!"—Everybody's.
