The Epicurean Badger. The badger is a great epicure in eggs, and much of the hostility of gamekeepers to this animal lies undoubtedly in the fact that it will, when it gets the chance, devour a whole nest of partridge or pheasant eggs. Badgers are said also to be fond of honey, and, knowing the extraordinary craving of their South African cousin, the ratel, for this delicacy, I should say it is not improbable that they may occasionally partake of it. It is certain that these animals have a particular liking for the nest and larvae of wasps and wild bees, digging down with strong feet and infinite perseverance till they attain their object. These animals are said by keepers to kill and devour freely young rabbits. That they do partake of this fare at times is, I think, certain, but that they destroy any very considerable number is more than doubtful. Still, the badg-er is carnivorous in his tastes and is not, even by his kindliest friends, to be absolved from devouring at times tender rabbits and even the young of game birds when he can get hold of them .-- Westminster Gazette.

Strange Fishing Matches. In the olden time in England lords and ladies sometimes invented queer amusements. They were always on the lookout for some novelty, and one of the strangest they discovered was fishing by a goose. A line with a bait-ed hook attached having been fastened to the goose, tied to its leg, she was flung into the water from the boat in which were all the gay lords and la-dies. Then, when a pike caught the bait, she was sport indeed, a royal battle between bird and fish, and all the time, between the loud splashings, wheelings and flounderings, the onlookers in the boat giving vent to their feelings in cheers, handclappings and handkerchief waving. But the goose was usually the victor and ended the struggle by landing its prisoner on the shore, where its quack-quack as it shore, where its quack-quack as it cleared itself from the line and wad-dled away ended the scene. The lake of Monteith, in the southwest of Perth-shire, was often the scene of such angling matches

The Soldier Ant.

The lion is the king of beasts, but all of his magnificent strength and ferocity would avail him nothing when he faced a mere ant. But this ant is not the usual kind which peacefully goes about its domestic duties day by day. It is the terrible driver or soldier ant, said to be the most invincible creature in the world. Against these tiny enemies no man or band of men. no lion or tiger, not even a herd of elephants, can do anything but hurriedly get out of the way. Among the Barotse natives a favorite form of capital punishment is to coat the victim with grease and throw him before the advancing army of soldier ants. quickness with which the poor wretch is dispatched is marvelous when it is considered that each aut can do noth ing more than merely tear out a small particle of flesh and carry it off. Yet in a surprisingly short time the writhing victim will have been changed into a skeleton.

Old Saws and Sayings.

A few old sayings on the subject of food come to us rather as a surprise in our age of daintiness and refine ment, yet they have their raison d'etre notwithstanding. "Meat is much, man-ners are more;" "Cease your chatter and mind your platter;" "The ass that brays most eats least;" "The wing with the liver to him who's the giver;" "He a give little to his servant who licks his own trencher."

Apropos of this remark, it is amusing to note that "manners" was the name given to the remnants of a meal. These came to the remnants or a meat. These came to the servants as official perquisites; hence our well worn ex-pression before emptying a dish, "Leave the last slice (or whatever it may be) for manners," though if votes were collected on this point it is hardly likely the care of us result have to have likely that any of us would have taken it as it stands in the original.

CAME N COUNT

His Game Won.

In a campaign in Kansas some years go, when the tariff was made a domihant issue, an old German was runhing for a county office in central Kan-He didn't know enough about the tariff to talk about it two minutes. More than that, he didn't care much, for it had nothing whatever to do with the office he wanted anyway. But the voters were much excited over the question and seemed to think that every candidate should be able to discuss the problem from A to Izzard.

So this German and his campaign manager invented a successful subterfuge. When the German got up at the meetings to talk he would say: "Now, shentlemen, I vill talk mit you about der tariff. It is like"-

Just then his campaign manager would interrupt: "Why, John, you have only five minutes to talk. You cannot do yourself justice in that length of time on the tariff."

"Then I won't talk about dot tariff." would be John's inevitable reply, and he would go on to tell that he wanted a certain county office, and so on. His game won, and he was elected.-Kan sas City Journal.

Wheat Does Not Grow Wild. The existence of names for wheat in the most ancient languages confirms the evidence of its great antiquity and of its cultivation in the more temperate parts of Europe, Asia and Africa From the evidence adduced by botanists of high standing it seems highly improbable that wheat has ever been found growing persistently in a wild state, although it has often been asserted by poets, travelers and histo-rians. In the "Odyssey," for example, we are told that wheat formerly grew in Sicily without the aid of man. Diodorus repeats the tradition that Osiris found wheat and barley growing pro-miscuously in Palestine, but neither this nor other reputed discoveries of wheat growing wild seem at all credible, seeing that it does not appear to be endowed with the power of persistency except under continued culture.

The Mind During Sleep.

"During sleep," says an authority on mental subjects, "the workings of the mind are under no control, and yet it seems to have a wonderful faculty of building up and arranging scenes and incidents. I remember once having a vivid dream of going into a house the furniture and inmates of which belonged to the middle ages. So clear was the dream that I had no difficulty in recalling it, and then as 1 went over each detail of dress, armor, jewelry, ornaments and other objects seen in my vision I realized that everything I had beheld was historically thing I had benefit was distorted in accurate—that is to say, that probably in a fraction of a second my mind had conjured up a scene to construct which, with the same faithfulness to detail, while awake would have taken me several hours."

The Use of Condiments.

In an article on the use of condi-ments the London Lancet, the foremost British medical publication, says: "The classic experiments of Pawlow have shown how important is the role of the condiments in diet, how it is they improve appetite and increase di-gestive power. Mustard, pepper and salt, used, of course, in sensible amounts, assist the appetite, give a zest to food and partly by reflex action as well as local action stimulate the as wen as local action simulate the flow of digestive juices and insure healthy assimilation. Even vinegar is known to have a softening effect on tough fibers, and hence its use is justified in so many instances."

The English Pheasant. It is claumed that the pheasant of the English preserves can trace its ped-igree directly to the brilliant bird of the same species in Japan. About the middle of the nineteenth century a few live pheasants were brought from Japan and crossed with the common The result of this was, it is species. said, that a new race of birds was in troduced, and the beautiful pheasant, with its iridescent plumage, was produced and naturalized as an English bird.

1 A JULY 21, 1910.

Presence of Mind. A visitor to an insane asylum was walking in the grounds when a man came up to him and entered into con-After walking about for versation. some time, discussing topics suggested by the place, the two set out on a tour of inspection, the man, apparently an official, inviting the visitor to go over the asylum. At length they reached the foot of a flight of steps, up which the guide led the way, and at the top the visitor found binself out upon the roof, a height of more than a hundred feet from the ground. As they gazed below his companion startled him sud denly by proposing to see who could jump farthest toward the grounds! Not until then had it dawned upon the visitor that his guide was mad. Mercifully he was a man of ready wit, and his wit saved the madman's life, "Oh. anybody can jump down." said the vis-itor. "Let us go down and see who can jump to the top." The madman thought it a good idea, and, retracing their steps, the two began their jump from the earth instead of from the

The Mammoth Cave Rat. The cavern rat found in the Mam-moth cave is of a soft bluish color, with white neck and feet. It has enormous eyes, black as night, but quite unprovided with an iris. These eyes are perfectly insensible to light, and when the experiment has been made of catching a cavern rat and turning it loose in bright sunlight it blunders about, striking itself against everything, is unable to provide itself with food and finally falls down and dies. In its native depths, however, it is able to lead a comfortable enough existence, as its enormously long whiskers are so extremely sensitive that they enable it to find its way rapidly through the darkness. The principal food of the cavern rat consists of a kind of large cricket of a pale yellow color and, like most other cave dwell-ers, itself perfectly blind.

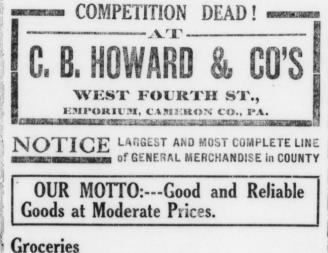

The Lilies.

Two thousand years ago if was sup-posed that water lilies closed their flowers at night and retreated far under water, to emerge again at sunrise. This was Pliny's view, and it was not impeached until the English botanist John Ray in 1688 first doubted its veracity. The great Illy of Zanzibar, one of the grandest of the Illy family, onens its flowers ten inches wide he opens its flowers, ten inches wide, be tween 11 in the morning and 5 in the afternoon. They are of the richest royal blue, with from 150 to 200 golden stamens in the center, and they remain open four or five days. It is not generally known that there are lilies that have nocturnal habits-night bloomers as well as day bloomers. They are very punctual timekeepers, too, opening and closing with commendable regularity.

Bunyan's Wicket Gate. In the village of Elstow there is abundant material that is visibly associated with John Bunyan. The isolat ed church tower contains the very bells in the ringing of which Bunyan rejoiced and afterward trembled. Above all there must be mentioned the wicket gate which figures early in the story of "Pilgrim's Progress." The wicket gate of "Pilgrim's Progress" is commonly represented as a garden gate or a turnpike gate, but really the term denotes a small doorway cut out of a large door. Concealed behind a tree at the west end of Elstow church is just such a small doorway in the broad wooden surface of the great door. Through this lowly opening Bunyan must often have passed when a boy .- Harper's Weekly.

The Major's Value. "Major Bunks," said a veteran, "was a pompous chap. The boys had a good deal of fun once over his exchange. "It seems that on a very dark night a stalwart Confederate took the major prisoner. This fact, together with the narrative of the prisoner's return to

Carthage's Great Snake.

The ancients firmly believed in mon-ster serpents of all kinds and of both the land and marine species. During the wars with Carthage a great snake is said to have kept the Roman army from crossing the Bagrados river for several days. The monster swallowed less than seventy Roman sol diers during this combat and was not conquered until a hundred stones from as many different catapults were fired upon it all at one time. The monster skull and skin were preserved and afterward exhibited in one of the Ro-man temples. The dried skin of the creature was 120 feet in length, according to Pliny.

Throat Trouble.

What's the "You look bad, old man. matter?" "Throat trouble."

"I didn't know you were subject to It.'

Yes, I am. This throat belongs to the newcomer in the next house, who practices singing at all hours of the night."

Past is Past. Finish every day and be done with It. You have done what you could. Some blunders and absurdities, no doubt, crept in. Forget them as soon as you can .- Emerson.

The Drawback.

"Can't you live just as cheap in the suburbs as in town?" "Yes, but everybody knows it out there."-Life.

Distance is a great promotor of admiration - Didernt

Coals of Fire. "I thought," said ne, "that those people treated you so badly, and now see! They invite you to their reception. Shall you go?"

'Why, certainly," said she. "Their inviting me showed they harbored no grudge against me for the way they treated me."-New York Press.

Well Answered.

"Oh, no; I don't claim to be any different or any brighter than the bal-ance of mankind. I expect I shall marry some fool woman some of these days "If you ever marry that's the kind of

a woman you will marry, all right."--Rochester Union.

A Telltale Touch. Is it true that sightless people can tell the color of things by touch?" some one asked a blind man. "Occasionally, yes," came the an-wer. "If, for instance, I touched a swer. redhot poker I could tell it was red."

Swift's Sarcasm. "My brethren." said Dean Swift in a sermon, "there are three sorts of pride-of riches, of birth and of talents. I shall not now speak of the latter, none of you being liable to that abominable vice."

She Got It.

He (time 11:30 p. m.)-And you will think of me when 1 am gone? She (suppressing a yawn)-I'll try to if you'll ever give pie an opportunity.

camp, was signaled to headquarters tersely:

"'Major Bunks, captured during night march, exchanged later for two plugs tobacco.'"

Doctors Are More Thorough Now. A physician at a dinner in Denver sneered at certain Biblical miracles. "Lazarus," he said, "was raised from dead, and yet I don't see any dead folks being raised in our time.'

"No," said a clergyman, an eminent Biblical scholar, with a smile, "Mod-ern medical science has progressed too far for that, eh?"-Washington Star.

Conciliatory

Head Waiter (dignified and pompous) Have you ordered, sir" Despairing Patron-Yes, I ordered a porterhouse steak half an hour ago, and I wish to apologize for my rudeness. With your permission 1 will withdraw it as With an order and renew it as a suggestion -Chicago Tribune.

Comparisons.

Small Tommy-My pa's awful smart. Little Elsie-What does he do? Small Tommy-He's a mechanic and makes locomotives. Little Eisle-That's noth-ing. My pa's a commuter and makes two trains every day.-Chicago News.

Good and Evil.

Nothing is truly good to a man which does not make him just, temperate, courageous and free, and nothing can be evil to a man which does not give him the contrary disposition .- Marcus

Significant Signals.

"Do you not see the handwriting on the wall?" asked the foreboding friend "No," replied Senator Sorghum; "the headlines in the newspapers are enough for ms."-Washington Star.

Canned goods, strictly pure, conforming with the pure food law, consisting of Tomatoes, Peaches, Pears, Succotash and Corn, Corned and Dried Beef, Veal Loaf, Salmon, Sar-dines in oil and mustard, Pickles by the keg or in bottles, all kinds of Fish, by the piece or pail, Hams, Bacon and Salt Pork, or anything you desire in the Grocery line; also Hay, Feed, Oats, Straw and Flour.
