

# Millinery for All

SO MANY girls are trying their hands upon hat making at home that a few examples of those hats which are likely to be most successful in the hands of the amateur, are interesting just now. These are the hats made of embroidery or lace or Swiss and batiste which have come to be a staple for midsummer, and are known as "lingerie" hats. New models this year show many fabrics which have not been used heretofore. Fine dimities, lawns and mills, in fact any sheer, pretty midsummer material, such as are used for midsummer gowns, is considered available for the lingerie hat. The prettiest models show combinations of all-over embroidery and the materials I have mentioned.

The safest designs for the amateur are those made of edgings of lace or embroidery, either wide or narrow. All the hats are made over wire frames which are first covered with very sheer mull or with chiffon. This first covering is either fitted over the frame or made into a shirred casing for the brim and laid smoothly over the crown. A scant ruffle of wide

edging is laid about the brim falling over the edge about the depth of the scallop. In such a hat the crown is made by sewing two rows of edging together and making a small puffed crown of them. A band and bow of wide ribbon and a cluster of familiar garden flowers finishes the hat, which is quite as satisfactory when made at home as when made elsewhere.

If narrow edging, of lace or embroidery, is used it is sewed row on row and quite often the under brim is faced with scant ruffles sewed in the same way. Very sheer batiste or other embroidery is often laid in a full double ruffle over the brim, for girlish wearers.

The lingerie hat, by the way, is worn by maid and matron alike. It has been called the "baby" hat because it was first made for little girls when they graduated out of bonnets and took on the dignity of hats built on a frame. It is durable and beautiful and may be taken apart and the materials laundered. Study the lingerie hat for, like the lingerie waist, it has come to stay.

JULIA BOTTOMLEY.

## PRETTY IDEA FOR DRESS WEAR HAT IN HOT WEATHER

Important for the Girl Who Has a Dislike for Hair of Different Shades.

Do you want streaked hair of 17 different shades when next autumn comes around?

If you do not you must make up your mind to wear a hat during the summer.

A bother, you say? Of course. Did you ever know anything connected with keeping fresh that wasn't a bother?

And it is not half as hard as spending time and money later getting over the effects of sunburnt hair.

Too strong a dose of sun acts on the hair by drying natural oils in the scalp and then burning just as a hot flatiron scorches linen.

If it is impossible for you to wear a hat, oil must be rubbed regularly into the scalp to counteract this drying effect.

Remember that the most beautiful hair in the world comes from the peasant women of Brittany, who keep their heads covered with their little white caps.

**A Summer Coat.**

A simple but beautiful coat for wear over a lingerie gown in the summer evenings is of black chiffon, cut three-quarter length and slashed at the sides, the slashings being connected by taffeta silk tabs. The half sleeves are slashed and caught in the same manner, and in front—the neck is cut very low—the only fastening is a tassel of silver cord. All the edges are embroidered in a wave design in the silver. The chiffon may be mounted over light taffeta silk, and net may be substituted as the coat material. This wrap may sound difficult to make, but it is not so; and with the help of a lucky remnant or two the expense will be slight.

**Irish Lace Collars.**

With the return of warm weather the fashion has swerved back to Irish lace collars. We will wear more of them this summer than for years. The girl in her new suit has mostly Irish lace around her neck. For this reason she wears a four-inch Irish lace collar around her coat and a four or six inch one around her blouse, which is collarless. This collar dips down for an inch in front and is finished with a plaited jabot of Irish lace and linen.

Chantecler and peasant influence holds good in the summer fashions, both in color and line.

Persian patterns are seen in cotton and silk crepes; sometimes they form the entire garment.

# IMPORTANCE OF GOOD LIGHT AND VENTILATION

One of Common Errors in Building Stables Is Failure to Provide Windows and Ventilators in Sufficient Numbers.

One of the common errors in building stables is to fail to provide windows and ventilators in sufficient numbers. In the cheaper barns it is the light especially that is usually left out of the calculation. This is one of the most serious mistakes when we stop to think of how cheap light really is and how valuable it is as a germicide.

Many of the diseases of our live stock may be attributed to germs. Tuberculosis is caused by specific germs. The myriads of germs that escape from tubercular animals confined in a barn are disseminated through the stables, and sunlight is a factor in the destruction of these germs. In fact light destroys much germ life. Aside from the health standpoint good light in the stables makes work more pleasant and provides greater comfort for the farm animals.

Why not have the barn as light as the parlors of the farm house? It

costs but a few dollars more if the windows are provided when the building is being constructed. Judgment, however, should be exercised in putting in windows in the right place. A uniform light should be provided in all parts of the stable.

The furnishing of light is an important one in the construction of any farm building and it is not hard to obtain if a little forethought is exercised. However, with ventilation it is different because considerable planning must be required when building to insure an ample supply of fresh air in the barn at all seasons of the year. It is important to have fresh air in the barn during cold weather and at the same time avoid draughts.

Self-Regulating Stable Ventilator.

important that our ventilation in our modern farm buildings should be provided with plenty of fresh air at all times in order to contribute to the health of the live stock.

With the outlet pipes it is not necessary to have more than one or two—often one is sufficient, depending of course upon the size of the barn.

As an easy way out of the difficulty we would suggest to our readers that they make a ground plan of their buildings giving exact dimensions as to height, width, length of building and submit it to manufacturers of ventilating apparatus, and ask for an estimate on the cost of installing a perfect ventilating system.

clover and timothy so thick that the grass will come up as thick as the hair on a dog and in some places we will yet find that the young plants will die out and their places be filled with noxious weeds.

These interspaces may be filled ever so often with fresh seed and the result will be similar which is conclusive evidence that every soil has a capacity for supporting a certain number of one kind of plants and it will produce no more than that number of that variety no matter how well it is tilled or how many are germinated on that particular soil.

When we fill these interspaces between the plants with another species of grass a certain lot of its plants will grow and the rest will die soon after they have germinated.

The ones that grow will not interfere with the other varieties and the yield will be increased.

Practical experience has shown us that any soil will be more certain to yield larger and better crops of forage and hay when it is seeded with mixed grasses than when sown to clover and timothy alone.

Our flocks and herds will thrive better when fed on mixed grasses, (no matter whether in a green condition or cured for hay) than they will when fed on any one or two varieties sowed alone, no matter how nutritious these grasses may be.

We will find it in every way as important to balance our forage rations as it is the grain rations if we obtain the best results from a minimum amount of feed.

## VARIETIES OF TAME GRASSES

Careful Study Will Disclose Fact That Flocks and Herds Thrive Better on Mixture Than on One Kind.

(By S. M. MILLER.)

There is no one matter connected with good farm management that is more deserving of more careful attention than the growing of tame grasses, and the maintaining of the productive capacity of our permanent pasture land. The successful grass grower needs to have a practical understanding of all the species of tame grasses that we grow and cultivate on our farms as well as a knowledge of their requirements and conditions that are essential to their growth. Much of the success and many times all of the profits of our farms are directly dependent upon the amount and quality of hay and forage produced.

A cause of the inferiority of our meadow lands is the fact that they are supporting numberless useless weeds.

If we could rid our meadows of this pest it would add millions of dollars to the pockets of our farmers. How can it be done? By thorough tillage? By the use of more grass seed? Most emphatically no. That would be in direct opposition to the laws of nature.

We may prepare the soil in the best possible manner and sow on

These interspaces may be filled ever so often with fresh seed and the result will be similar which is conclusive evidence that every soil has a capacity for supporting a certain number of one kind of plants and it will produce no more than that number of that variety no matter how well it is tilled or how many are germinated on that particular soil.

We will find it in every way as important to balance our forage rations as it is the grain rations if we obtain the best results from a minimum amount of feed.

## EXCELLENT BERKSHIRE BOAR

The Berkshire shown in the illustration, while a large, vigorous animal, is not the best type of the breed. His ears are a little too coarse and his nose is somewhat too long. He has, however, excellent bone and brings good, healthy pigs. He is used on a

grade herd to produce market hogs and gives the best of satisfaction.

**Money in Broom Corn.**

There is good money in growing broom corn where one has the time and facilities for harvesting the crop

HE'D GET THE APPLE.

Eddie—Say, mom, give Jessie an apple.

Mamma—Then you'll want one, too.

Eddie—No. Just give it to Jessie. We are going to play Adam and Eve, and she is going to tempt me.

**Casey at the Bat.**

This famous poem is contained in the Coca-Cola Baseball Record Book for 1910, together with records, schedules for both leagues and other valuable baseball information compiled by authorities. This interesting book sent by the Coca-Cola Co., of Atlanta, Ga., on receipt of 2c stamp for postage. Also copy of their booklet "The Truth About Coca-Cola" which tells all about this delicious beverage and why it is so pure, wholesome and refreshing. Are you ever hot—tired—thirsty? Drink Coca-Cola—it is cooling, relieves fatigue and quenches the thirst. At soda fountains and carbonated in bottles—5c everywhere.

**Old Advice.**

Manager—You never get this scene right. Your business with the sweet peas is all wrong and you forget when you are to speak—you get your lines all mixed up.

Actress—All right, sir, I'll be more attentive and fix the sweet peas and try to get my lines in the right place.

Manager—Your course is very simple. Just mind your peas and cues.—Baltimore American.

**Is Dirt Good for Boys?**

Some folks say: "Oh, let the boy play in the dirt. It is good for him. I wouldn't give a cent for a boy that keeps his clothes clean." That may be all right, but what about the boy's mother? Getting the dirt out of clothes by the use of old-fashioned yellow soap and a slow washday method is hard labor. If the boy's mother uses Easy Task laundry soap, which does half the work for her itself, and which reduces washday labor by fifty per cent, it is different. Easy Task is five cents a cake and is the greatest nickel's worth of soap ever sold.

And many a coming man neglects to arrive.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, whooping cough, croup, and all the little ailments.

Mortgage the ship for all it's worth before giving it up.

# MORE PINKHAM CURES

Added to the Long List due to This Famous Remedy.

Oronogo, Mo.—"I was simply a nervous wreck. I could not walk across the floor without my heart fluttering and I could not even receive a letter. Every month I had such a bearing down sensation, as if the lower parts would fall out. Lydia E. Pinkham's Vegetable Compound has done my nerves a great deal of good and has also relieved the bearing down. I recommended it to some friends and two of them have been greatly benefited by it."—Mrs. MAE MCKNIGHT, Oronogo, Mo.

**Another Grateful Woman.**

St. Louis, Mo.—"I was bothered terribly with a female weakness and had backache, bearing down pains and pains in lower parts. I began taking Lydia E. Pinkham's Vegetable Compound regularly and used the Sanative Wash and now I have no more troubles that way."—Mrs. AL. HERZOG, 5722 Prescott Ave., St. Louis, Mo.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, indigestion, dizziness, and nervous prostration. It costs but a trifle to try it, and the result is worth millions to many suffering women.

## The Wretchedness of Constipation

Can quickly be overcome by **CARTER'S LITTLE LIVER PILLS.**

Purely vegetable—act surely and gently on the liver. Cure Biliousness, Headache, Dizziness, and Indigestion. They do their duty.

Small Pill, Small Dose, Small Price. Genuine must bear Signature *W. D. Wood*

## CANCER!

Can be cured without the use of the knife by my SPECIAL BLOODLESS METHOD. At an expense of one cent to you (postal card) I will explain particulars in full.

DR. W. H. HINKLIN MARION, OHIO

W. N. U., CLEVELAND, NO. 30-1910.

**900 DROPS**

**CASTORIA**

ALCOHOL—3 PER CENT  
A Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of

**INFANTS & CHILDREN**

Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral NOT NARCOTIC

Recipe of Old Dr. SAMUEL PITCHEL

Pumpkin Seed -  
Asiatica -  
Aloes Sulfate -  
Cinnamon -  
Apperment -  
Rhubarb -  
Nutmeg -  
Clarified Sugar -  
Mint -  
Peppermint -

A Perfect Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and LOSS OF SLEEP.

Fac Simile Signature of *W. D. Wood*

THE CENTAUR COMPANY, NEW YORK.

At 6 months old  
35 DROPS - 35 CENTS

Guaranteed under the Food and Drug Act

Exact Copy of Wrapper.

**CASTORIA**
