

## WATER SUPPLY SYSTEM CONVENIENT TO FARMERS

Makes Farm Life Attractive and Lessens Danger From Fire—Can Very Readily Be Used for Carrying Water to Dairy and Barns.

Can farmers have running water, hot or cold, in their dwelling houses? Most certainly. What will the cost be? Fifty dollars and up, depending upon the size of the house and the kind of equipment needed. This makes possible the bath and toilet room, protection from fire, the easy washing of windows and walks, the sprinkling of lawns, the irrigating of gardens, and all the other conveniences which a few years ago were thought possible only in cities, where big water sys-

tems were available, writes Clarence A. Shamel in Orange Judd Farmer. This is one of the things that makes farm life attractive. It lessens the work in the house, insures a fine lawn and garden, reduces danger from fire, adds greatly to comfort and convenience in every direction.

The way to secure this is to install a water supply system, with a pressure tank in the basement. This pressure tank is so arranged that by pumping it full under strong air pressure the water is forced all over the house, and is available for the bathroom, toilet room and the garden or fire hose. The water is distributed about the house exactly as it is in city homes, by means of galvanized iron pipes. Where a small building is to be supplied and the amount of water to be used is not large, the system can be installed for \$50. For the average house \$90 is a better figure. Where the house is large, and where considerable amounts of water are needed for the lawn and garden, and possibly also for washing carriages, automobiles and horses, a larger system should be installed, costing up to \$150. The cost of the system, therefore, depends upon the wishes of the owner and the demands that will be made upon it.

Its installation is easy, and its operation is exceedingly simple. Any pipe fitter or plumber can put in the plant so that it will work perfectly. All that is needed for operating is to keep the tank pressure up to the de-

mill, or what is much better, a gasoline engine. Every up-to-date farm ought to have a small gasoline engine, which can be utilized not only for operating this water supply system, but for churning, sawing wood, cutting feed and doing a dozen and one other jobs about the farm. It would take only a few minutes of pumping to raise the pressure in the tank to the desired height. With the engine, it will not be necessary to be economical in using water, provided the well is a

good one and the supply of water large.

I have a system of this kind in my country home. It was installed four years ago and cost \$75. Previous to that time nothing of the kind had been used in my neighborhood. We take care of the waste water and sewage by running a large tile from the bathroom, one-quarter of a mile distant, to a large cistern, located in the center of a big field. This is disinfected about twice a year, and is easily handled. I have never had any trouble with the water pipes, even during the coldest weather. Neither have I had any difficulty with the waste system. In fact, the water supply is practically perfect, and I don't see how any farmer who can get together \$75 or \$100 can afford to be without it.

The illustrations indicate the arrangement of a water supply system, as can be readily seen is very simple. The system can also be used for supplying water to stock tanks, and these may be located anywhere on the farm. The pressure developed in the tank is sufficient to force the water anywhere wanted. This use will, of course, depend entirely upon the wishes of the owner, and is simply a matter of cost of pipes. It can very readily be used for delivering water to dairy or other stock barns, where it can be run into water troughs in the stalls, or elsewhere, as desired. On the whole, the farm water supply system is one of the most satisfac-

sired point. This may be 20, 40, 60 or 100 pounds. A few strokes of the pump, if the work is done by hand, is sufficient. If a lot of water is used, of course the amount of pumping will increase. By being economical in the use of water, that is to say, by wasting none, this matter of pumping is not at all a serious problem.

The most satisfactory method of pumping, however, is to use a wind-

tory that has ever been invented, and should be looked up by everyone who is desirous to secure comfort and convenience.

### Care of Milk.

Carry the milk out of the stable as soon as you get it from the cow. Milk is awfully grasping. It will take every smell within its reach. Don't give it a chance.

## DELICATE BREED OF TURKEYS

It is well known to experienced breeders and nature students that black-plumaged birds will once in a while have white offspring; this explains the origin of what in this country is known as the White Holland turkey. So keen an observer as "Vegeter" is on record as saying that "it is well known that most birds, wild as well as tame, occasionally produce perfectly white individuals of more deli-

cate constitution than the parents. There can be no doubt that the selection and pairing of such is the way in which the breed of white turkeys has been established and kept up." J. A. Leland, a noted Illinois breeder of white turkeys, says: "As to color, I have never seen White Holland turkeys that did not show some black ticking in plumage during some period of their lives."

### A TIMELY WARNING.

Backache, headaches, dizzy spells and distressing urinary troubles warn you of dropsy, diabetes and fatal Bright's disease. Act in time by curing the kidneys with Doan's Kidney Pills. They have cured thousands and will cure you.

Mrs. Frances Collins, nurse, Box 30, Boonville, Mo., says: "For 30 years I suffered from kidney trouble. I had back pains and was bothered by dizziness. I became tired easily and was very nervous. The kidney secretions also proved annoying. Doan's Kidney Pills benefited me promptly. They have my highest endorsement."

### IN THE ART GALLERY.

Mr. Hayrick—Mandy, this here catalogue says that that artist got \$5,000 fer paintin' that little picture.

Mrs. Hayrick—My gosh, Hiram! I wonder what on earth he'd charge fer paintin' a barn?

### Public Want Ads.

Wanted—Several nice old gentlemen to represent us financially. Nothing to do but utter wise remarks and indorse dividend checks. Good wages, from fifty to one hundred millions a year.

Wanted—A financier who will guarantee to keep us supplied with half-colleges and half-libraries while we supply the other halves. No experience required. Good raffle-off.

Wanted—At once. A large number of stockholders to take charge of our food supply and keep us from eating too much. No regular hours. Palm Beach in winter. Adirondacks in summer.

Wanted—A few select persons to represent us socially and do the things we haven't time for. No brains needed. All expenses paid. No worry.—Success.

### Saucy Soldier Shut Her Up.

Col. Robert C. Carter at a Nashville banquet was talking about campaign comrades.

"Then there was Dash of Company A," he said. "Dash had the reputation of being the nastiest tongued man in the regiment.

"It was Private Dash, you know, who, out foraging one evening on a rich estate, came accidentally upon the owner's wife, a grande dame in evening dress.

"Dash asked her for food. She refused him. He asked again. But, still refusing, she walked away.

"No," she said, "I'll give you nothing, trespassing like this; I'll give you nothing. My mind is made up."

"Made up, is it?" said Dash. "Like the rest of you, eh?"

### Puzzled

Hard Work, Sometimes, to Raise Children.

Children's taste is oftentimes more accurate, in selecting the right kind of food to fit the body, than that of adults. Nature works more accurately through the children.

A Brooklyn lady says: "Our little boy had long been troubled with weak digestion. We could never persuade him to take more than one taste of any kind of cereal food. He was a weak little chap and we were puzzled to know what to feed him on.

"One lucky day we tried Grape-Nuts. Well, you never saw a child eat with such a relish, and it did me good to see him. From that day on it seemed as though we could almost see him grow. He would eat Grape-Nuts for breakfast and supper, and I think he would have liked the food for dinner.

"The difference in his appearance is something wonderful.

"My husband had never fancied cereal foods of any kind, but he became very fond of Grape-Nuts and has been much improved in health since using it.

"We are now a healthy family, and naturally believe in Grape-Nuts.

"A friend has two children who were formerly afflicted with rickets. I was satisfied that the disease was caused by lack of proper nourishment. They showed it. So I urged her to use Grape-Nuts as an experiment and the result was almost magical.

"They continued the food and today both children are well and strong as any children in this city, and, of course, my friend is a firm believer in Grape-Nuts for she has the evidence before her eyes every day."

### MEET IN CONGRESS AT ROME

International Gathering of Foes of Tuberculosis to Be Held Late in September.

Official announcement of the Seventh International Congress on Tuberculosis, which will include representatives from every civilized country in the world, has been made by the National Association for the Study and Prevention of Tuberculosis. The congress will be held in Rome from September 24 to 30, 1911, and will be similar in many respects to that held in Washington in the fall of 1908. The congress, which meets every three years, will be under the direct patronage of the king and queen of Italy.

An American committee of 100 will be appointed as the official representatives of the United States. Meanwhile the National Association for the Study and Prevention of Tuberculosis is acting in that capacity and its office in New York will be the headquarters for the United States delegation. The secretary general of the congress is Prof. Vittorio Ascoli of Rome.

As a direct result of the stimulus of the last international congress held in this country, the American committee will be able to report that the number of tuberculosis agencies in this country have been tripled in the three years. More than twice as much money is being spent in the fight against tuberculosis by private societies and institutions, and the appropriations of federal, state, municipal and county have increased nearly five-fold. It is estimated that nearly \$15,000,000 will be spent in anti-tuberculosis work in 1910.

### Confusing.

Craig Bidde, at a dinner in Newport, was describing the changing odds on the Jeffries-Johnson fight at Reno.

"Eight to four and a half on Jeffries—nine to six the other way about—three to one and a quarter—it's rather confusing, isn't it?" he said. "In fact, it's almost as confusing as the two girls' talk about a secret."

"Mary," said the first girl, "told me that you had told her that secret I told you not to tell her."

"The nasty thing," said the other girl, "I told her not to tell you I told her."

"Well, said the first girl, 'I told her I wouldn't tell you she told me—so don't tell her I did.'"

# Attention Sick Women

If you had positive proof that a certain remedy for female ills had made many remarkable cures, would you not feel like trying it?

If during the last thirty years we have not succeeded in convincing every fair-minded woman that Lydia E. Pinkham's Vegetable Compound has cured thousands and thousands of women of the ills peculiar to their sex, then we long for an opportunity to do so by direct correspondence. Meanwhile read the following letters which we guarantee to be genuine and truthful.

Hudson, Ohio.—"I suffered for a long time from a weakness, inflammation, dreadful pains each month and suppression. I had been doctoring and receiving only temporary relief, when a friend advised me to take Lydia E. Pinkham's Vegetable Compound. I did so, and wrote to you for advice. I have faithfully followed your directions and now, after taking only five bottles of the Vegetable Compound, I have every reason to believe I am a well woman. I give you full permission to use my testimonial."

St. Regis Falls, N. Y.—"Two years ago I was so bad that I had to take to my bed every month, and it would last from two to three weeks. I wrote to you for advice and took Lydia E. Pinkham's Vegetable Compound in dry form. I am happy to say that I am cured, thanks to your medicine and good advice. You may use my letter for the good of others."

There is absolutely no doubt about the ability of this grand old remedy, made from the roots and herbs of our fields, to cure female diseases. We possess volumes of proof of this fact, enough to convince the most skeptical.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit. Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.
